

RAILROADS.

INTERCOLONIAL RAILWAY

On and after Sunday, June 15th, 1902, trains will run daily (Sunday excepted) as follows:—

TRAINS LEAVE KENT JUNCTION.

Table with 2 columns: Train No. and Destination/Time. Includes No. 35 Express for Campbellton, No. 34 Mixed for Moncton, and No. 40 for Moncton.

TRAINS LEAVE HARCOURT.

Table with 2 columns: Train No. and Destination/Time. Includes No. 33 for Quebec and Montreal, and No. 34 for Moncton, Halifax, St. John and Sydney.

Stage from Richibucto connects with trains at Harcourt.

All trains run on Atlantic Standard time East of Campbellton. Twenty-four clock is midnight.

Vestibule, dining and sleeping cars on through express trains between Montreal and the Maritime Provinces.

Railway Office, Moncton, N. B., June 20th, 1902.

KENT NORTHERN RAILWAY.

TIME TABLE.

Table with 3 columns: Time, Location, and Time. Shows schedule from Dept. Richibucto to Arr. Kent Junction.

Trains are run by Atlantic Standard time.

Trains run daily, Sunday excepted. Connect with I. C. R. Day Express cars north and south.

WILMOT BROWN.

General Manager and Lessee Richibucto, June 16th, 1902.

MONCTON AND BUCTOUCHE RAILWAY.

On and after Monday, OCT. 21st, 1901, trains on this railway will run as follows:

Table with 3 columns: Time, Location, and Time. Shows schedule between Moncton and Buctouche.

(Eastern Standard Time)

Train from Buctouche connects at Hampprey's with I. C. R. train for Halifax, and at Moncton with the C. P. R. train for St. John, Montreal and United States points leaving at 13.10 and I. C. R. train for Campbellton leaving at 10.25.

Train for Buctouche connects at Hampprey's with I. C. R. day express from Halifax, and at Moncton with all I. C. R. trains from eastward arriving not later than 15.15.

E. G. EVANS, Superintendent

Moncton, N. B., Oct. 21st, 1901.

Kidney Disease and Backache

Mr. John Gheen, who is in the Fish Business at Port Hope, states:—"In my business I do a great deal of driving over bad roads and the constant jar of the rig along with exposure to all sorts of weather brought on kidney disease. I was in miserable health and suffered a great deal with sharp pains in my back. I heard of Dr. Chase's Kidney-Liver Pills and decided to try them. Before I had used all of the first box I felt better and three boxes have entirely cured me. I am very glad of an opportunity to recommend Dr. Chase's Kidney-Liver Pills for I have proved their wonderful control over kidney disease."

It seems unwise to waste money and run the risk of experimenting with new fangled, untried remedies when you know that Dr. Chase's Kidney-Liver Pills will cure you. One pill a dose, 25c a box, at all druggists, or E. Mansson, Bates & Co., Toronto.

Dr. Chase's Kidney-Liver Pills

STORIES MADE WITH FEET.

Animal Tracks in the Wood Which Betray Identity.

Each animal makes its own kind of track in the mud, snow or dust. No two make exactly the same. The track of a coon is never like that of a fox, and the track of a fox is readily distinguished from that of a rabbit or small dog. And, more than that, the track of one coon may differ from that of his own brother, so that one can sometimes distinguish the track of a given individual and by seeing it on different occasions get something like an insight into its life. Thus a famous grizzly in the west was known by his track. One of his toes had been cut off by a trap, and the difference that made in his track was easy to see.

To come nearer home, our common animals sometimes have unpleasant experiences with steel traps. The marks of these on their feet often add a peculiarity that identifies the animal. In other cases the track is extra large or small or is crooked, but it always keeps the main features of its kind. The track of one sort of animal rarely need be mistaken for that of another, and the A B C of tracking is to learn the chief kinds of footmarks that are to be found in your region. The way to learn tracks is to draw those that you find, always sketching them right from nature, never from memory, and it is always best to make them exactly life size.

Our Debt to Our Mothers.

