THOUGHT IT WAS CANCER.

James McMillan, Esq., Helena Avenue, Bracondale, Toronto, Canada, writes: "I have been suffering from dyspepsia for over 20 years, and have tried every supposed cure, which in some cases gave temporary relief, but the trouble came back again with renewed force, until I almost despaired of being cured, thinking that instead of dyspepsia it must be cancer of the stomach. For the last three years I have been in agony from pain in the stomach besides other symptoms innumerable, until I could not even move about from pain and weakness. At last I saw your K. D. C. advertised and procured a few sample which I found good. I have used five packages and am free at present from pain or ache, although it is six months since I have been cured, I believe permanently."

Cravenette is the new waterproofing process which is applied to dress fabrics, whether in heavy or light weights. It is not a rubber, which is air tight and suffocating, nor is it a thin veneer which comes off with the wear, leaving the garment dusty and shabby. It is absolutely rain proof, perfectly porous, non-odoriferous, fulfilling every requisite of a waterproof, and yet it is indistinguishable from the same goods not proofed. Priestley's Cravenette never changes in appearance, as so many of the chemical processes confered upon it. See that these goods are rolled on "The Vanished Board" which is the Priestly trade mark.
