

## AGRICULTURE, &amp;c.

**DEATH TO CATERPILLARS, &c.**—The conductor of the Gardener's Magazine says, 'We can affirm from almost daily experience, that strong lime water will kill every kind of Caterpillar, and even worms, snails, lizards, frogs, toads, snakes, and fishes.'

**SOAKING SEED CORN IN COPPERAS WATER.**—An experiment was made last season by a gentleman in Dennis of soaking seed corn in a solution of copperas, from 24 to 40 hours previous to planting as recommended in the New England Farmer, and in Fessenden's New England Farmer's Almanac. The corn thus soaked was untouched by worms, while some planted on the same piece in the common way, was very much injured. A Connecticut farmer has made a similar trial and says that it was not only untouched by worms but yielded one third more. A pound of copperas dissolved in warm water is to be used to a peck of corn.—Barnstable Journal.

**COMPOSITION TO DESTROY SLUGS, CATERPILLARS, AND OTHER INSECTS.**—Put in an iron pot a pound of quick lime and a pound of sulphur. Stir them about quickly; and, whilst doing so put in six pounds of water, which is to boil. Snails will immediately leave any place watered with the composition; and if trees are watered with it, any caterpillars upon them will die instantly.

One of the most effectual means of curing a cut, bruise, or burn, is said to be the inside coating of the shell of a raw egg.—Apply the moist surface to the wound, it will adhere of itself, leave no scar, and heal the wound, without pain, more speedily than any sarve or plaster in the universe.

**IMPORTANT TO FARMERS**—The revised statutes require that a roller, instead of a square edge, shall be used in striking grain that is measured in a half bushel or other measure. The square edge, it is said, will draw off a pint of corn or three gills of oats below the even surface, while the round one makes it exactly level.

By the same, 2000 lbs. weight instead of 20 cwt, make a ton.—Utica Etue.