Ian Maclaren in The Christian Endeavor World paid the following beautiful tribute to mothers:

"The person to whom you owe more than you can ever pay or even imagine is your mother. She endured more for you, served you more patiently, loved you more fondly, thought of you more bravely, than any other person you have known on earth or will ever know save your wife or your husband, if indeed they can always be excepted. If your mother be spared to you, then are you bound to make her a first charge on your life, as you desire a peaceful conscience and as you shall answer before the judgment seat of God. She must be encompassed with every observance of comfort and honor and gentleness and love, with sacrifices also, if so be it will please her, of tastes and occupations and time and even friendship, and after you have done all that you can think of and any one can suggest you will still remain a hopeless bankrupt for the love where-with she loved you."

The Warhorse.

The horse in war is expensive, fragile and a fool. He is greedy, and his food is as bulky as himself. He requires an expert to keep him efficient under hard work and a miracle to keep him alive under heavy fire. He must be watched and guarded more carefully than the lines of communication both in action and in camp. He is a coward. The race of them that snorted "ha! ha!" among the trumpets, the noise of the captains and the shouting is dead, if it ever lived at all outside the inspired mind of the plague stricken poet. He is a traitor and will desert to the enemy at the first opportunity, probably with three days' rations in his saddlebags and a useful rifle in the bucket.

BACKACHE?

If you have Backache you have Kidney Disease. If you neglect Backache it will develop into something worse—Bright's Disease or Diabetes. There is no use rubbing and doctoring your back. Cure the kidneys. There is only one kidney medicine but it cures Backache every time—

Dodd's Kidney Pills

A MATHEMATICAL PROBLEM

Can You Solve It or Prove That It Cannot Be Solved?

At a lecture at the Royal Institution on the fascinating subject of "Magic Squares" Major P. A. MacMahon, F. R. S., reminded his audience of the existence of a curious problem which, despite its apparent simplicity, has never yet been solved. He commended it to the attention of any one present who desired to exercise his ingenuity and patience.

The problem is as follows: There are thirty-six officers of six different ranks and drawn from six different regiments, and it is required to arrange them in a square of thirty-six compartments, so that in each row as well as in each column there appears an officer of each rank and also an officer from each regiment.

Euler's "Recherches Sur une Nouvelle Espece de Quarres Magiques," which appeared in 1782, discusses this problem, but gives no solution, and the late Professor Cayley, writing more than a century afterward, confessed that it was beyond his powers.

Major MacMahon, who has added so much to our knowledge of the theory of groups—a fascinating branch of mathematics which has an important bearing on many branches of physical science—has not yet found a key to the mystery.

Whoever can solve this problem or prove that it cannot be solved will achieve immortality on the lips of mathematicians and perhaps open a door into a new realm of the scientific wonderland which is called pure mathematics.—London Post.

Catching a Muskellunge.

You feel the drops of sweat on your forehead, though the early morning air is as cool as the breath from some snow clad mountain. Gradually he weakens, and you know that, barring accident, you have won. Up, closer and closer, you draw him along till at last he floats there within a foot of your boat.

No eyes so wicked as a musky's. They glare up at you like an angry dog's, seeming to watch every motion you make. Be careful. Here it comes, his final despairing leap for liberty. As he makes it his powerful tail sweeps against the stern and deluges you with water. But the hooks hold, and once more, for the last time, you draw him again to where the guide waits with a revolver in his hand. A shot back of those glittering eyes, a shiver down the whole length of him, a swift jerk into the bottom of the boat with the gaff-hook—and you lie back in an ecstasy of exhaustion.

Naming the Hymn.

A story is told of a negro evangelical minister who held night services in a chapel formerly used by the Anglican church. In a hymnal which had been left he found an old familiar hymn suitable for his sermon, but the Roman number CXIX somewhat confused him, and he was embarrassed as to how to announce the hymn. As was the custom, he read the stanzas through, seeming still confused. He then reread the first stanzas, which did not seem to aid him in helping the congregation, now very much bewildered. Proving redoubtable, he straightened himself up and seemed to grasp the situation at a glance and in a stentorian voice exclaimed, "Brethren, let us sing the Skee-six hymn."

He Boiled It Down.

A beginner in newspaper work in a southern town who occasionally "sent stuff" to one of the New York dailies picked up what seemed to him a "big story." Hurrying to the telegraph office he "queried" the telegraph editor: "Column story on so and so. Shall I send?"

