## PROGRESS.

### 

- All Letters sent to the paper by persons having no business connection with it should be accompanied by stamps for a reply. Manuscripts from other than regular contributors should always be accompanied by a stamped and addressed envelope.
- Copies Can be Purchased at every known news stand in New Brunswick, and in very many of the cities, towns and village of Nova Scotia and Prince-Edward Island every Saturday, or Five Cents each.
- Discontinuances.-Except in those localities which are easily reached, PROGRESS will be stopped at the time paid for. Discontinuances can only' made by paying arrears at the rate of fiver ents per copy.
- Progress is a Sixteen Page Paper, published every Saturday, from its new quarters, 29 to 31 Canterbury steeet, Sr. John, N. B. Subscription price is Two Dollars per annum, in advance.
- The Circulation of this paper is over 13,000 copies; is double that of any daily in the Mari-time Provinces, and exceeds that of any weekly ublished in the same section.
- Remittances should always be made by Post Office Order or Registered Letter. The former is preferred, and should be made payable in every case to EDWARD S. CARTER, Publisher.

Halifax Branch Office, Knowles' Building, cor. orge and Granville streets.

Now the Question.

tion is by the clothing. A photograph of a sun stroke case is said to be of little about it, the bardware contract affair has value because of the change in appearance developed something of a good sized and the official description is next to impossible to make distinction, except in scandal. Not that the amount at stake is cases where the victim has some marked a great matter, for it has been shown that

> H. Fuller and Co. and Ald. Musgrave caught on to the situation. The mystery of the first price list in the board of works office on which Black Brothers were being puil, and which was \$88 higher than Fuller's tender, has not been cleared up. It is yet a mystery of the most decided character. Had Ald. Musgrave not started his investigation when would that bogus price list have been taken away and how long wou'd Black Brothers have been drawing the advanced figures? Ald. Musgrave thinks it might have gone on all summer, and there is no one who can say it would not, and the city thus have been out to a considerable extent.

> Where did that unclean price list come from, and how was it that Black Brothers May and June bills agreed with it? That is a conundrum which the combin d wisdom and detective skill of alle:men and lawyers have not been able to solve. The origin of that price list no man can disclose, except that Clerk Reilly says Engineer Johnstone give it to him. Johnstone denies this.

> Mayor McPherson was a terribly enraged man all this week. He found it impossible to speak civilly to Ald. Musgrave who brought the charges. At the first meeting of the committee the mayor was a picture of unsubdued rage. Musgave stood it well. All. Redden, at committee meetings, assumed the

VERSES OF YESTERDAY AND TODAY

Lullaby in Acadie, Out of a window in heaven above, An angel let earth-ward a ladder of love; Descended and came with a cherub of light, To our arms on a clear October night.

A love song too did the angel sing. Folding beside us its snowy wing; This is the baby the angels miss. Transported here with a parting kiss.

We took the heavenly cherub in, Sent by the angel our love to win: To all that is beautiful here and new, To all that is lovingly pure and true. A gleam of light in the dark night's gloom.

From the angel's face came into the room; And the baby slept when to us it came Fron heaven, into a world of shame. But the tear on its sweet face brought a smile,

When the angel said "but a little while;" But a little while we will leave you here, Some day we will come for you baby dear.

That was the angel's song, this one is our's, Sung to 'Greenville' tune sweeter than flowers:

Mothers are singing it all through the land, Beautiful baby song-they understand. Rock a bye my darling baby, Angel baby go to sleep; Mother's foot is on the cradle, Mother's love is true and deep. Mother loves her darling baby, Baby sees the angels keep; Watch and sing to mother's 1 wel. Sleepy baby, sleeping, sleep.

Byelo bye, my sweetest baby, Father too is coming soon; Father come and see the baby, Sleeping like a rose in June. Mother rocks her baby singing, Father come and take a peep, Baby days are ever winging; Sleepy baby, sleeping, sleep. Byelo bye, my darling baby, Peace is on her closing eyes; Soon enough come later trials,

All too soon come cares and sighs, Mother's baby soon will know them, With the sun life's changes creep; Mother too was once a baby, Sleepy baby, sleeping, sleep.

CYPRUS GOLDE.

Little Ah Sid. Little Ah Sid Was a Christian kid, A cute l tile cuss you'd declare, With eyes fu l of fun And a nose that begun, Right up the roots of his hair.

