# THE BLIND WITNESS.

"Yes; I have been in many remarkable criminal trials. Probably the most remarkable was the Gorton murder trial. The murder itself was, so far as motive and the mode in which it was perpetrated are concerned, of a character common enough, unbappily, in our criminal courts-a young girl shot by a rejected lover, mad with jealousy. But what gave to this particular case its exceptional character was the agency by which the murderer was brought to justice in a very curious and most unexpected manner."

We were in the chambers of my friend | could learn nothing. Mr. Grimshaw, Q. "Gerton is a small village, about twenty miles from Barchester, the well-known manufacturing town in the Midlands," cont nued Mr. Grimshaw. "One September evening, some fifteen years ago, the normal peace and quietude of the place was disturbed by the news that the dead body of a material point in favor of the prisoner. young lady had been found in Barton Grove, a short distance outside the village. under circumstances which left no doubt that she had been murdered. The police of the village had received information of the crime from a blind man-one of those wandering musicians who perambulate the country, f om village to village, led by a dog.

### The Wonders of a Candle.

Professor Crookes considers that had the electric light been universal at the present day the candle, if suddenly introduced, would be thought a wonderful invention. The arguments advanced would be that it enables any person readily to obtain light in its simpliest and most portable form, and without the use ot cumbrous machinery, or the necessity of attaching the lamp to any fixed point by means of wires before it could be lighted.
