lower provinces. A handsome cherry

fitted with ground glass and brass grills

runs right across and is arranged in three

compartments, one each for accountant,

ledger keeper and teller, the latter being

enclosed at the rear with a wire grat-

ing. On the right hand side outside the

counter is a long cherry desk for the use

of customers, and on the left is the door

into the manager's room which is large and

light with a side door leading into an ante-

room, that again giving access to the rear of the outer office. This anteroom has been

fitted up with a cabinet for the holding of

stationery and also for the convenience of

holders of Deposit Safety boxes where they

can examine their securities, cut off coupons,

etc., in privacy and without interruption.

Off the anteroom is the lavatory complete

necessary to comfort and good health. A

space at the back of the main counter is

essential part of a bank's premises. The

foundation has been carried up with stone

and cement from the solid rock to the

present level and finished with a

proof portion has been built of best brick,

quite separate from the main walls of the building, with an air chamber all around

and finished with a course of fire brick on

the outside. Inside half the space is occu-

pied with a burglar-proof vault supplied

by the Hall Lock & Sate Co., of Cincin-

nati, O. This vault is the most complete

of its kind in the maritime provinces, being

built of three welded plates of chrome steel

and iron, screwed together from the inside

with Hall's patent cone screws, and no two

joints or screws coming in front of the

large ones measuring 163/4 inches deep,

seven inches wide, ten inches high, and

77 small, 16¾ inches deep, seven inches wide and seven inches high These are all

fitted with Hall's patent locks, supplied with

two keys and a master key, which sets up the combination of each. The total weight

of the vault and boxes is 15,170 pounds

and the steel safe about 6,000 pounds,

making a total weight of over ten tons,

thus showing the massiveness of the struc-

ture. During the progress of putting up

the work by the superintendent of the Hall

Co. every plate was tested by a practical safe maker and found up to the specifica-

tion, viz., that neither saw, file nor drill

would make any impression on the plates

or screws. The bank, therefore, possesses

one of the most perfect vaults for safety either from fire or burglars that modern

mechanical skill has devised. The boxes,

which are to rent at a small sum per annum,

are being taken up very rapidly, and will

probably be occupied very shortly. Be-

tween the two windows at the back of the

office and side of the vault is being put up

a large desk for the extra convenience of

the clerks. The offices are heated with

The Fair Sex in New York Politics, and Others in Mrs. Twombly's Barn, With Pumpkins and Chrysanthemums-A New

Astor on the Scene. NEW YORK, Nov. 24.—We have just passed through the agonies of a state election. Elections are not in my line as a rule, but I feel called upon to mention this because a notable feature of the fray was the unprecedented prominence given to the wives and families of the candidates.

Whole pages of the most prominent dailies in New York and Brooklyn were packed with portraits of their female relations, including in some cases their grand-mothers and grand-children, and in one a couple of young women whom the artist happened to catch making a morning call on the ladies of the family, and who were not related to it in any degree whatever, and really objected very much to being thus brought before the public.

The wives of the candidates were forced to proclaim to the public their opinions on the Women's Rights question, prohibition, the servant girl problem and every question on which the average woman is supposed to

have an opinion. I write "forced" advisedly because when a man or woman invaded a candidate's paper, that was known to be doing all it also amongst the purposes for which water large portion (about a quarter) of the length, and then, as Sunday was one of tive in, set out the best she had to bestow and graciously hand over the required in-formation even though it should be her exact age and the cost of her best gown.

One woman reporter who was sent to interview the wife of an alderman-expectant, tells a very amusing story to her friends of how the maid took her card made, and for want of steam the bridge gingerly through an inch-wide crack and then shut the door in her face while she carried it in, and how the candidate for civic honors and his spouse both came rushing in person to admit her with a very abashed looking servant in the rear, who had no doubt been severely reprimanded for thus risking her master's chances.

Atter the election every prominent wo-man in Washington and New York, from Mrs. Harrison downward was interviewed on the result, and their opinions set before the public with all due respect and solem-

It seems now to the writer in looking back that it savored very much like a sentence. A little schoolboy who can print but not write, was asked with others for something original. What follows is the result. Perhaps it is a nursery rhyme, but a fond father has handed it to Progress as not too bad an effort for a boy of eight:

I love the bird that sings to me, I love the bird upon the tree, I love the bee that gives us honey,—

I love the cow that gives us milk, l love the worm that gives us silk, I love the flowers that smell so sweet I love the meat that we do eat.

AN UBIQUITOUS CAT.

The Halifax Banking Company and Some How its Owners had Some Difficulty in Exhibiting Her.

"If I loved birds less," said Mr. .B Thomas, an enthusiastic ornithologist, "I should love cats more; but you can't consistently entertain a practical affection for cats and birds.

"I am at this moment a one-third owner of a magnificent coal-black cat that is locked up in the cellar and can't get out.
Up to yesterday I supposed that I held the
whole cat in fee simple, for although I saw
her only on Fridays and Sundays, I fancied that on the other days of the week she was somewhere within the sound of my voice but not anxious to seem intrusive. She ate fish exclusively on Fridays, and on Sundays she killed rats, but never feasted upon them. She is a wonderful ratter, and yesterday when Tom Grogan wanted to bet \$5 that his cat could destroy more rats than mine in a given time, I posted the money at once. Then Sam Terry, who was with us, said he had a cat that could discount both of our animals at rat killing, and he was willing to back his opinion with \$5. So we made it a sweepstakes, and \$15 were posted. We chipped in \$1 each to buy the rats, and agreed that the losers should pay all expenses when the result of the wager was decided.

"On comparing notes we found that all the cats were black, and Grogan said that the trial for supremacy must be made on Tuesday or Thursday, because his cat came home only on those days. Terry objected to that, because the animal he was backing had outside business of some sort to attend to on every day except Saturdays and with all the latest sanitary arrangements so Wednesday, which she passed in the home circle. We argued the point at great my cat's 'at home' days, I took Grogan occupied by the Fire and Burglar Proof and Terry to my house to show her to Vaults. Great attention has been paid to them. Their eyes bulged as they looked every detail in connection with this most at her. She was the same cat that they both had been risking their money on, and each was ready to swear that she was his property. The argument was growing acrimonious when floor of hardened steel plates. The fire Fred Porter, a common friend, dropped in, and we agreed to submit our respective claims to him. But the moment he saw the act he declared she belonged to him, and though she came home only on Mondays and was mysteriously missing all the rest of the week he was not disposed to re-

"At this juncture I saw that prompt action was necessary, so I picked the cat up, carried her down the cellar, and locked her in. I will keep her there until she recognizes that she must stay in the house seven days in the week. She is a beautiing affair which happened in a small town other. The door is of chrome steel and ful creature. Come down and examine

Inside the vault there are the bank's own Mr. Thomas and his visitor went into steel safe and 108 safety deposit boxes; 31 the cellar, where they found that the window was broken and the cat was gone. As it was Monday, she had doubtless visited Mr. Fred Porter.