AN EARLY MORNING RACE. A Janitor and Hotel Clerk Test the Merits of Their Horses.

The Marsh road was the scene of a horse race a tew mornings ago that was none the less int resting because its conditions were novel. The principals in the event are both well known young men about town. One is a clerk in a city hotel while the other, a well known innitor, has a horse which he thinks is about as speedy as any flyer he knows of; and the hotel man can frequently be seen holding the rains over a stylish grey mare. On a recent evening last week while both gentlemen wers in the hotel office in company with several friends, the conversation turned upon horses and horse racing and quite naturally the junitor said his horse was as good a road horse as any hereabouts. In fact he went so far as to offer to wager the hotel min \$10 that his horse could beat the hotel man's in a race on the road. Not to his surprise his offer was at once accepted and \$20 was soon placed in the hands of a mutual friend. It was agreed to hold the race thenext morning at six o'clock on the Marsh road. The conditions were that both horses should be started at the Marsh bridge and when the word go was given, were to be hurried into a gallop and headed for the three mile house the man that covered the distance between the bridge and McEvoy's first, would of course win the race.

When the morning arrived the hotel man was first on the scene in a light rig ready and eager for the fray. The janitor soon after appeared driving a sulky. A starter was chosen and both teams lined up. When the word was given the janitor's horse took the lead and for a time it look- shock only twenty-four hours. The line of ed as though his rival would be badly experiment in which Lilienthal had dis-

the chilled melon with the meringue, letting it come down to the edge of the dish. Place the dish on a board at least an inch in thickness and keep it in a moderate oven just long enough to lightly color the mergue and serve at once.

A handsome dish is made thus: Cut the watermelon in squares, round, or any shape you may fancy. Perhaps on 3 of the easiest shapes is triangles. First cut out the me on in thick slices, then cut each slice in quarters, and cut the rind and white part off in one piece. That will leave triangular pieces. Put them into a refrigerator until they are cold. If the melon is wanted quickly, pile the pieces in an ice-cream freez r, pack the freezer, and let the melon remain long enough to become cold. Make a meringue as in the above recipe. Take out the pieces of cold melon and arrange them on a cold platter, heap a spoonful of the meringue in the centre of each piece of melon, and return to the refrigerator.

A delicious pick'e may be made with the white part of a watermelon rind. Cut the green rind off as thin as possible, scrape off the so't part and cut the pieces into finger strips.

Wash and put them in a preserving kettle. Di solve an ounce of alum in one gallon of hot wster and pour it over the rinds. Let them stand on the b ck part of the stova half a day; let them lie in clear water until they are cold. Boil together one quart of vinegar with two and one-half pounds of brown sugar : skim and then add one ounce of stick cinnamon, balt an ounce of whole cloves and the prepared rinds which have been drauned, and co k half an hour. Put into j rs and cover.

A SACRIFICE TO SCIENCE.

Prof. Otto Lillenthal an i His Experiments with Flying Machines.

Prof. Otto Lilienthal of Berlin was experimenting with his flying machine last week when the balance of the apparatus was lost and scaling to the ground so injured the inventor that he survived the tinguished himself was that known a scaling fight. His machine had great wings, which, however, had not the amplitude of movement, common in wings as we understand them, and they could be trimmed rather than flapped. His method of sailing was to get on some moderate height where there was a more or less precipitous side, and jumping off, glide gently down on an aerial incline until he could sately make a lunding, his legs being below the body of the machine and free for precisely that purpos .. His experiences were of many kinds, and he contributed many facts to the sum of our knowledge of conditions of equilibrium in the air. While his motion was in general downwards, still this was not always the case, for on encountering currents of air he would be lifted more or less, so that his downward progression was through a series of curves of which the convex side lay below. On one occasion, when his apparatus was struck by a propitious gust of wind, it is said that he even rose to a greater height than that from from which he started. This and other matters gave him g est encouragement and he had just constructed a larger machine for his experiments and was looking forward to exceedingly important results. Those who know about the action of the air have urged against his methods the argument that in encountering adverse gusts of wind there would be a risk of upsetting the machine, in which case it would scale from side to side as does an ordinary sheet of paper when let drop freely through the air, but it appears that Lilienthal, hoping to overcome this difficulty, had arranged for some kind of ballasting device which would make his means of aeronation less dargerous. The accident occurred, however, with his old machine, which was not su fitted. The meagre details of the accident seem to show that the conduct of the parachute, for such it really was, was very nearly that predicted, for the machine turned several somersaults and then scaled to the ground, a motion which, as everyone knows who has flown kites, is exceedingly rapid as the ground is neared. Lilienthal had chosen a venturesome method of research, for it involved in every experiment the carrying of a human body, but in this he had always the courage of his convictions and did not hesitate to be himself the man who was to run toe risk. No very serious accident had occurred, although as in our own Blue Hill experiments along the same lines an ochasional Lilienthal's idea was quite different from those of the majority of the inventors of the day. He sought to make the wind carry him by trimming his macaine according to

