"ASTRA'S" TALKS WITH GIRLS.

[Correspondents seeking information in this department should address their queries to "Astra," Progress, St. John.]

Since I litted up my voice and gave my small testimony with regard to the excellence of our "Seasonable Receipts," I have had so much "corroborative evidence" from the girls that I only wonder none of them thought of telling me what they thought of those appetizing recipies bebe spurred on to such extra efforts now not want to poach upon his preserves, but still I think I will tell the girls how to make it, and let them try for themselves. Why Her Hat is Removed.

A young lawyer of Boston was asked the other day, says the Post, why in the should not mind about the name in the English courts a woman must remove her hat. He could not answer the question, know so much, is it not? I do know a little | but an old lawyer, to whom the matter was about it I confess but that does not make referred, recalled the opinion of Sir Edward any difference at all, it is just the same as | Coke on the matter. It was at a murder it was before. You never asked me too trial where the prisoner was a woman and many questions at all, and I like your let-ters very much. appeared before the court with her head covered. Sir Edward Coke ordered the woman to remove her hat and said: "A woman may be covered in church, but utterly without sense or meaning of any not when arraigned in a court of juskind, as yours, I never waste my time in tice." The accused tartly replied: "It answering it, I think the moon must have seems singular that I may wear my hat in the presence of God, but not in the presence of man" "It isn't strange at all," replied the judge, "for the reason that man, with his weak intellect, cannot discover the secrets which are known to God, and, therefore, in investigating the truth, where human life is in peril and one is charged with taking life, the court should see all obstacles removed. Besides, the countenance is often the index to the mind, and accordingily it is fitting that the hat should be removed and therewith the shadow that it casts upon your face."

Wedding Decorations Out West.

At the farewell reception to a West ern bridegroom elect, recently, an original scheme of decoration was carried out by his friends which caused much ransacking the room and a series of festoons below it | furiously hot as to scorch. SEASONABLE RECEIPTS.

Specially Prepared from Practical Tests for the Lady Readers of "Progress."

[Correspondents seeking information in this department should address their queries to "Editor Seasonable Receipts, Progress, St. John.]

W. T. Carden, Ontario, asks for receipe for making lime water. I found the following in the Household Cook Book, and having made it myself from this receipe and found it to be equal to that sold at the druggists at from 10 to 15 cents for a small bottle. I consider it a valuable piece of information for any Pater familias, especi-

ally at this season of the year. Lime water is one of the most useful agents of household economy if rightly understood. Its mode of preparation is as follows: Put a stone of fresh unslacked lime about the size of a half-peck measure into a large stone jar or unpainted pail or tub, and pour over it slowly and carefully, so as not to unslack it too rapidly, four gallons of hot water, and stir thoroughly; let it settle, and then stir again two or three times in twenty-four hours. Then bottle carefully all that can be dipped off with a cup in a clear and limpid state.

As a remedy for children's summer complaints one to two teaspoonfuls in a cup of milk is a dose, and when diarrhea is caused by acidity of the stomach, it is an excellent remedy. When put into milk it gives no unpleasant taste, but rather improves the flavor.

When put into milk that might curdle when heated, it will prevent its so doing, and it can then be used for puddings and pies. A little stirred into cream or milk after a hot day or night, will prevent its turning when used for tea or coffee. It is unequalled in cleansing bottles or small milk vessels, or babies' nursing bottles, as it sweetens and purifies without leaving an unpleasant odour or flavour.

A cupful, or even more, mixed in the sponge of bread or cakes over night, will prevent it from souring. A good remedy tor sour stomach tor people of all ages.

To Make Strawberry Sarabande.

Put a gill of cream and a teaspoonful of rosewater in a basin; beat it till it is like snow. Then add half an ounce of isinglass dissolved in a gill of boiling water. Crush some strawberries and mix them with the cream. When the isinglass is quite dissolved and cold mix all together, with castor sugar to taste. Then put it into a well-soaked mould, place it on ice till it is set, then turn it out carefully into a glass

Wanted in St. John.

