BRITISH NORTH AMERICAN TELEGRAPH Association .- We are indebted to the Quebec papers for a copy of the Report of this Society. The opposition which this Company has met with in their endeavors to establish a direct line of communication through this Province, pourtrays a narrow-mindedness on the part of men of influence in New Brunswick, which we are inclined to believe, will not be found in any other portion of the habitable globe :-

A Special General Meeting was held at the Parliament Buildings yesterday afternoon, Sir Henry Caldwell, Bart, in the chair. After reading the advertisement, dated 10th July, convening the meeting, the Chairman of the Board of Directors read the following

REPORT:

REFORT: The Directors regret to state that their en-deavours to effect a junction of this line with that of the New Brunswick Telegraph Com-pany, have been unsuccessful, the latter Com-pany being unable to proceed further north than Fredericton; and the Provincial Govern-ment of New Brunswick declining to enter-tion our petition for a grant to assist this As-sociation to construct the line from Frederic-to the boundary of Canada, a distance of to to the boundary of Canada, a distance of about 180 miles; and they have to regret that the Government of Canada do not seem as yet fally to have appreciated the importance of this enterprise, which would ensure an un-interprited telegraphic communication thro? "In this enterprise, which would ensure an un-interrupted telegraphic communication thro' British territory; thus rendering all the Pro-vinces independent of the American lines; applications having been made to His Excel-lency, through the Civil Secretary, for assis-tance to form the desired junction with the New Brunswick Company, which have re-mained unacknowledged and unanswered. Under these circumstances, the Directors, in applying to Parliament for a continuance

Under these circumstances, the Directors, in applying to Parliament for a continuance of the Act of Incorporation, which expired this year, have petitioned for power to sell or lease the work, and the Bill to this effect was read in the Lower House on the 24th inst., and your Directors are sanguine will pass in-

The ad in the Lower House on the 24th inst., and your Directors are sanguine will pass in-to a law without opposition. Your Directors, with a view of ascertaining the actual condition of the line, and also of neventing plunder and destruction, engaged the services of a Canadian gentleman, resi-ding at St. Thomas, who, in the month of April last, proceeded from Point Levy to the extreme eastern terminus, and has furnished a statement with a great minuteness of defail, statement with a great minuteness of defail, proving the faithful manner in which the duty een performed.

The Directors have much pleasure in staworked, less injury has been sustained than

"light have been apprehended. The Directors have to acknowledge with thankfulness, the great assistance their Sur-veyor devices from the circular retter of His Grace the Roman Catholic Archbishop, to the Reverend the Clergy, requesting them to admonitor to the the Roman Catholic Archbishop, to admonish their parishioners to respect the property of the Association, which, with one ortwo exceptions, has been cheerfully res-londed to by the Clergy. All which is respectfully submitted.

EDWARD BOXER, Chairman. HENRY W. WELCH, Secretary. Quebec, July 25, 1850.

Report be deferred to an adjourned meeting, to be held in the same place, on Friday, 10th August August.

UNITED STATES .- We are indebied :0 the New Brunswicker of Tuesday last, for the following important piece of news from this quarter :-

Important from Washington-Defeat of the compromise Bill !- Accounts from Washing-

HALIFAX. - The Novascotian throws out the following valuable hints to reme" dy the complaints which are constantly being made of the detention of vessels when approaching that noble harbor, from Fog. The plan is a very simple one, and we have no doubt will prove highly serviceable. As it will not be attended with much expense, it should be tested :--

Now what we propose is, that the offing— say five or six miles S. E. of Chebucto Head —be buoyed off, each buoy a mile distant from the other; the outer one to be of a pe-culiar structure with a good bell attached, so that the action of the sea may have the effect of heading the house constantly in maximum so of keeping the buoy constantly in motion, so that the bell would always be sounding. On this as well as the remaining buoys, we would suggest that large vanes of copper be placed, on both sides of which should be inscribed in legible characters the course and distance to Conducts Bacd and into Heliforn behavior. Chebucto Head and into Halifax harbor. We humbly conceive that if such a measure was adopted it would materially serve the interests of commerce, prove a great convenience to her Majesty's ships visiting this port; while last, not least, its adoption would hin-der the possibility of delay in what is now of such vast importance—Ocean Steam Navigation.

