

TITHES PROCESSES.—Over 120 attachments were this day (Monday) issued from the court of Chancery against persons for tithes which are now the property of the crown; and it is said to be the fixed determination of the government to enforce their payments at all events. For this purpose there has been a march of troops upon the several points where the law is to be put in execution, and where resistance may be expected.—*Dublin Mail.*

Land Communication between Europe and China.—According to accounts from Moscow, the proprietors of the diligences and waggons in that city intend to extend their communications to Warsaw, and in the course of next year, to the governments of Tamboff, Kasan, Penza, Tobusk, Irkutsk, Yakutzk, to Ktackla, on the frontiers of China. Thus there will be a direct communication by land from the frontiers of China to Petersburg, Moscow, Warsaw, and perhaps to Paris, with which view Mr Muller, the head of the Moscow establishment, intends to treat with the Messageries of Paris.—*German Paper.*

Gold Mines in Egypt.—A letter from Alexandria, in Egypt, dated August 12, states, that M. Linant, a French traveller, has discovered a rich mine of gold in the mountains that run along the Isthmus of Suez. He conveyed nine chests of the ore to Cairo, some of which on being smelted, rendered one fifth of pure metal. The most productive of the mines of Peru do not afford a larger proportion.

STATE OF COMMERCE AND MANUFACTURES.

The improvement which we have long anticipated in the state of commerce and manufactures is now beginning to be realized. That it has been so long delayed is to be ascribed, in a very great measure, to the continued prevalence of Cholera in the principal sea-ports and manufacturing towns.

The harvest is the most plentiful that has been known for many years, and the great bulk of the wheat crops have been well secured.

Since our last, the two great manufactures of the country, the cotton and woollen, have experienced a decided improvement. There is an increased demand for goods, and the prices, both of the raw material and the manufactured article, are looking upwards. In London, trade continues very dull. The Baltic timber trade suffers more, and more, in consequence of the absurd preference given by our legislature to the bad timber of Canada over the good timber of the Baltic. The corn market, from circumstances above-mentioned, is of course heavy.—The wool market, on the other hand, is steady, and prices are looking upwards. Within the last few weeks higher prices have been obtained in London than the staplers could obtain from their customers in Yorkshire; which may be ascribed in part to the small quantity of German wool brought to the market, and in part to the activity of the manufacturers in the West of England. At the German Fairs this year, the German, Belgian, Swedish, and Russian manufacturers were unprecedentedly bold and eager in their competition with the English buyers; and the facts, that the woollen manufactures of the continent; and especially those of Germany, are rapidly on the increase. That country supplies itself entirely with superior qualities of woollens, and only comes to England for the lower qualities, of which, however, a large quantity is still sent.

The Cotton manufacture is improving in every branch. There is an increased demand for goods and yarn of all descriptions.

The Woollen manufacture participates in the general improvement of the country; though the manufactures of Yorkshire are much harassed and fettered in their operations, by a Trades Union, unprecedented in its extent and power, and sometimes dictatorial and unreasonable in its conduct.

NOTICE TO EMIGRANTS.

Emigrants arriving and desirous of settling, will immediately receive Crown Lands upon the Terms prescribed by Government. Copies and Plans of Surveyed Lands from Shediac to Restigouche, can be seen by applying to Mr. James Ingram, Bathurst, Mr. Ward McDonald, Richibucto, and the Undersigned, to whom all application must be made. (If by letter post-paid)

NEWCASTLE CLASSICAL & COMMERCIAL ACADEMY.

The Public are respectfully informed, that MR. JENKINS intends to open the above ACADEMY, at MR. VENNING'S, on WEDNESDAY, 2nd January, next.

In devoting himself to the Education of Youth, it is not Mr. J.'s aim, to obtain ephemeral reputation by an ostentatious display; but to establish and conduct his Seminary, on such principles as will bear a strict investigation, and stand the test of time.

From long experience, he is convinced that in order to overcome the reluctance to study, which boys generally evince, it is incumbent on the preceptor, to assume such an authority as will command obedience, procure respect, and in a great measure supersede the necessity of coercion; and that strict discipline should be maintained without austerity or moroseness.

As Mr. J. neither receives nor solicits a stipulated salary, and as any pupil may be withdrawn at the expiration of his quarter: Mr. J. hopes the Public will give him credit for candour, when he assures them, that in their service he will constantly hold his own interest in view, and that it will, at all times, be an active stimulus to his exertions, to give general satisfaction.

A Prospectus of the School may be seen by applying to J. A. Street, Esq. Newcastle; J. Gilmour, Esq. Douglstown; A. Davidson, Esq. Nelson; or J. Cunard, Esq. Chatham.

Parents or Guardians desiring an interview with Mr Jenkins, are requested to call at Mr H. Hamill's hotel, Newcastle.

P. S. Mr Jenkins will make arrangements for the reception of a few BOARDERS, as soon as he can procure a suitable residence, &c.

Miramichi, 24th Dec. 1832.

IN THE PRESS

AND WILL BE PUBLISHED IN TWO OR THREE WEEKS, AT THE GLEANER OFFICE, THE

ALMANAC OF ST. LAWRENCE

The Calculations of which are specially adapted to the Meridian of the Counties on the shore of the Gulf of St. Lawrence, and for the Latitude of the most central part of the Province. The Rising and Setting of the SUN, have been calculated with reference to True Time, enlarged by the allowance for Refraction; and with respect to the same phenomena of the MOON, not only the consequences of Refraction, but the opposing effects of Parallax have been closely attended to. Every calculation has been the result of a separate operation on the principles of Spherical Trigonometry, without the least resort to approximations. Errors of magnitude in other Almanacs have been attentively reviewed with the purpose of correction; and no pains have been spared to make the work deserving of the public patronage. December 11.