The reply was brief and prompt, but to the enthusiast unsatisfactory. "Send 600 words," was all it said.

"Can't be told in less than 1,200," he wired back. Before long the reply came:

"Story of creation of world told in 600. Try it."

Cannibal Trout.

Trout are cannibals, and it is a moot question whether in some waters large trout should not be systematically destroyed. Dartmoor fishermen are in favor of killing them. They say that fish in their streams of one pound to two pounds weight are hardly ever caught by ordinary means and live entirely on their own brethren. A two pound Devon trout is probably responsible for the death of several stones' weight of his own kind.

Ants as Examples.

"Look at the birds in the trees," said the man who wants to keep house; "they wouldn't think of living in a crowded tenement."

"Yes," answered his wife, "but look at the ants. They always live in an apartment house. And every one knows that ants are smarter than birds."

Forewarned.

Agent—Let me show you something very neat in the way of artificial limbs.

Mr. Busyman—Nonsense! Don't bother me. I'm not a cripple.

Agent—Of course not, but it's always well to be prepared for emergencies, especially here in New York.

The Worst Trouble.

"Is there anything harder to bear than real trouble?" I asked the intellectual man who sat next to me in the smoker.

"Only imaginary trouble," he replied.—Judge.

If you get rich, you must make money during dull times.—

To Melt Iron.

The heat of a common coal fire is 1,140 degrees, but it takes 3,479 degrees to melt iron.

Substitute For Eggs.

When eggs are scarce, put away at night a teacup of mashed potatoes in which has been strained a tablespoonful of sugar and mix it in the corn cake batter next morning. You will find the cakes light and sweet.

A Poisonous Wax.

Wax is a substance secreted by the bee and is analogous to the fat of the higher animals. The wax of a species of bee common in Patagonia, Tierra del Fuego and other parts of southern South America and the adjacent islands is a dark blue in color and is said to be more poisonous than arsenic.

A Hard Wood.

In Vienna they have a single word for an occurrence very common with them in winter, the bursting of a water pipe. This is the word: "Hochquellenwasserlieferungsbrennfatalitaton."

Pomegranate Wood.

Pomegranate wood is the heaviest known. A cubic foot weighs eighty-four and three-quarter pounds.

Stilton Cheese.

Stilton cheese acquires its green color from a vegetable growth, while some other kinds are rendered green by the addition of powdered sage leaves.

Fatal to Mice.

Mice cannot exist on Papa Little, an island in St. Magnus bay, on the west of Shetland. To test the truth of this statement several mice at various times were brought there, but the soil proved so uncongenial that they soon died.

South Sea Superstitions.

Nearly all tribes of south sea islanders believe that the sky is a great blue basin inverted over the world. To them the outside of the basin is all fire. The sun, moon and stars they take to be holes cut in the basin through which a peep at the great outside fire may be had.

Under the Rose.

The rose is the emblem of secrecy in Greece, and accordingly this flower used to be hung over the table where guests were entertained in token that nothing heard there was to be repeated.

A Sluggish Lizard.

The tuatua, a nine inch long lizard of New Zealand, is said to be the most sluggish animal in the world. He is usually found clinging to rocks and has been known to remain in the same spot for months. How he lives is a mystery.

Black Walnut.

Black walnut is less than half the weight of a corresponding quantity of ebony.

Life on Islands.

People usually live longer in islands and small peninsulas than on continents. Barbados, Greece, Madeira and the Shetlands are all favorable to long life.

The Solano.

The solano is a hot southeast wind, loaded with fine dust, which blows across Spain. It produces great uneasiness throughout the country. The Spanish have a proverb which says, "Ask no favors during solano."

Slate.

Slate forms naturally in layers, and the "splitter," following the grain, or "ribbon," with a large chisel, separates the blocks into strips of about the proper thickness for roofing slate.

A Good Nerve.

Any one whose nerve force is deficient and blood impoverished may take with benefit the yolk of an egg, well beaten up in a glass of milk, each morning. The iron and phosphoric compounds are in such a condition as to be readily assimilated by the system, although small in amount.

Domestic Fowls.

Fowls are supposed to have been first domesticated in China 1400 B. C.

Japanese Drum.