The Novascotian in speaking of the Great Meeting recently held in Portland, draws the following cheering conclusions. We nope they will be realised, although we in this distant region will enjoy but little of the benefits or advantages :-

Are we to have the Railway ?—The 'big talk' now being held at Portland, naturally enough engrosses the attention of the people of the British Provinces. Everybody is on the tip-toe of expectation, as to the results of this most important conference. Even the most unbelieving are having their attention arrest-ed; while those who are accustomed to sneer at progress, have changed their former mock-ing tone, as they, in common with the san-guine, ask in earnest tones of their neigh-bors—are we to have the Railway?

bors—are we to have the Railway? The answer to this interrogatory is, in our estimation, the most simple imaginable, and is comprised in the short monysyllable—YES! Are we asked for reasons? Here they are. In the first place, we consider the Railway to Quebec as effectually shelved as if it had never been thought of. The British Govern-ment will not build it; the Colonies have no means to do so; and if they had—they hav it buck enough aver to have so given is a since it on the buck enough of they had they have to be a set to have a set to be a set to be a set to be a set to be a set to a set to be a set to have a set to be a set to a set to be a set to the set to be a set to a set to be a set to a set to be a detaking. In the meantime, Brother Jona-than, foreseeing the progress of events, and determined to take time by the forelock, has cast his eye on the map, and discovered that cast his eye on the map, and discovered that we have an excellent stand for business; that Nova Scotia is in fact a corner shop, with all the facilities to further his designs in the im-provement of Ocean Steam Navigation, and shortening the distance between the old world and the new. Having discovered this impor-tant fact, he nas acted like a sensible man, and accordingly invites the Colonists over to Portland, to get their several opinions, and tender his advice in return. The words of comfort and consolation will be drank in by willing hearers.

comfort and consolation will be drank in by willing hearers. Now, as we believe most implicitly that the line of Railway connecting Portland with Ha-lifax is as good as begun, it is of importance to know whether our Yankee triends have the means to accomplish the work. We presume it will be no more than fair to estimate what can be done, by what has already been ac-complished. In the first place then, the Americans have increased their original ter-ritory of 13 States, with an insignificant area, to 31, comprising nearly three and a half mil-lions of square miles. From a population of 2 or 3,000,000 in 1800, they have grown to be a mighty nation of upwards of 23,000,000; and the probability is, that many now living, will see the United States number 150,000,000 of people. Just 30 years ago, the Americans will see the United States number 100,000,000 of people. Just 30 years ago, the Americans launched two packet ships of 450 tons, to sail regularly between New York and Liverpool. The knowing ones laughed at the project, just as the same wise-acres had scoffed at poor Ful-ton, but they have now nearly 200 regular packets sailing to England-many of them 2,000 tons burthen. The exports to England have risen within a very few years from \$25,-000,000 to \$75,000.000. In 1828 the number of Emigrants at New York was only 25,581; last year the tide of human beings had swollen to 222,000. The number of emigrants to the United States during the present year. will probably not be less than 400,000. In 1833 the several States had but 430 miles of Railway among them; the number of miles at present in ac-tual operation is 7465. In 1848 even the Kingdom had no more than 5127 miles of miles of Railway in working order. In the short period intervening between 1847 and 1850, the imports into New York have in-creased from \$82,593,625 to \$113 752.618, in the last named year. The number of steam vessels owned in the British Islands in 1849, was ascertained to be 1145. We know that comparisons are odious; but from 1823 to The number of emigrants to the United hood of the report. comparisons are odious; but from 1823 to 1849, there were 2505 steam vessels launched at the several ports and on the rivers of the United States. One of these, the New World, is of the extraordinary length of 365 feet. The above are our reasons for thinking the Halifax and Portland Railway will be speedi-

ly begun and completed. It is the direct in-terest of the Americans to consummate the undertaking, and those who know Jonathan are quite aware that he is not the one to stick at trifles when his own iuterests are concerned.