A correspondent thus expounds a novel "reform"

"The idea of a co-operative cooking club occurred to me, some time ago, as a very economical and convenient arrangement for the large population of slender means who inhabit "unfurnished apartments" and small "flats," or small households. There are many domestic duties to be attended to, and little or none, or incompetent assistance to be obtained, especially in the cookery department, which is one of the foundations of good health. There are many who are too much exhausted to prepare a proper meal after attending to a thousand other things, much less enjoy it; and many who could employ the time more profitably, and most of all who can ill afford the present waste of separate fuel, &c. There is nothing more absurd than to look around and see row upon row of little households, each with its own waste and discomforts, and reflect that combination only is wanting to change dyspepsia into joy and discomfort into leisure. There need not be a penny more spent, but rather, judging from experience, there would be a perceptible saving in the present rate of expenditure."

Gingerbread and Snaps.

Hard gingerbread, soft gingerbread, drop cakes and gingersnaps can be made with perfect success without eggs. Gingerbread may be considered costly in time, as it is a labor requiring patience to roll them out until they are of paper thinness, as they should be, and then to cut and bake with due care. But the actual expense is very small, and the jar of crisp gingersnaps is something to be surveyed with no small satisfaction. Almost everybody likes them. and they will keep indefinitely if the supply is large enough.

Gingersnaps.

One cupful of sugar, one cupful of treacle, one cuptul of butter (lard will answer, mixed lard and suet from the frying-kettle is better), one teaspoonful of ginger, one teaspoonful of soda dissolved as follows: He has on the shoulders epauin two teaspoonfuls of hot water. Make a lets of a vice admiral, two busts of females, stiff dough with flour, and knead thorough- a torero in action, an anchor, a pansy, a ly. Roll as thin as possible, cut in small flower on the right hand, two busts of rounds, and bake in a moderate oven.

Add another cupful of treacle and a cupful of sour cream to the same mixture, make stiff enough to knead it well, and roll into cards (thin flat loaves), and you have an excellent hard gingerbread. Some prefer these cards glazed with a little brown sugar dissolved in milk.

Soft Gingerbread.

For a very nice, melting, soft gingerbread, made without eggs, butter, or milk, use half a cupful of fat from the frying kettle, a large cupful of dark treacle, a teaspoonful of ginger, one of soda, half a cupful of hot water, and flour enough to make a stiff batter. The only difficulty is in getting the batter stiff enough, yet not too stiff, and in good of old closets and attics. The frieze about | baking. The oven must be hot, but not so without eggs require to be somewhat stiffer than when eggs are used. It is difficult to give exact quantity, as both respect. Good ginger cookies are made after the same receipt. Of course they must be made stiff enough to roll out with-

For drop cakes substitute cloves and cinnamon for the ginger, and make soft enough to drop from the spoon and hold shape without running together in the pan.

A Thing Greatly Abused.

HARDLY anything receives less thanks and more abuse than a shoe. It is never thanked for the protection it renders against the cold of winter, the heat of summer, against thorns, tacks, glass, dust, sticks and stones. It is kicked about, scoffed at, trampled under foot, knocked around and thrown violently here, there or anywhere. Its eyes are blinded, its tongue torn out, and its very "sole" ground to powper in its constant, uncomplaining servitude.

The shoe, like sails to a ship, or wings to a bird, permits man always and with tireless motion, to push on towards the far objects of his measureless ambition. Let the ship thank its sails, the bird thank its wings, and man thank his shoes, and when they are worn out get them replaced at WATERBURY & RISING'S, where you can find an assortment of Russia Leather-Tan-Canvas and Kid Boots and Shoes suit-

THEY WONT SCARE THE CROWS.

A man was fooled the other day, Who tried to scare the crows, By setting up a dummy made Out of a suit of clothes; He hid behind a distant fence To note the crows' surprise, But what he saw confounded him And made him doubt his eyes. The crows in pairs and clusters came From field and woodland shade, But not a crow of all the flock Seemed in the least afraid: In fact the dummy seemed to have For each a sudden charm,

And one old fellow perched himself Upon its outstretched arm. Then all the others clustered 'round With confidence inspired, Instead of being scared away They chattered and admired; The farmer chased them from the field And raised an awful fuss, And then he saw that he had bought That suit of clothes from us. He fairly howled and stormed about That well made suit of clothes, Because they looked too stylish still To scare away the crows.
