SEED POTATOES.—It has been hinted to us that there are fears of a scarcity of Potato Seed for the approaching season. We would recommend to all persons using them, to cut out the eyes, and throw a little slacked lime over them.

We wish our Agricultural friends to understand, that Produce will be taken at the market price, in exchange for the Gleaner.

YESTERDAY'S MAIL!

The following extracts are taken from papers received by the Mail yesterday afternoon.

UNITED STATES AND MEXICO.—Late papers put us in possession of the following additional particulars relating to the affairs of Mexico.

THE REVOLUTION IN MEXICO.—Mexican Accounts of Gen Taylor's Position, &c.—The schr. Home, from Tampico has arrived at New Orleans, bringing accounts of a revolution in Mexico with the expulsion of Gomez Farias from power and its installation of Gen. Salas; also Mexican reports from the seat of war.

Gen. Taylor, by one report, is said to have fallen back on Saltillo and Monterey, without a general action; and by another, it is said that he had a battle at night with the Mexicans, killing about 400 of them, and losing none.

The Mexican papers say that Santa Anna had cut off his retreat, by interposing the forces of Minon and Torrejon.

Mr Kendall, one of the editors of the New-Orleans Picayune, writes from Tampico, under date of March 7th—

The report of the revolution in Mexico is confirmed—the National Guards joined the clergy. Salas is President—Santa Anna at the head of the army. Gen. Taylor has had no fight, but has fallen back upon Saltillo and Monterey.

Requisition Refused.—The Governor of Louisiana has concluded not to call out any troops upon the requisition of Col. Curtis.

PAINFUL INTELLIGENCE FROM FORT LEAVENWORTH.—By the Western Mail we have painful intelligence from a small party of teamsters from Santa Fe, sixty in number, who arrived at Fort Leavenworth in a most distressing condition, being almost starved.

Six of their companions were frozen to death on the road.

STORM.—On the 25th ult. a severe storm of snow, rain and wind was experienced at Portland, Boston, New York, Philadelphia, &c.,—In New York several of the streets were flooded with water, and some of them were perfectly impassable. In New Bedford several chimneys were blown down. The damage in Boston was trifling. In the vicinity of Portland the water rose very high, and fears were entertained of a freshet. The telegraph wire at the western railroad depot in Charleston was blown down where it crossed the tract, and the wire caught on the engine of a freight train, pulling over one of the posts, and sweeping from the train three brakemen. One was killed and the other had his leg broken; the other was not injured.

The Sound steamers were entirely disarranged by the storm. The Boston Daily Advertiser of Tuesday says—The storm of Friday night and Saturday extended as far south as our present advices reach. At Baltimore it was quite violent and accompanied by severe cold.

At Philadelphia it commenced on Friday morning with thunder and lightning, betokening summer weather, afterwards degenerated into a regular March rain, and in the evening the wind changed to the north west. A fierce gale was blowing all the while, and it is feared has caused many disasters on the coast. Already we have the report that the ship Monongahela, for Liverpool, the ship John Marshall from Liverpool, the brig Paul T. Jones from Charleston, and another brig, name unknown, have been blown ashore near Chester.

At New York an unfinished block of three three story brick buildings at the corner of the 18th street and 8th avenue, was blown down, and several houses in the upper part of the city were unroofed.—The shipping in the East river sustained no damage. In the North river, several large vessels including the frigate Macedonian, broke from their moorings, but were secured with little damage. Several small vessels were sunk along the piers and wharves; and two brigs and five schooners went ashore near Sandy Hook, some of them with masts cut away.

PROVINCIAL LEGISLATURE.—The following is copied from the Reporter of Wednesday last.

Business, which in the early part of the Session "Trail'd its slow length along" as if unwilling to make an exhibition, and having afterwards got into a jog-trot, and subsequently into a canter, is now sweeping away at Railway speed, and will soon "be its own death" in the House; and probably in ten days to come the Session of 1836-7, will be classed with the things which were. Mr Partelow excels himself in the development of grants; and the Speaker when in the Chair, does not permit a moment to remain unoccupied. On Wednesday the discussion of a Bill on Mill Reserves elicited some facts which may not be quite familiarly known in the Country; we think it was Mr Carman who remarked that about 20,000 square miles were occupied by two great firms in the northern part of the Province as Timber births; for which they paid about £1100. The statement caused some remarks at the time, and may no doubt lead to future enquiry.

Mr. Brown's Education Bill came up in the afternoon; and after a good deal of hard sparring, four sections of it, somewhat altered from the original were passed. On Thursday morning Mr. Boyd read the Report of the Light House Committee; and shortly after, Dr Wilson moved for leave to place on the Supply Book a grant of £50 for each of the Reporters which motion was negatived by a majority of one; the three members for York, Messrs Bailie, Taylor, and Wilnot voting against it. Mr. Fisher was absent.

A short debate followed on a section in the Report of the committee on Trade relative to a sum of £400, which had once been granted by the House of Assembly for the purpose of erecting a fire-proof addition to the Lunatic Asylum, which sum it appears was not laid out, and has in some way been lost sight of. The motion brought by Mr Partelow was for its development.

It will be seen by our extracts, that the House has passed a Bill to incorporate a Company to construct a Railway from Shediac to the Bay of Fundy.

It is reported that the Legislature will rise about the 17th inst.

Marriages.
