

News of the Week.

EUROPE.

LATEST BY TELEGRAPH.

More Russians Assaults and Repulses.—War Department, May 11.—Lord Panmure presents his compliments to the Secretary of the Magnetic Telegraph Company, and has great pleasure in transmitting the inclosed intelligence, which has this day reached him from Lord Raglan.

Sebastopol, May 10.—The Russians made a sortie with a large body of troops on our right advanced trench this morning, but were driven back immediately. A second and similar attempt shared the same fate. Nothing could be better than the conduct of the troops who took part in the affair.—The loss of the enemy was serious.

General Canrobert to the French troops.—There is nothing whatever in the shape of news either in the journals or correspondence from the continent, unless it be a short speech which Gen. Canrobert delivered on the 27th of April, when he reviewed the French troops. In this address he said: "Be confident and patient, for the moment will soon come when, in the name of France, I will knock at the door; and if it is not open, we shall enter both by the windows and the door. With a little patience we will come on triumphant from the terrible struggle, and the glory which it will reflect on you all will be immortal."

French Despatch.—Paris, May 11.—The Monitor contains this morning the following:—Advice have arrived from the Crimea, dated the 9th May. Nothing important had happened. We perfect our works before the place.

Arrival of the Sardinians at the Crimea.—Paris, May 11.—The Monitor says that advice from the Crimea, dated the 9th of May, at 10 o'clock, A. M., announce the arrival of General della Marmora, with 4,000 of the Piedmontese troops.

The Baltic.—Kiel, May 10.—The Orion, screw line-of-battle ship, arrived at eight this morning.—The Cossack, Arrogant, Esk, Tartar, and Archer, have arrived at Farosund, with nine colliers for the fleet.

Hamburg, May 8.—The Aland Islands are denuded of Russian troops. Several English ships have already arrived before Rosdhamm, near Ledsund.

Advices from Helsingfors, of the 26th ult., state that the formation of the 26 battalions of Finlanders, ordered by the late Czar, is now complete. The new steam frigate Galkan, of 360 horse power, is ready for launching, and the Wyborg, a sail-galley of the line, has just received engines of 450 horse power. An order was lately issued that in future ships built in the imperial yards shall be fitted with the screw. It is ordered, that the existing sailing vessels shall be successively taken into dock and receive engines and propellers.

A detachment of 103 naval gunners arrived at Havre on Tuesday, the 8th, from Toulon, on their way to Cherbourg, where they are to be placed on board the floating batteries and gun-boats of the Baltic fleet. A detachment of 500 had previously been sent from Toulon to different ports; and there still remain 1000 gunners at Toulon.

Further changes in the French Ministry.—It is reported that further changes will be made in the Cabinet, in addition to what has already taken place; that M. Billault, Minister of the Interior, is to succeed Admiral Hamelin as Minister of Marine, whose retirement is certain; that M. Rouher, Minister of Public Works, will succeed M. Billault in the Home Department; and that M. Paul de Richemont, one of the directors of the Paris and Orleans railways, will take the place of M. Rouher, as Minister of Agriculture, Commerce and Public Works. With the exception of M. de Richemont, the names of the other parties are long known to the public. This gentleman was one of the earliest promoters of the Orleans and Bordeaux Railway, and it was he who lately drew up the report on the budget, and the choice of him for the office of reporter was at least an indication of the opinion of the Commission as to his capabilities.

The Assassin Pianori.—It is thought that the assassin Pianori, who, since his condemnation, has been removed to the prison of the Roquette, where prisoners under sentence of death or hard labour for life are kept, will not undergo his punishment as soon as was expected. Three days are allowed for appeal, but it does not appear that he has used his right. If no delay takes place in the execution—the opinion being all but unanimous, both on the part of the judges and of the public, against a mitigation of punishment—it will be owing probably to the information recently received of the existence of a revolutionary plot with ramifications in most of the countries of Europe. It appears that the day the Emperor was fired at, the chiefs of the secret societies received accounts that the Emperor was killed, and that Paris was in insurrection. The hope is not entirely given up that Pianori, with the prospect of death before him, may make some important disclosures.

