

## AGRICULTURE, &amp;c.

**CURE FOR CORNS.**—Take a small slice of raw, lean, fresh beef, about the thickness of a dollar, and bind it on the corn; do this three or four successive nights, and the cure is said to be certain—try it.

**TO PRESERVE VINES, FROM BUGS, &c.**—Sulphate of Soda. (Glauber Salts) an ounce dissolved in about one quart of water and sprinkled upon the plants or vines, is recommended as a preventive against destructive insects.

**TO MAKE FINE BISCUIT.**—To two pounds of flour, and one table spoonful of butter, a tea cup full of cream, a little sour, small tea spoonful of perlash—make them as soft as possible, roll very thin, cut them out and bake in five minutes—the whole process, 15 minutes.

**RECIPE FOR THE BILLIOUS CHOLIC.**—Take a large handful of bark of the White Walnut, and boil it in water till very strong, then sweeten it with molasses, and let the patient take a tea-cup full every hour, or oftener, as occasion may require. It will injure no medicine that has been taken previously.

**EXCELLENT SOFT SOAP.**—This is about the time the good women in the country make their soap, and for the want of some good rule many, undoubtedly, will be much perplexed and much fatigued, and they are not to be blamed if a little scolding should take place. To avoid this and to obtain soap of a good quality, in a short time, with little trouble, observe the following rule.

16 quarts of lye of sufficient strength to bear an egg, 8 lb. of clarified or clean grease, 1 1-2 lbs. of rosin—put the whole into a five pail kettle and boil it. At first it is apt to rise, in which case, add a little strong lye, and so continue to do until the materials are incorporated. Then remove it from the fire and add by degrees weak lye, stirring it at every addition, until the kettle be full.

We have seen in the last N. E. Farmer a receipt for making cold soap; but we think the above more simple and expeditious.
