

A life of service must be a life of reverence. Reverence should be made part of one's faith.

Dr. Jones closed his remarks by congratulating the class upon being graduated from so important a High School. They were starting upon life and he could remind them that a life worth while was a life of associations and one for the benefit of those with who we come in contact. For the future he could express the best hope for them.

F. H. S. May Pole

On May the first in '26
There was placed with much success
A May pole on the ice, which flew
The banner F. H. S.

Now this was the first May pole
For four score years and two
So to the High School Students
There is much honor due.

From the A & B Club boat house
A little band of five,
Did paddle up the river
To the bridge which was alive

With every High School Student
Who was able to be out,
Who, when that pole was planted,
Began to yell and shout,

To let the whole town know,
Or those who did not guess,
That a May pole was erected
By the boys of F. H. S.

Miss Gregory, to "C.", after a strenuous lesson in Grammar,
"Some of you should be in a suburb of St. John."
