**Dr. Moffatt's Life Pills and
Phoenix Bitters!**

THE UNIVERSAL ESTIMATION in which the celebrated LIFE PILLS and PHENIX BITTERS are held is satisfactorily demonstrated by the increasing demand for them in every section of the Union, and by the voluntary testimonials to their remarkable efficacy, which are everywhere offered. It is not less from a deeply gratifying confidence that they are the means of extensive and inestimable good among his afflicted fellow creatures, than from interested considerations, that the proprietor of these pre-eminent successful medicines is desirous of keeping them constantly before the public eye. The sale of every additional box and bottle is a guarantee that some persons will be relieved from a greater or less degree of suffering, and be improved in general health; for in no case of suffering from disease can they be taken in vain. The proprietor has never known or been informed of an instance in which they have failed to do good.—In the most obstinate cases of chronic disease, such as chronic dyspepsia, torpid liver, rheumatism, asthma, nervous and bilious head ache, costiveness, piles, general debility, scrofulous swellings and ulcers, scorvy, salt rheum, and all other chronic affections of the organs and membranes, they effect cures with a rapidity and permanency which few persons would theoretically believe, but to which thousands have testified from happy experience. In colds and coughs, which, if neglected, superintend the most fatal diseases of the lungs and indeed the viscera in general, these medicines, if taken but three or four days, never fail. Taken at night, they so promote the insensible perspiration, and so relieve the system of febrile action and feculent obstructions, as to produce a most delightful sense of convalescence in the morning,—and though the usual symptoms of a cold should partially return during the day, the repetition of a suitable dose at the next hour of bed time will almost invariably effect permanent relief, without further aid. Their effect upon fevers of a more acute and violent kind is not less sure and speedy if taken in proportionable quantity,—and persons retiring to bed with inflammatory symptoms of the most alarming kind, will awake with the gratifying consciousness that the fierce enemy has been overthrown, and can easily be subdued. In the same way, visceral turgescence, though long established, and visceral inflammations, however critical, will yield—the former to small and the latter to large doses of the LIFE PILLS,—and so also hysterical affections, hypochondriacism, restlessness, and very many other varieties of the Neurotic class of diseases, yield to the efficacy of the PHENIX BITTERS.

The above Medicines are for Sale at the Store of Mr. JOSEPH SPRATT, in Chatham, who is appointed sole Agent for their disposal in Miramichi.

**PROSPECTUS OF A NEW WORK.
Now preparing for the Press and to be published
at Saint John and in London, to be entitled:
New-Brunswick:
With Notes for Emigrants
BY ABRAHAM GESNER, Esq. F.G.S. &c.
Author of "Remarks on the Geology and Mineralogy of Nova Scotia."**

A WORK containing an account of the Topography, Climate, Soil and Natural Productions of New Brunswick, form a desirable object in Colonial literature. It is generally acknowledged that the historical sketches of certain districts of the Province; which have appeared from time to time, with all the merits they possess, do not supply a full description of the whole country in its present state, and the advantages it offers to a respectable class of emigrants from Great Britain.

The numerous able works that have been written on Canada have been the means of introducing the extensive improvements every where seen in that Province, compared with which New Brunswick possess equal advantage—As the relief of the surplus population of the Mother Country and its transmigration to the unoccupied Lands of her Colonies is of national importance, the chief object of the above work is to supply a full and accurate account of the Province with a view to its improvement by British emigrants and British capital.

During the last fifteen years, the author has explored every district of Nova Scotia and New Brunswick. The last five years have been devoted to making a Geological Survey of the latter Province. His attention has also been directed to Emigration; and from the opportunities he has had for obtaining information, his descriptions will be given from actual observation, and his remarks will be derived from practical experience.

Besides advertising briefly to the History and Aborigines of the Colony, the work will contain an account of its present state, its climate, topography, agriculture, geology and mineralogy, fisheries and other resources, trade, statistics, and natural history, with remarks on emigration, and information for emigrants.

The work will be neatly printed on about four hundred pages of large duodecimo, and will contain a new Map of the Province, with views of the Grand Falls and other natural scenery.

Subscription Lists will be opened in different parts of the Provinces.—The price of each copy to subscribers will be Ten Shillings.
