

GO A Big Go.

That "Go" is big enough, but it isn't anything like as big a go as Sterling Soap.

Its size would have to be multiplied many times over to be half as big. This soap is going fast because it is better in material, better in make and better in everything that contributes to the top notch of quality than any other production on the market. This is a bold claim, but if you give it a trial we will prove what we say.
