### THE FOOTBALL

The meeting of the New Brunswick tootball on Wednesday seems to vindication of the St. Jo charges made by Mon Capt. SANFORD of the M made an apology to the which is what any other and should have done in The Mount Allison season, and the Mount years to come, have lesson that they will n also probable that there ed in any way with the stitutions who does no Mount Allison men bad defeat at Moncton with an honorable second pla tion. The prime of ject o should be to play footba grievances-for there she ances to settle. It knoc from different towns agree to have a game popularity to be parodied, and many great of football, it should be a pleasing omen. poets have enjoyed travesties upon their There should be no more event of more auspicious intercollegiate or interlocal signifiance than a game of skill and strength between different colleges and towns. But if such games cannot be played without such happenings as have taken place in the New Brunswick league, it were better that there be no football. Of course, in the interests of fair play, a team feels justified in kicking if they feel that they have not been treated right. Such was probably the idea of the Mount Allison team, but it has been repeatedly. shown that there is as little sense kicking over a lost game as crying over lost milk. It should also be remembered that a referee has a much better chance of judging a point in a game than a player of either side, and if there was no reason for objecting to his being chosen as umpire, there should be no reason for disputing his decision on a close point simply because a player on either side judged differently. There are, of course, instances where umpires have qualified themselves as able and accomplished liars, and it is expecting too much of human nature to submit to some of their decisions. It should be one of the highest aims of the teams of football league to back one another up in making glaringly untair umpiring an unprefitable proceeding. But nine times out of ten, the decisions of an unexperienced referee who gives the first decision that strikes his mind when looking at a particular play-and it is the business of every umpire to look at all plays-can be relied upon as correct. And it is better to take them as correct, and charge them to profit and loss, than to make a fuss over them. Moreover football leagues should, for their mutual good, choose umpires that could in no way be prejudiced. It is far better to have a few words concerning the choice of an umpire at the beginning of a game than to have, a good many concerning his decisions after. There certainly cannot be a member of the Mount Allison team who would prefer a charge like that against the St. John team without thinking that he had abundant proof to back it up. It seems, however, that if the reports in the St. John papers-the only versions of the proceedings that PROGRESS has-are correct, the Mount Allison men's proof was woefully small. Even if the Mount Allison men were thoroughly sure in their contentions, which they undoubtedly thought themselves to be, the wisdom of making them would seem doubtful. But at present the Mount Allison men, if their charges and proofs have not been misrepresented, must be fully as sorry as they were sure.

Though vanished now their faces are, And many a storm-cloud stays; Bright memories they cannot mar,

Mr. Mitchell, Manager of the Merchants recovering from the effects of the fall he had on the is more blessed to give than receive." Tommy's a ice last week.

"We had better make up a little fire in the grate to-night," said my wife; "it's chilly sitting here without." "Yes," said I, "let us make the fire now." So I went at it, putting on plenty of dry wood and coals enough to light it nicely. But it was no use-the fire wouldn't burn. It would just spit and sputter and make a smudge fit to put your eyes out. We gave it up and went to bed early, Next morning I investigated and found the chimney nearly closed with swallows' nests. The wood was right, the coal was right, but the draught wasn't. I evicted the swallows, and cleared away their habitations. Result : Next night a good fire and pure air. Dear me! such a simple thing is hardly worth telling, is it? Perhaps not, but here is our friend, Mr. Joseph Smith, who talks like this: "I had no relish for my meals," he says. Now why not? The meals were good, he had time to eat, he needed the refreshment food would give him; but all the same he hesitated as though meat, potatoes, tarts. &c., were things to look out and guard against. This was not his habit; not at all. He and his meals had always been on the best of terms until September, 1891. Then they fell out. He speaks of it thus: "I took a chill in harvest time, and seemed to lose all power and energy. I coulda's imagine what had come over me. There was a bad coppery taste in my mouth, and what little I did eat gave me a pain at the chest and side. I was constantly spitting up a sour fluid and belching wind. Atter a while my breath got short, and I was so weak I could hardly walk across the ffoor. In a few weeks I lost nearly two stone in weight. I consulted two doctors, but was none the better for the medicine they gave me. They didn't appear to know what ailed me, One of them said, 'The sooner you get into the infirmary the better.' "On the strength of this I obtained a recommendation, and in November, 1891, I went to the Lincoln Infirmary. After being there seven weeks I returned home as bad as ever. But I am glad I went to Lincoln, nevertheless, for there I met a friend who advised me to give up taking drugs and doctors' stuff and, instead, to try Mother Seigel's Curative Syrup. I got a bottle from Mr. Sharp, the chemist, and in a few days I had some appetite. my tood agreed with me, and my breathing was easier. After that I went straight ahead, gradually getting stronger, and all the credit of my recovery is due to Seigel's Syrup. If you think fit you are at liberty to publish the facts in my case. Yours truly (Signed), JOSEPH SMITH, Rectory Street, Epworth, via Doncaster, Dec. 23rd, 1892.Mr. Sharp, the chemist named by Mr. Smith, remembers the latter's illness, and can vouch for the accuracy of his statement. Atter having read our friend's plan and clear-headed letter we need hardly ask again why he had no relish tor his meals. The reason is the stomach, afflicted with indigestion and dyspepsia, sore, torpid and inflamed, was in no condition to handred tood. The more it received the worse off it was. It was like our fire under the choked chimney-the more coals the more smoke and smudge. So the oppressed stomach sent up word to the palate, "Don't give me any more material to work on; I can do nothing with it." On this the palate spoiled its owner's appetite (in arest) and wait

