

AGRICULTURE.

LIQUID AND SOLID MANURE.

Charles Alexander a careful and accurate farmer in Scotland, found that while 14 head of cattle would make six loads of solid manure, the liquid would saturate seven loads of loam, rendering it of equal value.

DIGNITY AND DISGRACE OF LABORS.

Dr. Tutill shows the dignity of useful labor, and the disgrace of that which is merely fashionable in his address before the Suffolk County Agriculture Society as follows:—"If a stout vigorous citizen has a load of wood lying on the side-walk he may as well hang himself as to be fool enough to saw it himself, yet if Paddy has pitched it in out of sight, we are not sure but he may saw on till doomsday, and one esteem him less of a gentleman."

SALT HAY.

The saline herbage of marshes near the sea is of value for feeding stock especially so when fed in connection with fresh hay. It is most valuable to mix with hay which grows on bogs or wet lands.

FEBRUARY IS A HARD MONTH FOR STOCK.

This has almost passed into an adage. It is usually the coldest month of the year and cattle are frequently fed in such a way that they grow poor from the time they come to the barn till they go out to grass again, their ability to stand the weather is less at this time than earlier in the season.

WHITE WASH.

Take two quarts of skimmed milk; two ounces of fresh-slacked lime two pounds whiting; or the same proportions for any larger quantity. Put the lime into a stone vessel and pour upon it a sufficient quantity of milk to make a mixture resembling cream; then add the remainder of the materials.

RELIEF OF CHOKED CATTLE.

The best method and easiest, is to take a lump of lard (cold), about the size of a hen's egg, and a spoonful of powder mixed with it, and haul out the tongue and throw it into the throat let the tongue go back, and they are relieved in one minute.

MOSS ON TREES.

The American Farmer gives the following as an excellent application to the scraped trunk to prevent the growth of moss, and destroy eggs of insects: 1 gallon of soft soap, 1 lb. flour sulphur, and 1 quart of salt, to be well stirred together and put on with a hard brush.

CHICKENS VERSUS INSECTS.

Cuthill says "one bantam is worth fifty toads." He states that his rubbish corner, where all the rakings, leaves, and general refuse of the garden were put, became the grand breeding place of all sorts of insects. He closed it with four-foot laths and placed a brood of bantams there; it is now the most valuable corner of the garden.

LEMON SYRUP.

One pound of clean sugar, boil it down to one quart, add one quarter of an ounce of tartaric acid, let it stand two days. Shake it often. Then add four or five drops of lemon.

HAMPDEN, Feb. 21, 1846.

Messrs. J. Curtis, Jr. & Co.—Gentlemen, I have a word to say to you, in favor of HUNTER'S COUGH SYRUP. I have the last year used in my practice two dozen bottles of it which I had of you, and every bottle has done good. For eight years past I have been in the practice of medicine, and I have never found anything so well calculated to operate so favourably in all diseases of the lungs as that is. I have known a hard, distressing cough, cured in forty-eight hours, by using (in broken doses) one bottle of it. One case here in particular, of a man who was thought to have a seated consumption, troubled with a hard, distressing cough. I let him have one bottle, and he had two more of your agent, Mr. Whitmore. After using the three bottles, he has become well, and now labours every day. He told me lately, that Hunter's Cough Syrup was the means and only means of his cure. I have given it to infants, to children, to adults, and have the pleasure to inform you that it has done good in every case.

You need not hesitate to recommend it for a cough, and also all diseases of the lungs. I shall do all in my power to recommend it in the cases above named, not wholly for your benefit, but for the benefit of suffering humanity.

Yours truly, BENJAMIN L. POMROY.
