"Progress" has a Word or Two to Say About Its Own Affairs-How It has been General Public-The Past and Present.

The third volume of Progress begins with this number.

Just two years ago today, the people of St. John awoke to the fact that there was something new and attractive in their midst. It was the first number of Progress, an independent weekly newspaper, which pro- its history. posed to discuss matters of public moment without fear or favor, to foster and encourage the best class of literary work and to give special attention to topics of interest in the best circles of society. To these lines it has adhered, and its phenomenal successs from the first showed that it had come because it was needed and had come to stay.

Like most ventures which are out of the old and well known ruts, its advent was a fruitful theme for the dismal predictions of wise prophets. Before it was issued, these his duties. Job's comforters were tearful in their warnings of the follies of such a step. The first issue would cost a great deal, and the paper could never get a foothold. St. John was not large enough, and though it might run for a little while there could only be one result when it ceased to be a novelty. And they no doubt looked upon the projectors, who engaged in the risky experiment of fitting up an office, as lunatics live and honest paper. who would be taught a severe and salutary lesson after brief and bitter experience.

The advent of Progress took the public by surprise, which became pleasure as they saw the ideas it was proposed to carry out. The paper was different from anything they copies a week, chiefly in the Maritime following sketch to Progress: Provinces, but scattered as well in every country of the civilized world.

For, apart from the edition mailed from the office every week, hundreds of people who buy the paper mail it to their friends in heu of a letter, and it thus penetrates to every place where the New Brunswicker are you crying for? abroad is found. It is quite safe to say that the ordinary calculation that each copy of a newspaper averages five readers is far I thought that I was going to be a proper exceeded in the case of Progress. Some city. copies in St. John are read by a dozen and then mailed away to be read by a dozen more, while few indeed subscribe for Pro-GRESS who have not friends to enjoy the perusal of it with them. The lines upon which the paper was started have been faithfully followed. It has spoken out when the public interest the spring already, and far as I can see, demanded it, and in its criticisms where the nothing has been done yet. When Progress entered on its second volume, a year ago, it had great cause for rejoicing at the prosperity which had attended its first year. At that time, however, it had to depend upon another office tor its press-work, and the work of cutting the pages required hours of extra labor with a hand cutter. As the circulation increased, the inconvenience become so great | News Depot, Main street.

IT IS ON THE THIRD LAP, that a radical step had to be taken. The present commodious premises in the Masonic building were secured for a term of years, and fitted up to meet the requirements of the business. In October last, a steam press specially adapted to fine news-Making Itself Solid with the Great and paper work was secured, and with it the cutter, which by folding, cutting, pasting and delivering makes the work of turning out a paper as nearly automatic as is possible. That only the best work should be done, a better grade of paper was procured, so that Progress today costs the publisher much more to produce than at any time in

> This would be a source of loss, did not the circulation keep apace with the improvements, as it has steadily done and continues to do. It would be well nigh impossible to issue the present edition with the methods in vogue less than a year ago.

Mr. Walter L. Sawyer, who assisted in starting the paper, and to whose excellent work it owed much of its popularity, retired last June, and in October the present editor, who had been a contributor to the paper in its earlier history, entered upon

While Progress feels that it has no reason to feel ashamed in looking over the record of the past year, it will be its aim to give the public still better value for their money in the year to come. It has several "bright ideas" which will be disclosed in due time, and which cannot fail to make it the paper which will interest, amuse and instruct all classes who value a

To show for it, there is an unfinished structure which, when finished, must involve the construction of another under a new contract. Then Mount Pleasant avenue will be a very pleasant driveway, and an enormously costly one as well.

There are a few men in the common council who think that the crying need of St. John is a public park, embracing Lily lake and the adjoining woods, and approached by an Appian way over Mount Pleasant. It is a pretty idea, and so is that of a boulevard from the foot of Sydney street around Courtenay bay, and terraces and parterres along the side of Fort Howe. So is that of statues, in brass, of the mayor and council, in addition to the other costly monuments they are likely to leave as a heritage.

But in the meantime there are a good many more pressing wants which must be on the taxpayers for years to come, yet in ways to add to the public burden. So long as they can manipulate matters in their own interests, they care not what the public may suffer by their acts.

> For Thursday was the first of May, and in accordance with the old time custom, everybody who could find an excuse for moving shifted his or her place of abode. Everybody knows what that implies. I means weeks of worry and house-hunting beforehand, a day of hard and thankless labor, broken furniture, lost household goods, lame backs and a volume of words which it is to be hoped the recording angel has noted with a due allowance for the provocation which caused them.

It has been a great year for moving, and the most noteworthy fact is that an unusuner, and presumably from the employ in ally large number took time by the forelock and made their pilgrimages in advance of the regular day. The procession started on Monday morning and was kept up until might have been a serious bar to him in Friday, and others will not finish until to-

All classes moved this year, from the people who occupy two or three rooms in a tenement to those who are satisfied with nothing less than a \$400 or \$500 a year mansion. Every street has its removals, at 11 p. m., and there is a general odor of remember. In that portion of King street streets, for instance, no less than sixteen tenants have moved out and nearly an equal number moved in. So in other and eligible parts of the city. Indeed, no which the possession of no house, save "the narrow house," can cure.

