Dr. Moffat's Life Pills and Phoenix Bitters!

THE UNIVERSAL ESTIMATION in which
the celebrated LIFE PILLS AND PHENIX
BITTERS are held, is satisfactorily demon-
strated by the increasing demand for them in every
section of the Union, and by the voluntary
testimonials to their remarkable efficacy,
which are everywhere offered. It is not less
from a deeply gratifying confidence that they
are the means of extensive and inestimable
good among his afflicted fellow creatures, than
from interested considerations, that the prop-
rietor of these pre-eminent successful medicines
is desirous of keeping them constantly before
the public eye. The sale of every additional
box and bottle is a guarantee that some per-
sons will be relieved from a greater or less
degree of suffering, and be improved in general
health: for in no case of suffering from disease
can they be taken in vain. The proprietor has
never known or been informed of an instance in
which they have failed to do good.—In the
most obstinate cases of chronic disease, such as
chronic dyspepsia, torpid liver, rheumatism,
asthma, nervous and bilious head ache, cost-
iveness, piles, general debility, scrofulous
swellings and ulcers, scurvy, salt rheum, and
all other chronic affections of the organs and
membranes, they effect cures with a rapidity
and permanency which few persons would
theoretically believe, but to which thousands
have testified from happy experience. In colds
and coughs, which, if neglected, superinduce
the most fatal diseases of the lungs and indeed
the vicera in general, these medicines, if taken
but three or four days, never fail. Taken at
night, they so promote the insensible perspira-
tion, and so relieve the system of febrile action
and seculent obstructions, as to produce a
most delightful sense of convalescence in the
morning,—and though the usual symptoms of a
cold should partially return during the day, the
repetition of a suitable dose at the next hour
of bed time will almost invariably effect per-
manent relief, without further aid. Their
effect upon fevers of a more acute and violent
kind is not less sure and speedy if taken in
proportionable quantity,—and persons retiring
to bed with inflammatory symptoms of the
most alarming kind, will awake with the grati-
fying consciousness that the fierce enemy has
been overthrown, and can easily be subdued
in the same way, viz. visceral turgescence, though
long established, and visceral inflammations,
however critical, will yield—the former to
small and the latter to large doses of the LIFE
PILLS,—and so also hysterical affections, hy-
pochondriacism, restlessness, and very many
other varieties of the Neurotic class of dis-
eases, yield to the efficacy of the PHENIX
BITTERS.

The above Medicines are for Sale at the
Store of Mr. JOSEPH SPRATT, in Chatham,
who is appointed sole Agent for their disposal
in Miramichi.

PROSPECTUS OF A NEW WORK.

Now preparing for the Press and to be published
at Saint John and in London, to be entitled:

New-Brunswick:

With Notes for Emigrants

BY ABRAHAM GESNER, Esq. F.G.S. &c
Author of "Remarks on the Geology and Miner-
alogy of Nova-Scotia."

A WORK containing an account of the To-
pography, Climate, Soil and Natural Pro-
ductions of New Brunswick, form a desirable
object in Colonial literature. It is generally
acknowledged that the historical sketches of
of certain districts of the Province; which
have appeared from time to time, with all the
merits they possess, do not supply a full de-
scription of the whole country in its presen-
state, and the advantages it offers to a respect-
table class of emigrants from Great Britain.

The numerous able works that have been
written on Canada have been the means of
introducing the extensive improvements every-
where seen in that Province, compared with
which New Brunswick possess equal advan-
tage.—Aetha relief of the surplus population of
the Mother Country and its transference to the
unoccupied Lands of her Colonies is of national
importance, the chief object of the above
work is to supply a full and accurate account
of the Province with a view to its improve-
ment by British emigrants and British capital.

During the last fifteen years, the author has
explored every district of Nova Scotia and
New Brunswick. The last five years have
been devoted to making a Geological Survey
of the latter Province. His attention has also
been directed to Emigration; and from the
opportunities he has had for obtaining infor-
mation, his descriptions will be given from ac-
tual observation, and his remarks will be de-
rived from practical experience.

Besides advertising briefly to the History and
Aborigines of the Colony, the work will con-
tain an account of its present state, its climate,
topography, agriculture, geology and minerale-
gy, fisheries and other resources, trade, statis-
tics, and natural history, with remarks on
emigration, and information for emigrants.

The work will be neatly printed on about
four hundred pages of large duodecimo, and
will contain a new Map of the Province, with
views of the Grand Falls and other natural
scenery.

Subscription Lists will be opened in different
parts of the Provinces.—The price of each
copy to subscribers will be Ten Shillings.