# THAT HARDWARE SCANDAL. Where Did the Price L'st Come From is HALIFAX, August 20 -There is no doubt

the city loses nothing; but the reason it loses nothing simply appears to be that H.

Very careful examinations have been made to discover the secret of the exceptional longevity, the mathods of life, the regimen, and the peculiar physicial constitution of

lion of collars.

The b'oomer question has almost entirely disappeared before the important one of the bicycle versus the corset. It is said that fair riders of the wheel are gradually becoming less strait-laced.

WILLIAM JENNINGS BRYAN says the president of the great republic to the south of us, is simply "a hired man." Mr. BRYAN is after the \$50,000 hired man's job, however, and there are others who wouldn't throw it over their shoulder.

The people who are exciting themselves. during the silly season, by the propriety or impropriety in men and women clothed from head to foot, the old bathing suit chestnut to the con'rary, going under the waves together have possibly had no ex- live. perience of a good, strong hot wave like that which swept over St. John last week, otherwise they would find that the great thing is to have waves to go under without any reference to convention lities or unfitness. These over scrupulous individua's should apply the proverb which imputes evil to him who thinke'h evil.

There is considerable romance connected with NANSEN'S unexpected meeing with Explore: JACKSON amid the icy waters of Franz Joset Land; and the general dramatic effect is heightened by the fact that it was due to the barking of a dog. who for so long has well held the claim as man's devoted friend. The returned hero of North Po'ar fame has especial cause to pat the shaggy heads of the Eskimo dogs affectiona'ely hereafter. In order to satisfy the demands of hunger among the pack his own dogs had to be killed one to Chief O'Sullivan. The lost all his dogs as well.

Whthin two months two famous women have joined the great m jority and strange to say both had exerted considerable influence upon American politics and national life in the last half century. Mrs. HAR-RIET BEECHER STOWE who died recently and Miss MARY ABIGAIL DODGE who wrote under the non de plume of GAIL HAMILTON, whose death occured a few days ago, bo'h began their famous careers in the National Era, the old organ of the Abolitionist movement in which Mrs. STONE published ' Uncle Tom's Cabin. GAIL HAMILTON'S greatest influence was exerted through JAMES G. BLAINE whose wife way her cousin. Mr. BLAINE proudly acknowledges the intellectual sympathy which existed between his brilliant relative and him elf; he bore testimony to the aid she rendered him and made her his literary legatee as well as biographer. Her

i's who died at a much less age would have been passed by any life insurance examiner as having an equally long expectation of lite. The physical machine of the dead wis as good as that of the living according to scientific tests applicable by a physican. It would then seem that there is some ground for the assertion the existence of centenarians. that

physical peculiarity.

A celebrated English physician and

writer says that seven out of every ten

sound and reasonable people ought to live

to be 110 years old, and assuredly would

if they took proper care of themselves.

The fact that there have been centenarians

and that some are still in every country is

proof that human machinery is capable of

lasting as long as the physician martioned

says it should. New Brunswick has several

who have started on the second century

long, why should not the many

be able to reach equal fu'ness of years.

these respects does not se m to be very

great. At any rate no facts have been

obtained which will render the attainment

of such longevity easier. Some of the

centenarians are remarkable for their

abstemiousness and the care they take of

who do not wilfully throw away

their stock of vitality. They have

reached the great age without any special

effort to reach the distinction; they nat-

urally porsess constitutions capable of great

endurance but in that particular they are

not peculiar. Many of their contemporar-

if thy few can live so

tew though they may by, is sufficient evidence that equally long life is not only possible for all who have sound constitutions, but ought also to be the rule. It is proved beyond any dispute that life can last very much longer than the run of men keep it, and that of itself it is good for the 110 years which it is claimed the majority

SHY ABOUT PAYING TAXES.

of people with good constitutions should

Several Halifax People who Object to Paying dog taxes.