ST. JOHN. - The Supreme Court commenced its sittings in this city on Tuesday last. Judge Street, who presides, it appears will have his patience pretty well tried, as the papers report that there are fifty-five civil causes entered for trial. When will our population learn wisdom ?

CANADA. - The Quebec Gazette of July 29, reports that the difference between the Legislative Assembly and the Press yet remains unsettled. The Press, we are informed by the Pilot's Toronto correspondent, will not report unless they are guaranteed that they will not be interrupted in the execution of their duties in the House ; the House will not accede to their demand, and they have taken down the divisions which formed the Reporter's box and the desk. In the meantime the country is deriving benefit from the circumstanec-so much business, according to the same writer, not having been done in the space of a fortnight before, as had been accomplished within the three first days after the occurrence of the fracas.

In the Assembly on the 23rd July, on the motion of Mr Hincks, it was resolved in Committee, that it is expedient for the Governor General to cause Provincial Coins to be struck-to pass at the rate of 5s, 2s 6d, 1s 3d, and gold coins of £1 and 10s currency, and a Bill thereon was read a first time.

It was currently reported at Montreal, that the Hon. Mr Merritt had retired from the Ministry.

The Agricultural Journal closes its report for July as follows : ---

At the present moment with, we hope, very little injury done to the wheat crop by the fly, there is every prospect that the crops will be a fair average in proportion as skill and industry have been employed in their cul-tivation and management. We cannot ex-pect that crops will be very heavy and good if the farmer has not done all that was possi-sible for him to do to make them so. Land, however good and easens how so for the solution of the solution. sible for him to do to make them so. Land, however good, and seasons, however favora-ble, will not produce good crops, if the lands are not properly cultivated for them. It is the farmer's duty to do all that he can to be prepared for all contingencies for favorable as well as unfavorable seasons. It is by the ex-ercise of skill and industry that good crops may be raised, even in seasons that are not the most favorable for them, and this is one of the many advantagos of skill and industry.

The papers furnish the following melancholy disaster :-

Erie, July 31 .- This morning while off Bar Lite, July 31.—1 his morning while off Bar-celona on her downward passage the steamer America collapsed her steam chest, instantly killing one of the engineers and two others, as well as dreadfully scalding several others—25 of them mortally. The assistant engineer's body was found under the cranks. The decks of the life fact was large holds. of the ill-fated vessel are badly torn up, and otherwise injured. She was towed into Eric by the Alabama. As near as can be ascer-tained 27 were scalded, of whom 9 are dead, 6 to 8 perhaps mortally wounded.

RUMOUR .- It has been reported in Chatham for some days, that one of the members returned for Restigouche, is to be alled to the Legislative Council, and that a rejected member for a neighboring county, is to be placed in nomination as a candidate to fill the vacancy thus occasioned. We cannot helieve that the freeholders of Restigouche will submit to be thus dictated to ; neither will we believe that the party alluded to, will submit to such a mean artifice to obtain his lost seat in the Assembly. Time, however, will prove the truth or false-

ened, and finished with great care. She re-flects great credit on Mr. Hall, the builder. Also, on the 10th, at Mudisco, near Bath-urst, from the building yard of John Woolner, Esq. a handsome Brigantine of upwards of 124 tons, new measurement. Robert Gordon, Esq. the Coroner of this County, held an Inquest on the 7th inst., on the body of a man found on the shore near Belledoune, supposed to be drowned from a boat, off Heron Island, early in the summer.

COUNTY RESTIGOUCHE .- A Correspondent writing to us from Dalhousie says :

On Wednesday morning, the 7th inst. there was Launched from the Building Yard of Messrs. Arthur Ritchie & Co. at Campbell-ton, a copper-fastened ship, of 774 tons regis-ter, named the Try. She started from the ways, and glided into her destined element in good style; and within half an hour was safe-ly moored alongside of Messrs. Ritchies wharf, where she now lies, a beautiful model, and being built of excellent materials, and in the best style of workmanship, must tend to maintain the character of her bu!lder.

