Fire in Cumberland.—Range of Steam Mills burnt to the ground.—The Steam Mills belonging to the firm of Messrs A. T. Seaman & Co., Minudie, Cumberland, were totally destroyed by fire on the morning of Saturday, the 30th of May. The alarm was first given from a wood-boat on the river, at about two o'clock A. M., when the flames were seen bursting from the windows of the upper story, and in three hours the whole establishment, consisting of a grist mill and saw mill, with a quantity logs, deals, flour, grain, &c., were burnt to the ground. The loss sustained is £4000. We regret to add that the property was not insured. These Mills had only recently been erected at a very heavy expense, and their destination will be felt as a serious public loss by the inhabitants of this part of Cumberland. We understand that the enterprising proprietors intend to proceed immediately with the erection of a Saw Mill on the site of the former building. There was no fire in the mill on the afternoon of Friday, and the origin of this unfortunate disaster has not as yet been discovered.

Horrible Murder.—A horrible murder was committed at Windsor on Sunday last, by a person named Joseph Bennett, who stabbed Charles Williams with a Butcher's knife, which caused his death. The murderer immediately absconded. Bennett is described as about 22 years of age, of Indian extraction and part Negro, and calls himself a native of New York. He had on when he left a brown frock Coat, Cloth Cap and homespun Trousers. —*Chronicle.*

GOODYEAR'S METALLIC GUM Elastic Machine Belting.

The Subscribers having been appointed Agents for the sale of the above article, and all other articles manufactured at the same establishment, beg to draw the attention of Mill Owners and others to the peculiar qualities of the above article.

- 1st. Perfect equality of width and thickness which it will retain
- 2nd. No degree of heat under 250 Fahrenheit injures it, and it remains flexible in any degree of cold.
- 3rd. Essential and common Oil, Turpentine and other solvents (some of which at once will destroy leather) produces no effect on it.
- 4th. It is of GREAT STRENGTH and DURABILITY, does not slip on the pulleys, consequently a gain of power is obtained, and when adjusted to machinery, DOES NOT REQUIRE ALTERATIONS, as is the case with Leather.
- 5th. It is particularly adapted to Machine Shops, Furnaces, &c. where coal, gas, and steam prove so injurious to leather.
- 6th. It is confidently believed that electricity will in a great measure be avoided by the use of this Belting, it being a non-conductor.

Every information given on application to the subscribers, where samples of the above mentioned article can be seen, as also WATER PROOF COATS, and ELASTIC PAPER BANDS, an excellent and convenient article for filing papers.
