Long experience has shown us, however, that it is unwise to confine ourselves to it. It is good for teaching the uses of the different kinds of commercial paper. Its weaknesses are its tediousness and cumbersomeness. By our combined methods we can teach as much in three mon has as can be got in nine months by the actual business methods alone. It is this combination, and the thoroughness of our course of study, that gives our students their stand-Our Catalogue tells about it. Send for a copy.
