

ACCIDENT.—A sad accident occurred at the steam mill of R. Crocker, Esq., Chatham Head, on Thursday last. The engineer, Mr Robinson, while engaged in the mill, got entangled in the machinery, and received much injury, being severely cut and bruised. On enquiry of the Doctor this morning, we were pleased to hear that he is doing very well, and sanguine hopes are entertained of his recovery.

LADY HEAD.—Last week we published an advertisement, stating that this steamer would make another trip, and she arrived here on Thursday morning, about 8 o'clock. To keep up the uncertainty which has too frequently marked the course pursued by the managers of this boat, it appears that she will not touch at Shediac on her way to Pictou, neither will she touch there or at this port on her return. We hope next year, should she or any other boat be placed on the route, that permanent arrangements respecting her arrival and departure at the different ports, will be entered into, so that travellers may be able to depend on the same, and not be disappointed as they have been this season.

THE SEASON.—For nearly three weeks we have been enjoying an uninterrupted continuance of most delightful weather. This has been highly advantageous to farmers.

TO CORRESPONDENTS.—The second letter of "A Liberal," will appear next week. The letter addressed to J. McMillan, M. P. P. for the County of Restigouche, is received. It is too personal for publication; and besides, the subject on which it treats is discussed in much better spirit by "A Liberal."

MUSICAL.—Among our advertisements today, is one from Mr Lockwood, who, we understand, is well qualified to perform what he has advertised to do. Those who require his professional services we would recommend to give him an early call.

RESIGNATION.—The Hon. John M. Johnson has resigned his office as Postmaster General, but retains his seat in the Council. Mr Connell has been sworn in as his successor. The Government would have acted much wiser had they declined to appoint a successor, and laid the matter before the Legislature at its next session. The sooner the office is abolished the better. We look upon it as an expensive imposition upon the revenue of the Province. We understand that Mr Johnson has been appointed Commissioner of Authentication of Debentures issued under the Act 19 Victoria, Chap. 16.

AMBIOTYPES.—A few handsome street and wharf scenes, taken during the past few days by Mr Russell, are to be seen at his rooms in Mr McDougall's new building. As Mr Russell intends leaving for Richibucto in a few days, we would advise those who have not had their likenesses taken to call at once.

MR GISBORNE.—We learn by the P. E. Isander, that F. N. Gisborne, Esq., has arrived at Charlottetown from Newfoundland, on business connected with the subject of laying another Telegraph Cable between Europe and America, the terminus on this side to be at Halifax. This gentleman has published a series of letters, which proves pretty plainly, that Mr Field is not the hero of the enterprise, but that Mr G. (as we stated some time since) had a large share in the work, though his name was studiously withheld from the public.

HON. JOSEPH HOWE'S WORKS.—Persons desirous of procuring the speeches, &c., of this gentleman, can do so by entering their names on the list which lies for signature at the Gleaner Office.

MARRIAGES.

On Thursday, the 28th ult., by the Rev. Isaiah Wallace, Mr Moses Travis, Jr., to Miss Charlotte Jane Slicker, both of Little South West, Miramichi.

At the Manse, Blackville, on the 1st inst., by the Rev. Thomas G. Johnstone, Mr Robert McArthur, to Miss Lydia Ann Rogers, both of Newcastle.

DEATHS.

At Bartibogue, on the 8th October, WILLIAM DRUMMOND, aged 78 years.

Fulton applied steam to the great practical uses of the age; Morse has brought Galvanism to be the daily servant of millions of men. Newton unravelled the mazes of the stars, and made their motions the mariner's guide on the trackless ocean. What these men have done in their departments, Dr. Ayer does in medicine. He turns the great discoveries in Science and Physics to use in the cure of disease, and makes the occult discoveries of the great chemists available for the wants of every day life. His medicines, for the low prices at which they are sold, bring within the reach of every man the best wisdom and skill of modern times.