In the Japanese temples there is a large drum used in worship. It is called the kagura taiko. It gives a tone much like a gong and is used in devotion.

Three Great Skeletons.

The vicinity of Palermo, Italy, has yielded three remarkable human skeletons, one in 1410, one in 1516 and the last in 1559. The first was twenty-one, the second thirty and the third thirty-four feet in height.

France's Vineyards.

The vineyards of France cover 4,288,037 acres.

To Extract Oil From Wood.

To get the essential oil from wood, barks, roots, herbs, etc., place them in a bottle and pour upon them a spoonful of ether. Keep in a cool place a few hours and then fill the bottle with cold water. The essential oil will swim upon the surface and may be easily separated.

Child Insurance.

The insurance of the lives of children is forbidden in Montreal on the ground that many parents neglect their sick offspring when they know they will profit by their death.

Fat as a Food.

The great curse of modern civilization—consumption—is mainly due to insufficiency of fat in our daily food. Tea or coffee supplies none of this necessity, but cocoa and chocolate do, and that in the most appetizing and digestible form in which it is possible to obtain fat.

THE WORLD OVER.

The report that Count Rudolph Potocki, aide-de-camp to the Czar, lost \$500,000 in three hours at baccarat in Warsaw, and then attempted suicide, is regarded as unfounded.

A day laborer of Austria daily gave his wife 4d. to buy his dinner, but in time discovered she spent only 4d. for the dinner, retaining the balance. He accused her in court of stealing 7s., but she swore she had used it for household purposes and was acquitted.

The President of the country across the line will not permit his good right arm to be pulled from its socket on his tour in the west and northwest next fall. Hand-shaking will be abolished.

Dr. E. E. Buckle, a dentist of Dexter, Mo., died as the result of a blow received six months ago. The blow was struck on his back by a friend who failed to induce him to engage in a boxing bout.

G. McL. Brown, executive officer of the C. P. R. at Vancouver, has been appointed superintendent of sleeping and dining car and hotel department of the system, in succession to J. A. Sheffield, retired. Mr. Brown will enjoy much wider powers than those held by Mr. Sheffield.

Earl Dundonald, the new officer commanding the Canadian militia, sails for Canada July 15.

The London Chamber of Commerce has appointed a committee to inquire into the projected fast Atlantic service.

For Cholera Morbus, Cholera Infantum, Cramps, Colic, Diarrhoea, Dysentery, and Summer Complaint, Dr. Fowler's Extract of Wild Strawberry is a prompt, safe and sure cure that has been a popular favorite for nearly 60 years.

George W. Hastings, a graduate of Trinity University, Toronto, and who was recently called to the bar at Osgoode Hall, and Miss Bessie Lister, daughter of the late Judge Lister, were quietly married in Toronto last week. The ceremony was kept secret and only developed through a letter sent from Chicago to the bride's mother, asking forgiveness.

DO YOU GET YOUR Job Printing . . . DONE AT THE Review Office?

All kinds of JOB WORK done at this office with Neatness and Despatch. Send us your Order and be convinced of the GOOD SATISFACTION GIVEN

THE REVIEW Richibucto, N. B. JUST RECEIVED!

A carload of the famous Heney Carriages. For quality of stock and excellence of workmanship, the Heney Buggy heads the list. Also a large stock of light and heavy Harness, Plows, Harrows, Cultivators, Churns, Washers, Wringers, Bicycles, Organs, Pianos, Sewing Machines, Spramotors, etc.

A full stock of the world-renowned McCormick harvesting machines. The name "McCormick" on a Reaper, Binder, Mower or Rake is a sufficient guarantee that you are getting the best machine in the world. The McCormick runs in a class by itself and is the standard by which all other machines are judged.

If it is true that "cleanliness is next to godliness" it is very important that you should have a Quaker Bath Cabinet in your home. With it you can enjoy the luxury of a Turkish Bath for four or five cents. A soap and water bath only cleanses on the outside. A Vapor Bath cleans inside as well. It will break up a cold quicker than any other agency. There is no disease that will not benefit.

In order to introduce it, I will give any responsible person the use of a Cabinet with sufficient alcohol to give him a good vapor bath free of charge. Try it once and be convinced.

GEO. N. CLARK