The migratory ones have not all of the fun to themselves, though. The landlord has his share of it. One of them has been had better luck the next time. He sought looking for law this week, because his private board at the house of a prominent tenant left the double windows on, when colored citizen, quite assured that he would he had promised to take them off. He was not find his effects on the sidewalk the next | advised that he had a remedy by bringing a suit in equity to compel the specific per-Some of the hotels keepers of St. John formance of the agreement, and that for a few hundred dollars he could get all the satisfaction he wanted. Another man, a tenant, had put in a number of panes of glass during the year, because his landlord refused to do it, and was very much annoved to find that, as they had become legal "fixtures," he could not carry them away with him when he went.

The landlord has a good deal of law on his side, but he is served a trick once in a while. People who move out before the rent is due have a fair chance of beating the observance of the festival of St. John | him if they can put their furniture beyond his reach, or they can do it anyway if he fails to prove that the goods were fraudulently removed to avoid a distress.

One landlord in the city went without his rent Thursday, and the grave chances are that he will go without it for all time. Twenty-four hours before the eventful date there were signs of spring moving in one of the stores on a business street. The lessee kept a store on the lower flat and his household goods in the second story. That was convenient, for when quarter day came round there was only one landlord to pay, and only one to block. He was discreet enough to know that so long as April lasted he and his goods could go anywhere without the consent of his landlord-who would have something to say as soon as

There is a growing impression that it is about time "merchants" of this stamp found it convenient to try some other town, and save further favors for distribution until after they get there. A few of the business men have a lively remembrance of how the same man treated them some time ago. He was, according to his own story, as "sound as a nut" financially, and doing a good business. He succeeded in getting a fair line of credit, and one fine day turned right side up with a bill of sale in favor of a near relative, with whom, according to his own statement, he had not been on speaking terms for a long time. His creditors were left then in the same lurch as his landlord is now.

Everybody Knows It.

The indications this season are that there will be an unusually large amount of travel from the States to the Provinces. The International steamship company, which now advertises three trips a week, is preparing for a busy summer, and it is needalways been of recent years.

BOTH WENT GUNNING.

A West End Man who Terrified His Neighbor and Was Terrified in Turn.

A resident of the West End, who may be called Mack, recently fell on his knees and in the most solemn manner called upon Heaven to witness that he would shoot a certain neighbor within a week. The neighbor being duly notified of this pleasant intention, decided to have the law invoked, and was told by good authority that he could have Mack bound over to keep the peace. "What good will that do if he shoots me?" was his natural inquiry, and thereupon he procured a pistol and carried it with the intention of having the first shot when Mack was encountered. In the meanwhile Mack, who had made the vow in a time of great trouble and excitement, began to repent himself, and hearing that his neighbor was also going about with a pistol became alarmed for his own safety. Neither wanted to do any harm, but there was a prospect that when they met each would shoot the other as a matter of self defense. For several days the neighborhood was in a state of painful apprehension, but at the last accounts a truce had been arranged and the weapons laid aside for future emergencies.

THE BABY WAS ALL RIGHT.

And So Was the Collection, While the Sermon is as Good as Ever.

In one of the city churches, last Sunday night, just as the clergyman had begun his sermon, the sexton walked hurriedly up the aisle, climbed up to the front of the pulpit, seized the preacher by the arm and said in a very loud whisper, "You're wanted at the house. The baby is dying!" This naturally made a sensation, the clergyman retired grief-stricken to the vestry, while the service came to an abrupt conclusion It proved later that the baby had only an ordinary teething fit, and was all right. It is the custom in this church to take up the collection before the service, and so there was no financial loss on this occasion. The moral is, that this is the business way of doing it. Meanwhile, the clergyman is to be congratulated not only that the baby is not in danger, but that the undelivered sermon is good for another occasion.

An Investigation Needed.

If the charges made in regard to the management of the Lunatic asylum are true, it is time for a thorough investigation of the whole concern. The public accounts show that there has been a peculiar system of purchasing supplies, while the frequent escape of lunaties proves that discipline is very lax indeed. The assertion is also made that the keepers beat the unfortunates who are under their charge. The asylum is getting a very rank name, and if the stories about it are untrue, no one should be more anxious than the superintendent for an investigation. The institution costs the province a good deal of money, and the people have a right to know something

Twelve Pages Next Week.

Progress next Saturday will be a twelve page paper. There is too much advertising in the present size to suit either the publisher or the reader. The edition will be larger than the ordinary one by over a thousand copies, and there will be an chance for wholesale and retail merchants to make "special" announcements and reach their customers. The paper will be a very intereresting one and will be illustrated.

Donations from Mr. Matthews.

A Sussex correspondent informs Pro-GRESS that Zion Lodge, F. & A. M., of that place, has been offered the gift of a fine organ from Mr. S. F. Matthews, of St. John, and will of course accept it. Mr. Matthews has also recently sent another lot of rare and old books to Iowa, where they will form a part of the Matthews' collection, for which a special place is reserved in the famous fire-proof building.

Another Story of Merchants' Week. One of the largest wholesale merchants in the city says that, notwithstanding what has been said to the contrary, Merchants' week was a decided success-at least in his business. There were a large number of out-of-town buyers in the city and his own sales in four days amounted to over \$6000. And this does not include what his travellers

were doing outside. For Some Wise Purpose.

The government may have had wise purpose in its appointments to the school board, but that purpose was evidently not to increase the efficiency of that body. The men who are now on board are dwarfed by comparison with those who have been on it, and whose places they are supposed to fill.