work There may be even a more complicated and composite excuse for Mr. P. JAY than we have already cited. It has recently been found by Dr. OWEN, of Detroit, who left a "large and lucrative practise" to enter upon a study similar, but infinitely superior to that of IGNATIUS DONNELLY,

that that essentially busy man, the late Lord FRANCIS BACON, when he wrote, in addition to his own works, the plays and poems of WILLIAM SHAKSPEARE, ROBERT GREEN, and GEORGE PEEL, CHRISTOPHER MARLOWE'S stage plays, all the works of EDMUND SPENSER, BURTON'S Anatomy of Melancholy, and only Dr. OWEN knows what else, that he was ingeniously constructing an ingenuous composite poemone which is composed of lines and portions of lines taken in regular order from the above works which BACON wrote. This lengthy composite poem tells all the secrets | Pansy Por h, Dec. 1894.

of BACON which he was atraid of telling during his life, for fear of the wrath of his mother, Queen ELIZABETH.

Now it is likely that Mr. P. JAY thought that as the two poems which appeared in parallel columns in the Telegraph were somewhat similar in thought and diction, they might possibly have both been the work of MR. CLIMO, even as the numerous works cited above were all written by LORD BACON. When P. JAY discovered and gave to the world a poem which read along smoothly, and conveyed a distinct meaning, he probably thought that such was the intention of the writer, and preumably imagined that he was doing the writer as well as the world a service, as did Dr. OWEN in the case of FRANCIS BACON VS. WILLIAM SHAKSPEARE et al. In short, P. JAY hardly deserves the justrain concerning him which Mr. CLIMO publishes in this number. There is no

more harm in a composite poem than there is in a composite photograph. Mr. CLIMO is a gentleman as well as an artist and poet, and will doubtless be sorry that he has mistaken the motives of one who certainly did not mean to detract in any decellence of his verse.

There never was a more obliging cartoonist in this world than Mr. S. HUNTER, who furnishes the pictorial politics for Canadian syndicates. He is either liberal or conservative, just as required. In one cartoon, dasigned for the conservative press, Mr. BOWELL is depicted as the sun in all its glory, under which Canada will blossom as the rose, while in another, which appears in bered by the proprietors-the married prominent liberal journals, he is represented in such embarrassing positions, together with the country under his benighted rule,

If the newspaper reports are correct, as cannot fail to satisfy Mr. HUNTER'S pr-

bachelor still, though not a still one.

TO THE EDITOR OF PROGRESS,-As your interest. ing paper is an avowed exponent of what is fair, you will, of course, allow me space to reply to "P. Jay." It is scarcely worth noticing an as-umed name, as the public do not approve of that sheltering shield to strike at open writers, and as Mr. Hober and myself have not been afraid to affix our signatures to our productions they should have been handled by "P. Jay" under his real name. In fact, dear friend FROGRESS, would it not be a fair rule to allow no disguised writer to assail an open writer, whether for fun, derision, jealousy or envy. In mixing the lines of Hoben and Climo in PROGRESS last week "P. Jay" must have had a jolly time, as before he completed his job he must have got blind -his vision not allowing him to discover the meaning of the moon's rays on the stream reflecting the smile of her own br ght silvery beam, as-
