Unsuspected Danger.

That is What we all Suffer the Most From

AND KNOW THE LEAST ABOUT.

The Experience of Many Reputable People.

There are men, and women too, who are suffering with dull and indefinite pains in various parts of the body, who feel unaccountably weary, who are often feverish, have loss of appetite, strange bearing down sensations, general feelings of melancholy and who do not know the reason.

THE TYPEWRITER

Has ceased to be a luxurious toy. It is now an indispensable business accessory. You have been thinking of buying one for a long time, and are now convinced that you must have Writing Machine to keep up with the business methods of the age.

You Want THE BEST? Which is it? Why, THE YOST. No. 4, New Model for 1895.

IT IS THE BEST. Because of its PERFECT WORK, produced by direct printing from the face of steel type. Because of its PERFECT AND PERMANENT ALIGNMENT, secured by the wonderful centre guide, which causes every type to print exactly in line, as it is mechanically impossible to strike the paper except in the proper place.

Then the YOST PAD (which is guaranteed for six months) does away with the clumsy and expensive Ribbon, with all its train of annoying machinery to watch.

THE TYPE-BAR of the Yost is peculiar and unique. It is at once the lightest, strongest, and quickest type-bar on the market, actual mechanical tests prove that a Yost type-bar will run continuously for twenty years without being worn out.

THE POINTER. It always shows where the next letter will print. No calculation or consulting of scales required. Just move the carriage along until pointer is at the place where the next letter is desired, and it will print there.

THE SCALE on the front rail is helpful in tabulated work, and its use is generally well understood.

THE KEYBOARD is the universal arrangement, the same as used on the other machines. Each character has its own key—no shifting for capitals, etc.

Look at the Carriage of our New Machine. See how easily the paper is inserted without lifting any pawl or other device. The paper can be turned backward or forward to the place desired without effort.

The New Release Key is Very Convenient. It can be used either when the carriage is raised or lowered, and, being fastened to the left end of it, is easily manipulated. The carriage can be stopped at any desired point, and stays just where placed without moving a space or two.
