T. McAVITY & SONS,

13 & 15 King Street.

AUCTIONS.

FOR SALE.

NOTICE IS HEREBY GIVEN THAT UNDER and by virtue of a License to Sell the real estate of Eliza Jamieson, deceased (for want of personal estate to satisfy the debts of the said deceased), issued out of the Probate Court for the City and County of St. John by the Honorable C. N. Skinner, Judge of the said Court, on the 12th day of December, A. D. 1892, there will be sold at Public Auction at Chubb's Corner, (so called) in the City of Saint John, in the County of Saint John and Province of New Brunswick, on Saturday, the 4th day of March next, at 12 o'clock in the forenoon—

THE LAND AND PREMISES DESCRIBED as follows:—All the certain piece or parcel of land situate, lying, and being in the Parish of Lancaster County, Province, etc. aforesaid, known and distinguished as being part of that Certain Lot, No. 19, in Block Thirty, and granted from the Crown to Archibald Jamieson, and bounded as follows, to wit, on the east by lands granted to John Patchell; on the west by lands owned by John White; in the north by lands owned by Robert and John Kennedy, and on the south by the public Highway, leading from Nerepis Road to St. Andrews Road, said lot containing by estimation one hundred and forty acres, more or less, and demised by the aforesaid Archibald Jamieson in his last will and testament to the said Eliza Jamieson. Together with all and singular the privileges and appurtenances to the same, belonging or appertaining.
Dated this 21st day of January, A. D. 1893.
WILLIAM A. BECKETT, Executor.
S. B. RUSTIN, Proctor.

GEO. W. GEROW, Auctioneer.

KEPT WARM IN THE FAR NORTH.

How Peary, the Arctic Explorer Had His House Carefully Constructed.

In speaking of Lieut. Peary's arctic home, Harper's Young People says that the general theory of its construction was to make it a series of light tight shells, inclosing several air spaces between the innermost and outermost coverings. The frames were made of six boards, ten inches wide by one-and-fourth inches thick. They rested upon three plank sills and were spaced three feet apart lengthwise of the house. Boards similar to the bottom board of the frames were placed upon the plank sills, half-way between each two frames, and these with the bottom boards of the frames formed the floor joists, spaced eighteen inches apart.

Then the floor was laid of one-and-one-quarter-inch yellow pine boards three inches wide, tongued and grooved, and solidly blind-nailed to every floor joist. Next came the roof and sides. First, heavy two-ply tarred paper was laid in horizontal courses entirely around the house, against the outside of the studs from the ground to the ridge, each course overlapping the one below, like weather boarding and nailed to each stud. Then over this was nailed the outside boarding of one-inch boards, tongued and grooved. When this boarding was finished, all the horizontal laps of the tarred paper were tacked to it (from the inside of course), to make the wind-tight joints. Then three-ply paper was put on outside of the boarding, vertical strips running from the ground up the wall, over the roof, and down the other side to the ground again. On the ends the strips ran from the ground to the edge of the roof. Each of these strips lapped the others about two inches, and laths nailed continuously from ground to ground over these laths made wind and rain tight joints. This completed the outside shell of the little house. Then came the lining of the interior. First, thick sheets of pasteboard known as trunk boards, three feet wide by four feet long, and a quarter of an inch thick, were nailed against the inside of the studs, on the sides and overhead, until the entire house was cased in.

Now if you have followed me closely you will see that the house consisted of two shells, the outer composed of two thicknesses of tarred paper, and an inch of closely fitted boards. Between these two shells was an air space varying in thickness from ten inches at the sides to over three feet in the centre of the triangular place just under the ridge. Now, as air is known to be a good non-conductor, if the air in this space could be prisoned effectively it would form the most simple, cheap and effective blanket. So all the joints in the cardboard were carefully pasted over with wide strips of heavy brown paper and made perfectly air-tight.

Poets' Resting Places.

In Westminster Abbey, which boasts in Poets' Corner are the remains of Addison, Beaumont, Ben Jonson, Browning, Campbell, Chaucer, Congreve, Cowley, Denham, Dryden, Dryden, Gay, Prior, Rowe, Sheridan, Spencer, and Tennyson. Chapman and Shirley were buried at St.

Giles-in-the-fields; Marlowe at St. Paul's, Deptford; Fletcher and Massinger at St. Saviour's Southwark; Dr. Donne in Old St. Paul; Milton at St. Giles' Cripplegate; Butler at St. Paul's, Covent Garden; Goldsmith in the Temple Churchyard; Chatterton at St. Andrews', Holburn, and Coleman at Highgate.

