

hat behind. This the Orangemen cut to pieces with their swords.

The police having at length checked the tumult, by apprehending its more violent promoters, the procession, which, in the meantime, had mustered about 2000 men, moved on down London road, through Lime street, Ranelagh street, Church street, and South John street, to the Custom-house, whence, after a short delay, it proceeded up Duke street and Great George street, to Mill street and Park-road, accompanied by a noisy and excited mob. No other collision, however, occurred until the procession, via Parliament street and Rodney street, had reached St. Anne street, when a slight skirmish took place, followed by another affray, in which one man was seriously hurt, at the corner of Fox street. But the most serious rows occurred when the various lodges had dispersed, to proceed to their respective club-houses. The shopkeepers in London road, Byrom street, and other streets, were much alarmed, and lest the disturbances should be repeated, and nearly all the shops were closed during the greater portion of the day. A somewhat severe conflict took place in Pitt street, between a party of lumpers and the Orangemen. The former were the assailants, and several of them were captured. Scotland road was in a most excited state during the whole day, and several persons who wore articles of dress approaching the orange colour were ill-used and insulted.

A stubborn fight took place about half past three between a large body of laborers from the north docks and a lodge which was proceeding to the Wheatsheaf to dine. Pistols were fired in this affray, John Malley, one of the ringleaders of the mob, being shot in the thigh, and Richard Brown, a youth who was sitting in an upper room of the Black Bull, near the window, being lacerated slightly in the arm.

The town was alive with apprehension all day, and the most exaggerated rumors were afloat as to the loss of life which these senseless but wicked frays had caused. Though some of the injuries are very severe, we are glad to say none of them are likely to prove fatal. It is to be regretted that immediately after the affray in London road, the police authorities did not put a stop to the procession altogether.

Masonic Notice.

By Virtue of the Powers vested in me, and holding Commission from GEORGE ARNOTT WALKER ARNOTT, Esquire, of Arlary, LL. D., Depute First Grand Principal Z of the Supreme Grand Royal Arch Chapter of Scotland, I hereby authorize and command all Chapters within the confines of Nova Scotia, New Brunswick, and Prince Edward Island, whose Officers have not as yet been installed, to hold themselves in readiness for INSTALLATION by the Autumnal Equinox, or 21st September, in order to make due returns of the same to the Grand Royal Arch Chapter of Scotland.

DAVID PEARE HORNE,
Provincial Principal Z.

Patent Artificial Slate,

AND
Unchangeable Metallic Paints;
PROOF AGAINST FIRE AND WATER!

Manufactured by the Patentee in Colchester, Nova Scotia.

The Artificial Slate is the Product of a Mixture of Mineral Substances known to be the best non-conductors of heat as well as the most indestructible; the chemical affinity of which converts the surfaces of materials covered, into a Coating of Actual Slate—proof against Fire and Water. Thus are the laws of nature made to accomplish results as surprising as they are useful, by rendering wooden fabrics as durable as brick or stone, and less impervious to moisture, and consequently preventing decay and destruction from corroding influences hitherto supposed unattainable.

The principal ingredients are Allumina, Silicia and the Oxides of Iron. The adhesive quality of the latter not only binds and attracts the particles together, but the substance covered also. The longer exposed to the weather the more powerful the attraction, and consequently the harder the slate. As various shades of color are obtained, brick buildings may be made impervious to moisture, and the fashionable colours of either Freestone or Granite. The oil must be evaporated by the action of the weather before it is fire proof, which will take from nine to twelve months.

The Metallic Paints, Purple and Red, are offered as weather and water proof solely. Their base being Iron, secures them from galvanic action so fatal to lead and other paints on Iron work—and their chemical combination makes it impossible that any change should take place from atmospheric influence or the action of salt water and sulphuretted hydrogen, so prevalent in sea ports and tidal harbors. They surpass all paints yet discovered in Cheapness and Durability, which renders them pre-eminently adapted to the covering of all kinds of iron work, such as Shipping, Mills, Bridges, Steam Machinery, Railway Cars, and Iron Railing. The Metallic Paints have been analysed by Professor Hays, of Boston. The following is an extract from his Certificate:

"As a permanent pigment, this mineral must rank with the most INDESTRUCTIBLE and UNCHANGEABLE bases. For covering Metallic Ware its composition shows that it is eminently fitted.

A. A. HAYES, State Assayer.

Directions.—ARTIFICIAL SLATE, mix the powder with pure boiled linseed oil and a little spirits of Turpentine, to the consistency of very thick Paint, and apply with a common brush, being careful to keep the mixture well stirred while putting it on. One pound will cover ten square feet with two coats.

If shingles have been on for years, it will be necessary to sweep off the moss and lint with a stiff broom; two or three coats of this material will make a perfect slate roof, proof against fire and water.

The Metallic Paints are mixed and put up like an ordinary Paint.

JOHN ROSS, Patentee.

CERTIFICATES.

St. JOHN, June 24, 1850.

J. W. M. Irish, Agent,
Dear Sir,—We have much pleasure in saying, agreeably to your request, and we hope it will assist you in bringing the "Patent Metallic Iron Paint" favorably under the notice of shipowners generally, that we have had several new vessels painted with the purple, and found it all that it is represented by the Patentee's printed circular. One of our vessels was painted with it in October last; she went from here to Liverpool, from Liverpool to Mobile, and in April last we saw her in the latter port looking more like having come out of the painter's hands than having performed the voyages just mentioned.
Yours, &c.,
WM. & R. WRIGHT,
Shipbuilders and Owners.
St. JOHN, N. B., June, 26, 1850.

John Ross, Esq., Patentee of the Purple Metallic Iron Paint,
Sir,—I have just painted a New Ship with your Purple Metallic Iron Paint, and I have much pleasure in stating that I never painted a ship with so small a quantity of Paint and Oil, and look so well. From its adhesive qualities and the manner it covers the wood, I have no doubt but it will be more durable and much cheaper than any other paint used for such purposes, and would recommend it to the public generally.
Yours, &c.,
ROBERT G. MORGAN.
St. JOHN, N. B., July 20, 1850.

John Ross, Esq.,
Sir,—I have lately Painted a new brig with your Metallic Iron Paint, and have pleasure in stating that I never painted a vessel to look so well at so small a cost, and am fully persuaded it is the best article in use for ship or iron work, and would recommend it to the public generally. It only wants to be tried to prove its cheapness and durability.
Yours, &c.,
JOHN KIRK.
St. JOHN, N. B., July 23, 1850.

John Ross, Esq.,
Sir,—I have used your Patent Metallic Paint, and find it has given perfect satisfaction. I think it is a superior article for any work exposed to the action of salt water, as it stands and wears well in any climate, I do

highly recommend for ship work iron covered buildings, &c.

The Artificial Slate Paint, if it was more generally used we should have less fires in our city than we have had. It also preserves the shingles from rot—the cheapness of your Paints is highly in their favor if nothing else.

G. F. THOMPSON, Painter.

John Ross, Esq.,

Sir,—We have great pleasure in bearing testimony to the superior qualities of the Metallic Paint. We tried it on the steamer Maid of Erin, in March, and since on our new ship the Lady Blaney. We consider it cheaper and more durable than any other paint we have ever used.

W. PARKS & SON,
THOMAS PARKS,

Owners "Maid of Erin."

Messrs. JOHNSON & MACKIE are the Agents for the Counties of Northumberland, Gloucester, Kent and Restigouche.
Chatham, June 23, 1851.