Marriages.

At Dunlop, County of Gloucester, on the 7th ult., by the Rev. George McDonnell, Mr Archibald Alexander, to Margaret, daughter of Mr Robert Moody, all of the Pa-rish of Beresford rish of Beresford.

Deaths.

At Chatham, on Tuesday, 6th inst., IsA-ELLA, infant daughter of Mr Thomas Phil-

At Nelson, on the 15th ult., Mrs LESLIE, At Nelson, on the 15th ult., Mrs LESLIE, Senior, aged 64 years, much regretted, by a large circle of friends, as the painful and af-fecting bereavencent, of a beloved wife, and an exemplary mother in Israel.

DF A certain officer, some years ago, bor-rowed of a Lieutenant in the 1st Battalion Northumberland Militia, a new Sword, Scab-bard, and Bell, which have not found their way had way back.

way back. Now therefore be it known, that should the said certain officer condescend to walk back the long-lost articles, his cordescension shall be esteemed by the Lieutenant, as an act of moral, as well as military courage worthy of imita-tion; but should the certain officer persist in sharking it much longer, he will find that there are more ways than one of measuring swords even with redoubtables of his calibre. 9th August, 1850.

THE SUBSCRIBER

Returns his best thanks for the patronage he has received since he commenced business; and bege to state that he has removed his Shop to the corner house lately occupied by Mr Andrew Wyse, opposite the Drug Store of Messrs. K. B. & W. Forbes, where all work in his line will be thankfully received, and punctually attended to.

JOHN DUFF. Chatham, July 2, 1850.

MIRAMICHI FOUNDRY.

The Sabscriber respectfully informs the Public, that as the MOULDING SHOP belonging to the Establishment, was saved from the late Fire, he is enabled to farnish CASTINGS in BRASS and IRON as usual. He also begs to state that in a short time he will have the FITTING-UP SHOP in complete operation.

HUGH BAIN. Chatham, August 5, 1850. N. B. Sove Pipe, Pans and Tinware made to order.

Just Received,

AT THE VICTORIA HOUSE. The Subscribers respectfully inform the public that they have just received from St. John, a LOT of

New and Fashionable Goods, Suitable for the season, which they offer for sale at their usual low prices, for Cash only. E. DALEY & SON. Chatham, August 5, 1850.

informs us of the destruction of the Compromise Bill in the Senate, about which so much exciting discussion has prevailed hroughout the country. This locks bad, and the stability of the Union is thus rendered more precarious than ever. The Bill was so mutilated in the Senate as to leave little or bothing of its original provisions. Califoror hothing of its original provisions. Califor-tig has been refused admission into the Union, and the methods of the training the trai has been refused admission into the only only thing accomplished has been the organisation of the wilderness territory of Utah, having her boundaries, fixed at 37 deg., with having her boundaries fixed at 37 deg., with ho recognition of slavery. This is all that the Compromise Bill, which excited such high hopes, has effected. The moderate jour-nals are deploying the result. The New York poly are deploying the result. York Express remarks, that 'the agitators, aulifiers, and abolitionists have cause for re-joicing', The abolitionists have cause for rejoicing.' The Journal of Commerce declares Joicing.' The Journal of Commerce declares that the North is in ignorance of the dan-ger that awaits the Union, and that he must be an incarnate Fiend who desires a service war at the South.' The nation appears sur-rounded with nerils. and it is candidly conrounded with perils, and it is candidly con-ferred to perpetuity of the Union seemed so much endangered as at present.

COUNTY GLOUCESTER. - A Correspondent at Bathurst has furnished us with the following local items of news. All such attentions will be thankfully received, and postage freely paid.

Launched from the building yard of James Launched from the building yard of James Wolhaupter, Esq at Bathurst, on the 8th inst., a superior bargue of 400 tons borthen, named the Catherine. This vessel is built of Juniper, of first-rate quality, is copper fast.

WANTED,