Decapitation of Khan of Khiva.—It is reported that the Khan of Khiva had been caught marauding on the Persian territory, and that he had been decapitated at Herat, and his head exposed at Teheran. Twenty-seven other persons suffered with him. Persia, it is said, would declare for Turkey immediately after the envoys of France and England had arrived at Teheran.

Sardinia.—Turin, May 10.—The amendment of MM. Collegno and Desambrois on the Convents Suppression Bill has been accepted by the Government.—The votes in the Senate were—47 for, 45 against.—There were two absent.

Spain.—Madrid, May 10.—To-morrow will commence the payment of the coupons and obligations still in arrear.

Russia.—Frankfort, May 11.—A Russian note, in the form of a circular, addressed to the German States, says that the Czar, relying on the continual nature of the policy hitherto pursued by them, will adhere to the solution given at the conference to the two first points of the guarantee.

Monetary and Commercial.—The English Funds have shown great steadiness to-day, and have closed at a slight improvement. The supply of money is abundant in the Stock Exchange for loans on Government securities, at 1 1/2 per cent. In the discount market likewise there is increasing ease.—The continental advices continue favourable at all points as regards the prospect of the Exchange with this country.

Letters from St. Petersburg state that the American vessel which got into Revel before the blockade, has since left for Konigsberg in ballast.

The following is from the London Standard.—A very extraordinary circumstance is reported and from a quarter which precludes any doubt as to its truth. By letters from St. Petersburg it appears that a fine American built frigate ship recently arrived at Port Baltic; it was stated that vessel had on board 800 bales cotton, but the correspondent of our informant visited the ship and found in addition

to the above, she had 50,000 rifles and 5,000 revolvers. The Russians laughed at our cruisers, and naturally asked if John Bull had been asleep to have allowed so valuable a prize to have escaped. Messrs. C., merchants of Boston, were passengers and it is supposed acted as supercargo. We have not been able to ascertain if the vessel left America this season, and has out her way through the ice before our flying squadron could come up with her, or if she reached one of the lower ports of Baltic last year, lay perdu till the spring. We say no more than to ask what our consuls in the United States are about to have permitted such a cargo to leave without apprising the Government here of the fact. Other letters from St. Petersburg state that the vessel has since left for Konigsberg in ballast.

The Vienna correspondent of the Times remarks that as long as no revolutionary elements are brought into action, Austria will leave Russia to get out of difficulties as best she can; but if France and England should resolve to form corps of Refugees, and employ them on or near her frontiers, the Holy Alliance would assuredly again be formed.

Paris, Saturday morning.—Count Esterhazy, the Austrian Ambassador, has returned from Vienna to Berlin. It is said that Austria is on the point of declaring her complete neutrality, as well as the whole of Germany.

In Parliament it was stated that Lord Dunsford's proposal to blow up the Russian fortifications, is submitted to a scientific committee, including Faraday, Playfair and Graham. A motion for a select committee to inquire as to the impracticability of uniting the British and Indian armies, was lost. A Bill to suppress Grotna Green Marriages was also lost. The second reading of the Bill permitting the marriage of deceased wife's sister was carried by a small majority. The Bill removing the Newspaper Stamp was read a third time and passed.

Mr Layard has temporarily postponed his motion of enquiry into the management of the Army and Navy.

Mr. Roebuck's Committee is still in session. Sydney Herbert and Admiral Dundas examined. Lords Aberdeen and Deroos are cited to give evidence.

The movement in favour of Administration Reform gains ground, and indignation meetings against the administrative mismanagements continue to be held. Lord Palmerston is rapidly becoming as unpopular as his predecessor, Lord Aberdeen, was.

The London Times, in an editorial which has attracted some notice, says the circumstance that America does not sympathise with the Allies is shocking and revolting.

NEW BRUNSWICK.

Visit of the Lieutenant Governor and Lady.—We have the pleasure of stating that it is the intention of His Excellency the Lieut. Governor to visit this City on Wednesday next, and remain some days.—His Excellency will be accompanied by Mrs. Manners Sutton and Suite, and the ladies and gentlemen of this city will have an opportunity of being presented in due form both to His Excellency and his Lady.

