

hope the offender may be found out, and meet the reward of his doings. We regret to have to record such disgraceful transactions; but our duty compels us not to let such things pass unheeded."

The Court for the trial of the Carlton county Rioters was to open on Wednesday last. Judge Parker presides.

CROPS IN THE BAY CHALEUR.—A correspondent at Bathurst, in a letter dated the 9th instant, gives us an account of the crops in the District of Gaspé, as well as a brief sketch of the state of Agricultural affairs in that remote section of country, which we annex:—

"Having just returned from a short excursion along the Gaspé shore, some remarks on the state of the crops, &c., in that quarter, may not be uninteresting to your readers.

"I am sorry I cannot say much in favor of our neighbours, relative to their general system of farming. Shallow ploughing, poor, worn out land, from continual cropping, and absence of manure, foul crops, &c. &c., are sure indications of bad farming; particularly when the experienced observer is satisfied that the soil itself is good, and would yield an abundant return under proper management.

"The Hay crop has been an abundant one, and Wheat, Barley and Oats look well generally; but we noticed several fields of the former slightly attacked by that destructive insect the weevil. We saw several pieces of wheat which an English farmer would not be ashamed of. The Potato, in the early part of the season, had every appearance of an abundant crop; but within the last ten days, the disease has manifested itself in many hitherto luxuriant looking crops. We regret to observe that Turnips are not generally cultivated; they should be the *sheet anchor* of every farmer, for the winter particularly, in such a country as this. The few pieces we saw were remarkably fine. In a future number we purpose returning to the subject, and extending our remarks on the soil, climate, husbandry, &c., generally."

MAIL ROBBERY.—Several sums of money having been recently extracted from the Mail Bags, while passing between the Post Office of Quebec and the North side of the Bay de Chaleur, we publish below the numbers and description of a few of the Notes so extracted. Persons who may have any of these notes in their possession, or who can furnish any information regarding them, will be doing the public a service by communicating the same to the Postmaster of Chatham or Dalhousie, in order that the guilty parties may, if possible, be traced out. This is both their interest and duty to do without delay:—

CHATHAM STEAM FERRY BOAT.—This Boat was launched on the morning of Thursday last. Part of her machinery has been obtained from Fredericton, and the remainder is expected in a few days. Persons are now employed in clearing away the bank of the piece of land given by the Chatham Joint Stock Company as a Public Landing, preparatory to there being erected thereon a Ship for the convenience of receiving and discharging freight and passengers by the Steamer. In the course of a month we are in hopes to see the boat in full operation. We congratulate the public on the spirited manner in which the whole business has been carried out, and anticipate from the enterprise much accommodation to the public, and permanent advantage to our thriving town.

INQUEST.—An inquest was held before Martin Cranney, Esq. Coroner, at Napan Bay, on Thursday last, on view of the body of a man (apparently a sailor) who was found floating in the water. His hands and feet were tied with spun yarn, a circumstance which led the Jury to imagine that violence must have been used in his death. Verdict, Found drowned—the Jury being of opinion, from the fact of the hands and feet of the deceased being tied, shoes on his feet, and a black silk neckerchief on his neck—that foul

play had been used or practised in the death of the deceased.

Since the above was put in type, the Coroner informs us that he has obtained the following information respecting the deceased. He was named John Brecon, a native of Stockholm, aged 31 years, and could speak English fairly. He was a seaman on board the ship Warren Hastens, from which vessel he deserted; and joined the bark Avon, of Windsor, Nova Scotia, which vessel sailed for Liverpool about a fortnight since. He also informed us, that he purposes writing to the Collector of Liverpool, detailing the circumstance, with a request that he will institute an enquiry into the matter when the Avon reaches that port.

TO CORRESPONDENTS.—"One of the Public" has been received. We are willing to expose the unjust conduct of public functionaries, and to arraign them at the bar of public opinion, but we cannot prefer a charge of peculation, or of wilful and wasteful expenditure of public money against a Road Commissioner or of any other public officer, upon the mere assertion of an anonymous writer. If what is written be correct, the matter ought to be exposed; and we shall not hesitate to make the matter public, if the writer will give us ample proof that he will substantiate his charges if legally called upon to do so—Until this be done we decline interfering in the matter.

QUARANTINE, MIDDLE ISLAND.—All the Passengers on this Island, with the exception of six, will be discharged today, as well as the nurse and guard. Two of the latter, however, will be retained for two or three days to collect the materials, and remove them to a place of safety. We have not been able to ascertain what the Sessions purpose doing with the six persons alluded to above, who, we understand, are labouring under dysentery.