HALIFAX, August 20.- There is no use disguising the fact that a man cannot keep a dog in this good old city of Halifax without paying a tax upon the canine. This truth has been proved before, and this week it was again attested to. The police made their usual tour of investigation for delinquent dogs and they have found many whose owners tried to enjoy the luxury of keeping a dog without contributing there or to the city the small compensation of \$2 per canine. The rich man's hous?, as well as the poor man's cottage, was examined, and the dog that was found with no evidence of annual payment to the civic exchequer might have immediately seen his owner's name reported next after another. It is a strange reflection as etep was the issuing of summons to to what might have happened to NANSEN these owners to appear in the city police and his solitary companion had JACKSON court along with the ordinary cases of "drunk and disorderly". Here are the

names of some of the men who were ordered to appear before h's honcr Stipendary

> Chas. Roche, J. Wainright, Fred Tomkins. Arthur Iremaine Chas. J. Curran, W. B. Slayter, W. R. Slayter, George Monoghan,

A. C. Hawkins, M. D. Henry Rogers.

day and as a result of the trial H. M. Wylde was sentenced to pay a fine of \$1 or to serve a period of 30 days confinement in the city prison. Curren [and Tomkins shared the same tate, Dr. W. B. Slayter, Major Tratman, Arthur Tremains and

of a sort of defender of role worship in opposition to Ald. his Musgrave who was his assailant. Ald. Hamilton, and spenally Ald. Foster kept as far away from the active hostilities of the fray as they could. Ald. Foster was chairman and did his best to keep the angry passions of the mayor, and any other possible fighter within due bounds, and he well maintained the imparality of a judge.

"Where did Reilly get that list?" is what people are saying now about the streets of Halifax.

High Class Instruction at Mount Allison, The Mount Allison ladies' college, the advertisement of which may be seen in another colump, is the oldest Protestant institution in the maritime provinces devoted to the work of the higher education ot young women. It was established 42 years ago, and his an interesting and inspiring history which shows that it has always been in the van of educational progress. During the past few years this institution has been advancing by leaps and bounds. Since the eraction of the musical conservatory five years ago hundreds of students have been attract d to its walls where they have enjoyed many of the highest musical advantages our country affords. The calendar for the current year announces the engagement of a splendid staff conse.vatory teachers, every one whom has had the advantage of residence and training in the great musical centres of the world. A handsome stone building erected at a cost of \$26,000 was opened two years ago for the reception of the Owens magnificent collection of paintings and models. Students may here pursue the s'udy of art under the direction o'one of Canada's most distinguished artists. The college maintains in the literary department the highest character for excell ence. All grades of literary work are taught by efficient and experienced teachers. It also provides a christian home where, under its fostering care and ennobling influence, the daughters of our land may receive that culture of head and heart which shall best fit them to discharge sright the duties and responsibilities of life.

#### Afraid of Lossing Him.

They were from Nova Scotia or some of the rural districts of this province. They were four in number, two young men and two young women. They were visiting Saint John probably for the first time, at least that is the way they looked. They had raired off and were going down same fate, Dr. W. B. Slayter, ratman, Arthur Tremain3 and wer3 remanded, and the case . F. Pickering was dismissed. Would not have cared if they did. The John Hill wers remanded, and the case tract attention and it is quite likely they

And bra ded his cue The same as used to. In China-land, far away. Oace o'er a lawn That Ab Sid played upon, A humble bee flew in the spring. "Melican butterfly!" Said he, with winking eye "Me catchee and pull off um wing." Toen with his cap He struck it a rap, This innoc nt humble bee, And put its remains In the seat of his j ans, For a pocket there had the Chinee.

Down on the green Sat the little Sard ne. In a styl + that was strangely demure, And said with a grin That was brimful of sin, "Me mashes um butterfl sure. Little Ah Sid. Was but a kid, Nor could you expect him to guess, What kind of a bug He was holding so snug In the folds of his loose fitting dress "Ki ya ! Ki vip pe !" Cried Ah Sid, as he

Rose hurried y from the spot, "Ki pi ? Yuk a kan Dam um Mel can mun-Um butterfly berry much hot ?"