We trust that on the occasion of His Excellency's first visit to this city, the various public bodies will unite with the Civic authorities in giving him a proper public reception and a hearty welcome. On Dit, that the Sheriff of Queen's County has resigned from ill health, and that Aca Coy, Esq., has entered upon the duties of Secretary to the Board of Works. The Executive Council has been sitting since Tuesday last, but has concluded not to appoint any Postmaster General at present. It is further said, that there are twenty-two applicants for the office of Emigrant Agent, twenty one of whom will certainly be disappointed.—St. John New Brunswick.

It is with regret that we find ourselves suddenly alluded upon, to record the death of the illustrious Magistrate and Member of the Common Council in this City, Georgy Van Horne, Esq., who departed this life, at 12 o'clock last night, in the 65th year of his age.

We scarcely can remember so cold and backward a season at the present. "Like Angels visits, few and far between," we have had two or three tolerable warm days, at long intervals from each other; since the commencement of what ought to have been Spring; but the month of May, as a whole, has been miserably cold, windy, stormy and uncomfortable. On Wednesday last there was a snow storm at Fredericton, when several inches of snow fell. In this vicinity, we have been favoured, during the past week, with an alternation of cold rains and bitterly chilling wind; rendering fires and over-coats almost as necessary as in winter. To-day we have a clear sky and brilliant sun; with warm temperature. It is remarkable, that this backwardness and coolness of the season has prevailed also in Europe. The English papers generally record and comment upon it. In the South of Scotland, in the early part of this month, there were several successive snow storms; and even in the South of England, snow fell in the first week of May. Generally speaking however, the growing crops do not appear to have been affected by the untoward weather; but the prospects for agricultural produce were everywhere of the most cheering nature.—St. John Observer.

UNITED STATES.

Over a hundred rafts of lumber were torn from their fastenings near Pittsburg, on the Alleghany river, last Saturday, by a sudden freshet, and broken up. The loss to the lumbermen is heavy, and it is impossible for them to identify their property, as thrown ashore, or to get it to market.

People who think there is no flour "out West," are not posted up. At Milwaukee there are 70,000 barrels of flour, and 550,000 bushels of wheat bound for the East. The shipments of Milwaukee will exceed double those of last year.

Agricultural reports from many States, represent the growing wheat as promising a most luxuriant harvest.

Flour is becoming plentiful, and cheaper.

A letter written on board the U. S. steamer Savannah, March 20, announces that the Island of Nippon, Japan, was visited by a severe earthquake on the 22nd of December. The city of Ohasaco, one of the largest in the empire, was completely laid waste. Jeddoo, the capital, suffered greatly; and Simoda, (the port opened to Americans by the treaty), presented a complete scene of desolation and ruin. The water in the harbour of Simoda rose to an unusual height and receded five times, drowning 200 people. A Russian frigate was left high and dry, and after being towed off by 100 Japanese boats sunk the officers and crew only escaping with their clothes.

The wheat crop throughout Western Canada, looks exceedingly well. The fall wheat is entirely free from winter killing, and there is now no danger of its being killed by frost, the prospect of an abundant harvest is very encouraging.

The quantity of land under wheat is far greater than in any previous year.

NOVA SCOTIA.

A gentleman who has just returned from a tour throughout a considerable portion of the middle and western States, says: "that from his own observation and the information derived from others, the expectations with regard to the ensuing crop were founded in the most promising aspect of cultivated lands everywhere. In many counties of the Western States nearly one half more land will be productive this season than in other previous year."

Dame Rumour says, that the Hon. Joseph Howe is to be elevated to the honorable and distinguished post, of Governor of the Island of Prince Edward.—That Wm. Annand, Esq., Financial Secretary; and R. Nugent, Esq., to be Queen's Printer.

Advertisements are out requiring Tenders for the completion of 30 miles of Railway, leading from Rocky Lake to Windsor.—12 miles out of Windsor, to be completed by the 1st of September 1856—the whole by the first of June, 1857.—Morning Journal.