Shakespeare was interred beneath the chancel of Stratford Church; Waller in Beaconsfield Churchyard; Pope at Twickenham; Swift at St. Patrick's Dublin, Dr. Young at Welwyn, Hertfordshire; Thompson at Richmond, Surrey; Grey at Stoke Poges; Cowper at Dereham; Burns at Dumfriesshire; Byron at Hucknall, near Newcastle Abbey; Crabbe at Trowbridge; Sir Walter Scott at Dryburgh Abbey; Wordsworth at Grasmere; Southey at Keswick; while Falconer was buried at sea, and Shelley's remains, after cremation, were interred in the Protestant Burial Ground at Rome.

How He Sells Needles.

"You know, if I went to the houses and asked if they wanted any needles, I should receive 'No' for an answer every time," remarked an English house-to-house pedlar the other day. "Instead of that, I put a packet of needles in an envelope with a note stating I am out of work, and it would be an act of charity to purchase a packet, and adding at the end, 'I will call for the envelope and note.'"

"I deliver these at every house in a street, knocking at the door and putting the envelope in the letter-box."

"When I have delivered my samples, I go over the same ground again calling for the packages. It's a poor street if I don't sell at least half a dozen, and in the course of a day I get rid of six or seven dozen at a penny a packet."

"What do they cost? Oh, next to nothing. We give two shillings a gross for 'em, and the man who supplies us gives envelopes and paper in. You see, every packet of needles bears an advertisement on each side, and they are really meant to be given away."

"Very often we don't get either the needles returned or the money for 'em—some people won't answer the door—and sometimes we make a mistake and drop 'em in the letter-boxes of empty houses."

There are 2,300 railroad routes, covering 160,000 miles, in distance; 17,000 star routes, covering 240,000 miles; 7,000 messenger routes, covering 6,000 miles; 2,500 special routes, covering 27,000 miles; 127 steamboat routes, covering 10,000 miles. Altogether the number of miles travelled every year is 350,000,000.

Superintendent of Police Hoppe of Berlin, the best known police official in that city, is dead. He was some years ago a Prussian army officer and later an officer of the Papal Zouaves. He served as a police official of Berlin during the Franco-Prussian war. After the war the Kaiser decorated him with the Iron Cross.

He—So he failed to win your love? She—Not exactly; his failure was the precise reason he did not win it.

IN APPALING DEPTHS OF SPACE.

Stars So Far Away That it Makes One Dizzy to Think About Them.

In a recent lecture in London, Sir Robert Ball gave some wonderful calculations about the stars in space. Here are a few of his statements:

A telegraphic message would go seven times round the earth in a second, and if a telegraphic message could be sent to the moon it would reach its destination in a little more than a second. It would take something like eight minutes to arrive at the sun; but how long did they think it would take to get to Alpha Centauri travelling thither at 180,000 miles a second? Seconds, minutes, hours, days, weeks, months would not be long enough; it would take not less than three years travelling all the time at that tremendous pace before it would reach its destination. If that was the case with respect to the nearest of the stars, what must be said of those which were farther off? There were stars so remote that if the news of the victory of Wellington at Waterloo had been flashed to them in 1815 on that celestial telegraph system, it would not have reached them yet, even if the message had sped at the pace which he had indicated, and had been travelling all the time. There were stars so remote that, when William the Conqueror landed here in 1066, if the news of his conquest had been despatched to them, and if the signals flew over the wires at a pace which would carry them seven times round the earth in a single second of time, that news would not have reached them yet. Nay, more, if the glad tidings of that first Christmas in Bethlehem nineteen centuries ago had thus been disseminated through the universe, there were yet stars of which astronomers could tell them, plunged into space in depths so appalling that even the eighteen hundred and ninety-two years that had elapsed since that event would not have been long enough for the news to reach them, though it travelled at 180,000 miles in every second.

Isaac—I sell you dot eoat for nine shillings. Customer—I thought you did not do business on a Saturday. Isn't this your Sunday? Isaac (in a hushed voice)—Mein friend, to sell this coat for nine shillings vos not peesiness; dot vos charity.

Rubber Goods.

Estey & Co. have everything in the line of rubber goods suitable for this season of the year.

We give the cream of business requirements in 3 months for \$20 or \$25. First Business College to teach Business Memory. Write for information, free.