Song of a Southwest Karsan. O tell me, my friend, oh tell if you know,

Of a land or a clime where eatables grow, Waere equashes and beans will live and Where everything looks as if it's aliv?, Where the earth is green with its growing herb,

Where bugs and grasshoppers never disturb. Where the fruit hangs down in bunches on trees, And is not blown off by the passing breeze; Where the fields are ripe with the golden grain, And the grass is wet with the falling rain; Whe e cabbage is raised and turnip; lock fine,

And the wheat comes up one year out of nin Where ninety degrees is thought to be hot, Where stock have shelter in pasture and lot; Where the rain comes down to water the earth. And all nature sang in gladness and mirth; Where blasting hot winds are a thing unknown; O tell me, my friend, I'll fly to that zone. Where farmers get fat on what they've eaten, And feel like singin' and prayin' in meetin', And praisin' the Lord for what he's given. And feel it's a j by to be a livin' And a layin' up coin for a rainy day. To be u ed by them when they're old and gray.

I tell you, my frien', if you're living there, And you have enough with something to spare, You're about as near to the better land

As morta's will get, or can often stand. If you think I'm wrong, do p'ease come out here, And stick to farming for about a year. -Cinnamon (Kan ) Cor. N. Y. Press.

The Tree and the Vine.

On the breeze of years ago was blown, To the arms a spreading elm uplifted Tiny seed the wind afar had drifted, Then on bed of earth and mosses thrown. It has grown. In a foil, the dust of decades drifted.

Coughed upon that gaint trunk it grew, Where the softened sunlight penetrated Nature's sweetest lyric it translated, Softly as the healing heavenly dew,

Softly as the heating heavenly dew, Oaly few E'en observed, how tree and vine were mated. When the spring with gentle hand had prest, Tender leaves from folded buds held sleeping, O'er the soaring limbs in beauty creeping, Vine and tree joined in a verdant crest, Each contessed, Latent power within the other's keeping.

For the sap that leaf add tendril drain. On the old tree was the vine dependent, While the mantle autumn made respinedent, O'er the somber ein the vine had lain, Service sweet returned makes love transcendent -Arthur Howard Hall.

#### Delayed Blessings.

God's great storehouse, safe from moth and mold

beaten and so he was, though not by any distance to boast of. In fact the finish was so close that another race is talked of. The horse that won is not a han isome animal but possesses such powers of endurance and gameness that her joint owners are quite willing to back her for any reasonable amount.

POSSIBILITIES OF WATERMELONS. Desserts Which are Both Tempting and Re-

freshing at This Hot Season. What can be found more tempting and refreshing at this heated season than a cut of watermelon? The blending of the beautiful green, white, pink, and brown shades makes a picture that attracts the artist's eye besides pleasing his palate. And when one can secure the melons home grown they form a delicious dessert.

To be good, melons should be very cold and it one's principles are not against the use of a little wine it is a great addition. The melon may be plugged. Cut a small piece from a cold melon, pour some champagne cr sherry into the heart of the melon replace the pluz, and leave the fruit at least an hour longer upon the ise. When it is time to serve the melon take it from the ice, wipe the outside with a clothe, and place it in the cen're of a platter. A honeysuckle vice, grape leaves, or any fresh green will be found ornamental to put on the outer rim of the platter. With a sharp knife cut through the middle of the melon in long points, letting the knife go half way through the fruit each time. Full the sections apart, letting the ends fall back, showing the fine coloring of pulp and seeds in sharp spikes on a bed of green. Serve with a tablespoon, taking out the pulp in oval-shaped balls.

Watermelon ice or sherbet is exceedingly nice. Cut a ripe watermelen apart, take out the pink part, rejecting the seeds, and with a silver knife cut the pulp into small pieces. Put this into a packed ice-cream freezer. Squeeze the juice from one large lemon and make the juice into a thick syrup by stirring powered sugar with it. turn the juice into the freezer and stir with the melon. Cover the freezer and let the melon remain twenty minutes, turning the bester around every three or four minutes so that the pulp shall freeze evenly. It should be like snow, not a solid mass. Stir in a little sherry and serve in sherbet glasses for a desert on a hot day. This ice is particularly nice for a cooling | minor fall was experienced. refreshment on a verands on a summer's evening.

Watermelon a la surprise, or baked watermelon, as it is commonly called, the needs of the occasion, while others seek makes a delicious summer dessert.
