"The Board of Health returns show that grip is prevalent, and there is no doubt that the weather, and the sloppy pavements will greatly increase the ravages, and wet feet, the doctors say, are positive- ly dangerous at present. The prevailing form of influenza is milder than what it was first recog- nized here, but there were seven deaths attributed to it alone last week, and it was a contributory cause in many of the 124 deaths credited to pneu- monia. "It was said at the Board of Health office that there are now thousands of mild cases of grip in the city." The milder form of the disease, the decreased death rate, are due to the universal use of "77," Taken early, it cuts it short promptly; taken during its prevalence, it prevents its invasion; taken while suffering from it, a relief is speedly realized, which is continued to an entire cure. "77" will "break up" an obstinate cold that hangs on." A small bottle of pleasant pellets—fits your vest pocket. Sold by druggists, or sent on receipt of price, 25c., or five for \$1.
