who speculate on the humiliation and decline of England, will find themselves egregiously deceived. England's power and greatness must be upheld for the welfare of the world, for the maintenance of the integrity and independence of the European States; for if her might and Dowers would are already dead, and the others are in a critioe upned for the welfare of the world, for the maintenance of the integrity and independence of the European States; for if her might and influence should decline, two Powers would share between them the dominion over the world. We do not mean Russia and France, but Russia and North America. It is necessary for Germany, for the Netherlands, for the balance of power in the East, that England should continue to be what she now is. Eng. should continue to be what she now is. England is also necessary to the well-being of France, inasmuch asshe, by her influence, keeps a sanguine and over-hasty nation from making perilous experiments—from paying by the most terrible a sfortunes, for a few brief years of splendour (glory). The war in India will pro-bably last one or two years; but every politi-cian, who is not a Russian or an American, must desire that the exertions of England may be crowned with success, and that she may ren lin, as now, a first-rate Power.
Russia.—St. Petersburgh.—It is said that the

Emperor will quit this city about the 4th for

Intrigues denied .- Prince Gortschakoff has addressed a circular to the representatives of Russia at the various Courts of Europe, directing them to protest against the insinuations of the English Press, that Russia had secretly ining them to protest against the insinuations of the English Press, that Russia had secretly instigated the Hindoos to revolt against British rule. This diplomatic note is couched in that dignified language which Ruisian diplomacy can so readily assume. The Muscovite maintains, that so far from abetting the Eastern savages, Russia has heard of their excesses with sorrow, and would gladly aid England in putting down the revolt. The document will be published shortly, and then there will be an opportunity of witnessing the pangs of Russia, and the tears which she has shed at our misfortunes. The note is said to be a masterpiece of special pleading, but it may possibly fail to remove English impressions of the complicity of Russia with the revolted Sepoys.

INDIA.—The Cholera.—The Cholera is raging we hear, all over the hills from Almorah to Cashmere, along the Ganges, the Jurana, the Tonse, the Eabar, the Sutlej, &c.; whole villages have been deserted in the interior, people preferring to die in the jungles.

French Sympathy about India.—The Memorial Bordelais, in its impression of the 31st ult., after a brief surrmary of the recent deplorable massacres in India, publishes the following appeal to the French people:—All Christian hearts, without distinction of

lowing appeal to the French people:-All Christian hearts, without distinction of nationality, will sympathize with the sufferings of their brethren in Bengal, and in the other provinces where the rebellion still pre-vails, and will be ready to come forth to their

aid.

But we Frenchmen, who in recent and different calamities, especially at the time of the earthquake in Martinique, and at the time of the inundations of 1856, received such substantial proof of British sympathy—we who fought and suffered side by side with the English in the late Crimean war — we hold it as our duty to be the first to come forward to offer help duty to be the first to come forward to offer help to those of our friends and allies who are in mis-

We therefore express the wish that a public we therefore express the wish that a public subscription be opened without delay to receive the gifts of those who are desirous of giving a proof of their sympathy for the unhappy vic-tims of the Indian insurrection.

At the head of this list we doubt not will

appear the names of the most august personages and of the highest functionaries. All the nota-bilities of the country will subscribe. There is not a town in France which will not make it a goint d'honneur to appear in the list, and we need not add that the city of Bordeaux will figure among the first.

NEW BRUNSWICK.

New-Brunswickers abroad.—Mr Wm. Henry Todd, of St. Andrews, and Mr George Albert Hamilton of Sheffield, in this province, bave had the degree of Doctor of Medicine conferred upon them, at the examination in the University of Edinburgh on the 1st of August .-Morning News.

We understand that so determined are the Commissioners to push the Railway works shead, that some of the contractors are now obliged to hire more men, and work both day and night to keep up to time in their con-tracts—this does not look like discharging men. -Leader.

The Fisheries .- The Eastern Chronicle, pub-

Alished at Picton on Thursday last, says:

On Saturday last H. M. Cutter Notley, Lieut.
Mead, commanding, arrived here from a cruise
to the west coast of Newfoundland, the Straits of Belleisle and Labrador, having on board M.
H. Perley, Esq., the British Commissioner
for settling the fishing boundaries under
the Reciprocity Treaty. Mr Perley has also the Reciprocity Treaty. Mr Perley has also visited the several localities named in the discharge of the duties of his office. He left this place on Monday morning for St. John, N. B., and expects to meet the American Com-missioner, in Portland, in a few days, when Alex. M. The Netley left the ice on the 36th of August, when it was freezing sharply, the winter apparently commencing carliers than usual, and with much severity.—New Brunswicker.

CHEAP LIGHT.

Every Public Building, Dwelling House, Mill, Factory, Shop, Store and Office in this Province,

May be brilliantly lighted at little cost!

For brilliancy and economy of its light, that of PARAFFINE LAMP OIL Manufactured by the New Brunswick Oil Works Company, is superior to that of coal gas, or any other oil or fluid.

At the same cost Parafins Lamp Oil will give 7 times more light than Fluid;

5 " " Spe m Oil;
4 " " Lard Oil;
3 " " Whale Oil
And twice as much light asgRape Seed Oil.

PARAFFINE LAMP OIL PARAFFINE LAMP OIL

Gives a brilliant light, is free from all danger of explosior, it does not ignite where a lighted match is placed directly in the oil; it does not waste on exposure to the air; and may be consumed in a lamp to the last drop within reach of the wick without depreciation in the quality of the light.

Leading chemists of London and New York, agree that Paroffine Oil is destined to supersede all other Oils or Burning Fluids as a source of artificial limination, and is the most valuable material for that purpose, now known.
