[Progress is for sale in Moncton at the book store of W. H. Murray, Main street, and on the streets by J. E. McCoy.]

Nov. 16.—After a very successful run of five nights the fair of nations closed on Friday evening. A sum in the close vicinity of \$400 was realized, and as the expenses, though large are not excessive, the amateur athletic association will probably be \$300 better off, thanks to the committee who had charge of the fair, Mrs. P. S. Archibald, Mrs. F. W. Sumner and Miss Adelaide McKean together with their numerous assistance who one and all deserve a cordial vote of thanks for the pains they took to make the whole entertainment a success. The chief attraction of the fair was the concert on the evening of Thanksgiving day when Mrs. Harrison of Sackville sang assisted by the club, and Mr. J. A. Wetmore. Those who have had the pleasure of hearing Mrs. Harrison sing before will not require to be told that the audience enjoyed a rare treat, as her vocal powers are well known to be of an unusually high order, but she has never been heard to greater advantage in Moncton than on Thursday evening. Her solos were admirable, but the rare qualities of her voice seemed to be even more apparent in her duet with Mr. Wetmore which was a gipsy song men in gipsy costume. Mr. Wetmore's fine tenor, blending perfectly with Mrs. Harrison's full soprano voice. The duet "over" between Miss Trueman and Mrs. Harrison was another gem, while the male quartette by Messrs. Wetmore, Lea, Hogg and Steeves was also greatly appreciated, while the choruses by the Glee club of twelve male voices led by Mr. Wetmore called forth frequent and hearty applause. Mr. Wetmore is to be congratulated upon the good work done by the Club, of which he is leader and director. The concert was repeated by request on Friday evening. The drawing of the prizes in the various lotteries took place just before the close of the fair, Mrs. C. J. Butcher being the fortunate winner of a very handsome agate brooch, while Mrs. P. D. A Dying Race.

In spite of improved dwellings and better food the Hawaiians are dying out. The lovable islanders whom Capt. Cook estimated to number 400,000 souls, are today threatened with extinction. In 1823 the missionaries estimated the population at 142,000. The census of 1832 accounted for 13,313 natives. The census of 1878 showed a native population of 44,080. The census of 1884, including the mixed bloods, showed only 44,282.

The Most Deadly Poison.

The most deadly of all known poisons is the "woorari," used by the South American Indians for their arrows. It is said to be prepared by pounding together with certain roots two species of ants—one very large, black, and so venomous that its sting produces a fever; the other, small and red, with a bite that feels like a nettle. To this mixture is added the pounded fangs and venom bags of two kinds of snakes.

What It Cost.

The cost of the Eiffel Tower was about \$1,000,000, of which the state contributed \$300,000. It was completed March 31, 1889, and about 7,000 tons of iron were used in its construction. It has three storeys, and the ascent is made by a series of lifts to the summit, which is 985 feet above the ground. The constructor will be repaid by the fees which he charges for admission, and he holds this right till 1909.

Many people suppose that rosewood takes its name from its color, but this is a mistake. Rosewood is not red or yellow, but almost black. Its name comes from the fact that when first cut it exhales a perfume similar to that of the rose, and although the dried rosewood of commerce retains no trace of this early perfume the name lingers as a relic of the early history of the wood.
