Dr. Moffat's Life Pills and Phoenix Bitters!

THE UNIVERSAL ESTIMATION in which the celebrated LIFE PILLS AND PHENIX BITIERS are held, is sa isfactorily demons rated by the increasing demand for them in every section of the Union, and by the voluntary testimonials to their remarkable efficacy, which are everywhere offered. It is not less from a deeply gatifying confidence that they ere the means of extensive and inestimable good among his afflic ed fellow crea ures, than from interes ed considerations, that the proprietor of these pre eminently successful medicines is desirous of keeping them constantly before the public eye. The sale of every additional box and bottle is a guarantee that some persons will be relieved from a greater or less degree of soffering, and be up oved in general health; for in no case of soffering from disease can they be taken in vain The proprietor has never known or been informed of an instance in which they have failed to do good .- In the most obstinate cases of chronic disease, such as chronic dyspepsis, to pid liver, rheumatism, asthma, nervous and bilious head ache, costiveness, piles, general debility, scrofulous swellings and ulcars, scurvy, salt rheum, and all other chronic affect one of the organs and membranes, they effect cures with a rapidity and permanency which few persons would theoretically believe, but to which thousands have testified from happy experience. In colds and coughs, which, if neglected, superinduce the most fatal diseases of the lungs and indeed the vicera in general, these medicines, if taken but three or four days, never fail. Taken at but three or four days, never fail. night, they so promote the insensible perspiration, and so relieve the system of febrile action and feculent obstructions, as to produce a most delightful sense of convalescence in the morning,—and though the usual symptoms of a cold should partially return during the day, the repetition of a suitable dose at the next hour of bed time will almost invariably effect permanent relief, without further sid. Their effect open fevers of a more scule and violent kind is not less sure and speedy if taken in proportionable quality,-and persons retiring to bed with inflammatory symptoms of the most alarming kind, will awake with the gratifying consciousness that the fierce enemy has en overthrown, and can easily be subdued. In the same way, vi.ceral turgescence, though long established, and visceral inflammations, however critical, will yield—the former to small and the latter to large doses of the LIFE PILLS, -and so also hysterical affections, hypocondriaciem, restlessness, and very many other varieties of the Neourotical class of diseases, yield to the efficacy of the PHENIX

The above Medicines are for Sale at the Store of Mr. JOSEPH SPRATT, in Chatham, who is appointed sole Agent for their disposal in Miramichi.

PROSPECTUS OF A NEW WORK, New preparing for the Press and to be published at Sairt John and in London, to be entitled; New-Brunswick:

With Notes for Emigrants BY ABRAHAM GESNER, Esq. F. G. S &c Author of "Remarks on the Geology and Miner-alogy of Nova-Scotia,"

A WORK containing an account of the To-pegraphy, Climate, Soil and Natural Produc-tions of New Branswick, form a desirable object in Colonial literature. It is generally acknowledged that the historical sketches of of certain districts of the Province; which have appeared from time to time, with all the merits they possers, do not supply a full des-cription of the whole country in its presen-state, and the advantages it offers to a respect

table class of emigrants from Great Britain. The numerous able works that have been written on Causda have been the means of introducing the extensive improvements every where seen in that Province, compared with which New Brunswick possess equal advan-tage.—Asthe relief of the surples population of the Mother Country and its transfruction to the anoccopied Lands of her Colonies is of national importance, the chief object of the above work is to supply a full and accurate account of the Province with a view to its improvement by British emigrants and British cipi-

During the last fifteen years, the author has explored every district of Nova Scotia and New Bronswick. The last five years have been devoted to making a Geological Survey of the latter Province. His attention has also been directed to Emigration; and from the opportunities he has had for obtaining infor-mation, his descriptions will be given from actual observation, and his remarks will be defrom practical experience.

Besides adverting briefly to the History and Aborigines of the Colony, the work will contain an account of its present state, its climate, topography, agricul ure, geology and minerale gy, fisheries and other resources, trade, statisties, and pateral history, with remarks on emigration, and information for emigrants.

The work will be neatly printed on about four hundred pages of large doodecimo, and will contain a new Map of the Province, with views of the Grand Falls and other natural

Sabscription Lists will be opened in different parts of the Provinces.-The price of each copy to subscribers will be Ten Shillings. St. John, N. B., June 17, 1843.
