Positive Proof--Sceptics Read.

HAMPDEN, Feb. 24, 1846.

Messrs. J. Curtis & Co.—GENTLEMEN,

I have a word to say to you in favor of HUNTER'S COUGH SYRUP. I have the last year used in my practice two dozen bottles of it which I had of you, and every bottle has done good. For eight years past I have been in the practice of medicine, and I have never found anything so well calculated to operate so favourably in all diseases of the lungs as this. I have known a hard, distressing cough, cured in forty-eight hours, by using (in broken doses) one bottle of it. One case here in particular, of a man who was supposed to have a seated consumption, troubled with a hard, distressing cough. I let him have one bottle, and he had two more of your agent, Mr Whitmore. After using the three bottles, he has become well, and now labours every day. He told me lately, that Hunter's Cough Syrup was the means and only means of his cure. I have given it to infants, to children, to adults, and have the pleasure to inform you that it has done good in every case.

You need not hesitate to recommend it for a cough, and also all diseases of the lungs. I shall do all in my power to recommend it in the cases above named, not wholly for your benefit, but for the benefit of suffering humanity.

Yours truly,

BENJAMINE L. POMROY.

EDUCATION.

TO THE YOUNG MEN OF CHATHAM AND VICINITY.

Seeing the great number of MECHANICS we have in Chatham, and yet, not a School wherein the necessary Branches may be taught, without interfering with the discipline of the School, (knowing that the Mechanic cannot be what he would wish to be, without a knowledge of those Branches) has induced the Subscriber to make arrangements with the Inspector and Trustees of Schools for the Establishment of a

MATHEMATICAL SCHOOL.

He therefore calls on the Young Men of Chatham, (if they will study their own interest) to consider the advantages that may be derived from such a School, confined solely to the Mathematics, where they will not be subjected to the turmoil occasioned by the minor classes as in other Schools. The Branches to be taught are, first, Arithmetic in a superior style by Lecture and Demonstration, whereby all the hidden and combined powers of numbers will be so explained that the weakest capacity may easily comprehend, together with Algebra, Geometry, Trigonometry, Mensuration, Navigation and Land Surveying, which will be also taught in a proper manner. The School will be open (by arrangement) on the first of OCTOBER next. He will at the same time open an

EVENING SCHOOL,

where the above Branches will be taught as in the day School. The Evening School is intended for the accommodation of those whose avocations might prevent them attending a Day School. He will have no objection to teach a Class ITALIAN BOOK KEEPING, if a sufficient number require it.
