It looks like sarsaparilla, smells like sarsaparilla, tastes like sarsaparilla, it is sarsa...... Stop! What is the name on the bottle? Is it Ayer? Then it is sarsaparilla; the best that is made. But the other kind, that looks and smells and tastes like sarsaparilla. What is it? That's it. It's whatisit. It's a conundrum. Give it up. Ayer's Sarsaparilla, alone, is made exclusively from the imported Honduran sarsaparilla plant, the variety richest in medicinal value and healing power. Possibly, this is why one bottle of Ayer's does as much work as three bottles of any other kind. At least, that is what people say who've tried others, and then tried Ayer's. Some go farther. There's GEORGE SMITH, Druggist, of Seymour, Conn., for example, who writes: "I will guarantee more benefit from one bottle of Ayer's Sarsaparilla than by using half a dozen bottles of any other kind." That's the sort of record Ayer's Sarsaparilla is living up to. Others imitate the remedy; they can't imitate

GREENWICH.

May 27 .- A very pretty entertainment took place at the Public Hall on Monday evening the 27th. A number of tableaux accompanied with music were very successfully carried out. The programme was as follows: chorus, My own Canadian Home, chorus and tableaux, A bouquet of spring flowers, by five little girls, Misses Lulu MeKiel, Nina Mc-Kiel, Laura Seeley, Eulah Richards and Ollie Belyea. The little tots did their parts most sweetly and prettily, a recitation, Which shall it be by Miss Georgie Belyea was very nicely given. ,Tableaux, Rock of ages, personated by Misses Edith Belyea and Minnie Seeley was is beautiful [representation. A solo Where is heaven, was very nicely sung by Miss Jennie Holder. Tableaux, The evening prayer, was very sweetly represented by

little Laura Selley, a recitation by Miss Jessie Belyea, God is everywhere, was very nicely rendered. The next a tablearx, Nearer my God to Thee, was very beautiful. The central figure in a supplicating attitude was taken by Miss Jennie Holder. The other young ladies being the Misses Winnie Seeley, Flossie Morley, Georgie Belyea, Bessie Richards, Edith Belyes, Blanche Richards, Grace Fowler, Jessie Belyea. A solo was next given by Miss Ollie Golding of St John and last, but by no means least came a tableaux, Britanina. The central figrepresenting Britannia, was very majestically represented by Miss Grace Fowler who was draped in the national flag, wearing a crown and bearing a shield and flug, at her feet were five little girls and the other figures were as follows. Misses Flossie Marley, Bessie Richards, Jessie Belyes, Winnie Sceley, Georgia Belyes, and

Sadie Belyes, bearing flags and Misses Jennie and Blance Richards, wearing sashes. Tois tableau was most enthusiastically encored. Colored fire accompanied the tableaux which helped to make them the success they were. The stage was very prettily decorated with white flowers. After the programme was finished the audience were served with ice cream, cake, confectionary etc. The hall was crowded to its utmost capacity; there scarcely being standing room. A nice sum was realized, which goes for church purposes.

Mr. Wm. Prince of St. John spent the 25th, here. Mr. and Mrs. Thos. Harrison also spent the holi day here.

SAFE WITH WARNER'S Cure.

BLOWING OSTRICH EGGS.

A Process that Should Be Done with Due Foresight and Discretion.

Dr. Joseph Palmer of the National Museum performed a rare and dangerous scientific operation yesterday four times over with remarkable and highly gratifying success. Some time in March Mr. Edward Schmid sent to the Norwalk ostrich farm at Norwalk, Cal., and bought five ostrich eggs at a cost of \$5 each. In due time says he will be satisfied if he is fortunate father. they came, and four were put in an incubator and kept at a uniform temperature for fourteen days. The fif h was sent to Arthur Gardner of Springfield, Md., an expert poultryman, who set it under a big Brahma hen.