RAILROAD SURVEY.—Capt. Henderson and a party of the men engaged on the survey of the line of Railroad to connect Halifax with Quebec, arrived in Chatham from the Northward, one day last week. They have dispersed—one portion having proceeded to Boiestown, another to the head waters of the Richibucto, and a third to the Bend of Petieodiac. We understand the report given of their progress in the Counties of Gloucester, Restigouche, and the Canada side of the Bay de Chaleur, is very satisfactory.

MELANCHOLY OCCURENCE.—A young boy, about 8 years of age, son of Mr. William Currie, came to a most distressing and untimely death, by partaking of some spirits, which had been foolishly given to him by a grown up lad, at the launch of the steam ferry boat on Thursday morning last. Medical assistance was procured, and every thing done for his relief, but they proved unavailing—he expired on Friday afternoon.

We understand that liquor was also given to two young boys at the launch of the Sailor Prince, a few weeks since, both of whom narrowly escaped similar fates. We sincerely trust that in future, no spirituous liquors will be allowed on such occasions. It is anything but creditable to the parties engaged, that a launch cannot take place early in the morning, without the rum bottle being brought into requisition.

PLOUGHING MATCH.—Our Agricultural readers will perceive by an advertisement, that the Annual Ploughing Match is to come off on the *Seventh October* next.

To Let, TWO ROOMS in the large house owned and occupied by the subscriber, situate in the front street in Chatham, with an entrance from the street. Enquire of
WILLIAM LITTLE.

Twenty-five Thousand Bottles sold the last year.

RELIEF WARRANTED.

Great New England Remedy for Coughs, Colds, and all Lung Complaints.

Hunter's celebrated Pulmonary Balsam or Cough Syrup.

This pleasant and agreeable Syrup is now being sold in vast quantities, for the very good reason that almost universal relief has been found by the thousands who have made use of it for coughs, colds, and lung complaints, within the past year.

It comes from a quarter where cases of consumption have been most frequent, and where it has heretofore been most fatal in its termination, owing to an ever changing climate. It is a scientific preparation, having been got up by one of the most skillful and successful physicians in New England.

Hunter's Pulmonary Balsam

Is a combination of ten distinct articles of medicine, each of which taken separately would be of service to a person afflicted with a cough or lung complaint. It is comparatively a new article, although it has been used for years in an extensive practice, with unparalleled success. Yet it is not more than one year since it has been put up in its present form for the purpose of circulating it. During this short time, an almost incredible amount of it has been sold, whilst little effort has been made to increase its sale. It has depended upon its own merits, and thousands have been relieved and cured.

At one establishment in Maine, 5 thousand bottles have been sold at retail within the last twelve months. More than fifty individuals who were pronounced decided and marked cases of consumption, in the city of Bangor and vicinity, have been entirely cured by the use of Hunter's Balsam. Frequent cases have occurred where strangers journeying for health, and passing where the article was kept, have been induced by the recommendations of others to purchase a bottle, and after using it, have sent from two to three hundred miles for it.

Hunter's Pulmonary Balsam is an agreeable syrup, and is warranted an effective remedy for coughs, hoarseness, colds, pain in the breast, influenza, hard breathing, liver and lung complaints, difficult expectoration. For adults and children in cold climates and warm. It has remained to a late day to discover an article so admirably adapted to these complaints, so powerful and effectual, and yet so perfectly innocent and mild. A single trial of it will do more to convince all of its merits than all they can see or hear on the subject. It is quite certain that no injury has ever been known to arise from its free use. An uncommon fact is, that this remedy is a syrup, palatable and pleasant to the taste. Children take it with the greatest readiness.

600,000 Boxes sold the past year.

Indian Dyspepsia Pills,

For cure of costiveness, acidity of the stomach, bilious habits, headache, dizziness, heart burning, pain in the side, lung and liver complaints.

Dyspepsia and Indigestion,

With costiveness, acidity of the stomach, heart burnings, bilious complaints, producing headache, pain in the side, loss of appetite, and general debility, can be remedied, removed, and entirely cured by the use of the Indian Dyspepsia pills. These pills have effected the most astonishing cures in hundreds of cases of the above complaints, and are an invaluable remedy, in an especial manner, for Dyspepsia. They are a mild and gentle Cathartic, operating mostly upon the blood, cleansing and purifying the same, and causing the digestive organs to perform their appropriate organs with regularity.

Costiveness.

Habitual costiveness is, if not removed in time, a cause of more than half of the disorders and pains to which humanity is subject. The medicines too generally had recourse to, do more harm than good, as they weaken the peristaltic action of the bowels, and thus aggravate instead of removing the complaint.

Also in all bilious diseases, attended with pain in the side and right shoulder blade, with a dull, sallow countenance. In all Diarrhoeas, ague and fever, bilious fever and sick head ache, they are an invaluable remedy.

For purifying the blood we do not believe these pills have their equal in the world.

30,000 Thousand bottles sold the past year.

Rest and Comfort to the Suffering.