At the end of the second week the eggs should have not only begun the process of incubation but have been considerably advanced in it. It takes forty-two days for an visible. Yet none of the eggs were thus far advanced. The method of testing is precisely the same as for hens' eggs. In a darkened room the egg is held up before the egg tester, which is simply a tin lamp chimney with a hole in one side to let out a bar of

especially if they are fertile enough to start the germ, and yet so weak that it dies in the shell. The egg is likely to explode very much as in the old laboratory experiment the soap bubbles filled with sulphuretted hydrogen break loo:e. Dr. Palmer was loath to tackle Mr. Schm'd's eggs Only the other day a man up in Connecticut was knocked over by one and covered with a quart of arrested ostrich germ, to the disgust of himself and all who can e broad stripes and rich warm blues. near him for a fortnight. Yet Dr. Palmer is a brave man and he went at his task bravely. A big tub of water was set out in the

middle of the floor, where there was a good chance for instantaneous flight. Then, placing the egg under water, he drilled a small hole on the under side, inserted a small pump within a long slender tube that passed up into the egg above the contents, and with a gentle pressure forced air gradthe white and yo'k out. In this way three eggs were safely emptied of their contents. tegrity of these eggs was somewhat reinforced and he ventured to "blow" the last one out of water. The contents were caught in a two quart cup. The shells were then rinsed within and cleansed on the outside and are now ready to be placed

on the collector's cabinet. They are beautiful in their symmetry, their curves being simply faultless. Little stipple marks or pores are scattered over them to permit air to enter, a feature absent from most other eggs.

eggs should be uppermost. The eggs now show an increasing air cell, and the yolks are more opaque than in infertile eggs. There also seems to be an opaque dot, which appears where the germ is usually seen. None of the blood-red veine, seen in a good live hen's egg at the seven'h or eighth day, have yet developed. They are due to hatch June 26. Mr. Schmid enough to hatch even one bird. He thinks he can rear one if hatched. Incubators are commonly used now in ostrich hatching in this country. The birds, when successfully reared, are very valuable .-

Mr. Gardner has not yet reported on

He made a nest of nice clean sand and half buried the egg, then put a venerable old hen on it and awaited results, in all ostrich egg to hatch. By the eighth or tenth day the germ should be distinctly The second set of eggs have been in the incubator now for over a week, and seem to be fertile. They rest on cotton, and a thermometer is laid by th m on a small frame, so that the bulb constantly touches an egg. It is necessary to turn them every twelve hours, and Mr. Cugley, who has charge of the incubators, has put a big

been incubated for any length of time, | with other thinge, it shows evidence of good design and that improved color which is so excellent a thing. It is still sturly, still strong, and can be trusted to endure all sorts of usuage, so that in its later designs it is capable of many things.

The couches and the divans that are so popular and so delightful are excellent when upholsterel with this simple stuff. and out-door pillows and cushions are simply perfect when covered with its

The fact of its being cool of texture, as well as strong, makes the cloth peculiarly desirable for the summer months, and many are the delightful results that can be obtained by its use. Window seats upholstered with the broad blue and white, or brown and white, stripes are both handsome and serviceable. The material that was designed for awnings is necessarily strong and durable, so that even the scramble of the little people and such conually into the shell, which in turn drove stant use as the favorite window is sure to get will do no harm. The colors will not fade, the cloth will not easily sag, and By this time Dr. Palmer's faith in the in- withal the seat will be quite as handsome as though the coat had been double, or even more.

Shoe Cabinets.

The furniture makers are showing a beautiful article of mabogany and glass, which reminds one of the cabinets for brica-brac, but it is more substantial and its legs are shorter. It is made to hold a woman's shoes and to s'and across the corner of her dressing room, has three plate glass shelves and a drawer, which holds the polish and small articles for repairs.

Appreciating a Good Thing.

"When I grow up," suid little Jack to his father. "I'm going to be just like you, papa."

"That's sweet of you to say," said his

"Well, I mean it," said Jack., "What a snap you have with mamma around to wait on you.
