MITHER LOVE WON.

Nearly Ten Years fecuring a Pardon for Ber Boy.

The signature of President McKinley to the pardon of C'yde Mattox was the sequel of a pathetic story of heroism, devotion and self-sacrifice unparalleled save in the fi-ld of fiction For eight years a woman has worked unremittingly to save an only son from an ignominious death on the gallows or a life condemned to be passed within the walls of a state prison, From the first trial in the United States Court for Kansas to the Supreme Court of the United States, and finally to the highest power in the land, the has gone with her prayers and her tars for mercy. Wives of lawyers and judges who prosecuted and sent need her son have aided her with money and influence, and eminent lawyers championed her cause with no hope or expectation of reward. So great is a mother's love, so power'ul are a mother's tears. And this is the story :

With the first rush of settlers into Oklahoma on the opening of that country there came from the South Mrs. Hatch, widow of Dr. Hatch, post surge on in the Union army, and her only son, Clyde, then a high-spirited, handsome boy of 18, possessing, largely by inheritance, all the characteristics of the Southern race. Mrs. Ha'ch and her son settled in Oklahoma City, which was then rent in twain by a fierce factional township fight. Excitement ran high. Young Ma'tox was appointed a deputy marshal, and, like many of his o'der brother officers went armed.

One night in the tall of 1889 he was out with a boon companion, a young physician from the South. There was the usual amount of drinking and carousing, and a colored man was shot and killed. His companion made his escape, but Mattox was arrested and taken to Wichits Kan., where a year later he was tried in the United States Court, convicted and sentenced to death. An appeal was taken to use in the body. One of these is uric acid the United States Supreme Court, which affirmed the judgement of the lower court, three of the judges of the Sipreme Court dissenting from the decision in an opinion which has attracted the attention of the legal profession throughout the country, and by many is regarded as a much stronger and clearer exposition of the case than the majority decision.

Upon the decision of the Supreme Court Mattox was resentenced to death, and was removed from Wichita to the Topeka jail to wait his execution. Thither his despairing and heartbroken mother whose meagre fortune had already become exhausted in the heroic but futile struggle made to save her boy, removed and went bravely to work on the almost helpless task of securing a pardon from President Cleveland. Being a woman of refinment, with a beautiful face framed in permature white hair, she aroused sympathy for her great sorrow from all. She secured petitions from the leading people of Oklahoma, and letters and recommendations from the judges and attorneys who had been instrumental in the conviction of her unfortunate son, and, proviled with money raised by the wives of the State officials of Kansas, she came to Washington to see President Cleveland

Upon her arrival here she learned that the President was at Buzzard Bay, and thither she went, with her great sorrow. She secured an audience with Mr. Cleve land, and told him with tears, the pitiful story of her mission She pleaded in extenuation her son's extreme youth when the killing occurred, and the peculiar conditions of his surroundings. The President 1 st ned attentively and gave her assurance that the case should receive his earliest consideration and she was forced to return West in doubt as to the result of her mission.

Weeks pased, and no word came from Buzz ard's Bay. The day fixed for the execution drew near, and still no sign that her plea for mercy would be heeded. The gallows was erected, and all the dreadful preparations completed for the awful event that would forever blast her life. Twelve hours before the time set for the execution when all hope had been abandoned a message came from Buzzard's Bay commuting the sertence to lite imprisonment.

Through faith, courage and perseverance. under adverse circumstances, this noble woman and loving mother triumphad at last. After four months of weary waiting, Mrs. Hatch's attorneys placed in her hands a full and unconditional pardon for her son. Three hours later the limited express as it sped westward through the darkness, bore a blackrobed woman, whose radiantly beautiful face illy contrasted with the gray hair that framed it. Black Bile and Melaucholy.

The ancient Greeks believe that the soul resided in the liver, and that the chief duty of the liver was to make black bile, and that black bile and melancholy were one and the same thing. We have learned that there are other causes of melancholy than misplaced bile, but few more efficent than a disordered liver. Probably the chief duty of the liver is to burn up, or oxidise. c rtain substances no longer of a product of partially digested food and of worn-out tissue cells-that is, bodily substance. Well, when there is more of this thrown into the liver than it is able to dispose of, it sulks a while, and then turns everything upside down in its efforts to expel the intruder. This is a billious attack; and a proneness to such a tacks is what Mr. Peter Knight means when he says he suffered fitteen years from liver complaint and pleurodynia.

Pienty of people who read this little story will thoroughly understand all the experi nces which he, and Mr Sampson at r him, briefly describe.

"I felt languid and heavy," says Mr. Knight. "My appet to was variable, and I suffered from a stabbing pain in the lett

Rules For the Guidance of Children 200 Years Ago.

The Strand, in a recent article, reprinted several pages from a little book published a'most two centuries ago and entitled 'The School for manners, or Rules for Children's Behavior at Church, at Home, at Table, in Company, In Discourse, at School. Abroad and among Boys.' (This last, by the way, suggests that the 'rules were destined more especially for the guidance of little girls). The brochure was printed by 'Tho. Cockerill, at the Three Legs and Bible against Grocers-Hall in the Poultrey.' The few extracts which we reprint, says Truth, ssem to indicate that the little tolks in 1701 were subjected to about the same kind of 'don'ting' that prevails nowadays; there are one or two of the rules, however, which no nineteenth century mother would ever find it neces sary to include in her list.

A Mai e Weman Compliment d.

An interesting incident has just leaked out concerning the wite of one of the Maine delegation. It is anent the recent dinner given by President McKinley to President Dole of Hawaii, upon which occasion Maine was largely represented. The day before the affair President McKinley was in New York. He met one of the Maine delegation there, and just as they parted the President said: 'I shall see you at the dinn r tomorrow evening.'

'I'm sorry, but I can't be there,' replied th : Maine man.

'That's a shame,' said the President, but your wite is coming?"

'No, she won't go without me,' was the

'You tell her that she must, that t'e President says so,' and the two separated. About an hour later a telegram was received in Washington by the wife of this same Maine man, It read: 'You must be sure to come to my dinner party tomorrow night,' and signed 'William Mc-Kinley,'-Lewiston Journal.

Fun With the New Boy.

The office boy in the reporters' room has been encouraged to try again. Here's his latest: 'A fresh boy in the office of an uptown business concern had some fun the other day with the green office boy who had his first day to work. Wh n the newcomer came to work the boy was told by th: foreman the work he was supposed to do. Forgetting something the boss had told him, he thought he would ask his partner, whose name was Johnnie. Going to him, he said: 'The boss told me to take a bucket to the cellar and get something, but I can't remember what it is.' 'Oh! I will tell you,' said Johnnie. 'He wants you to go to the engineer and get a bucket of steam; it he ain't got steam, get electricity.' The boy journeyed to the cellar and tried to explain to the engineer what he wanted, but the engineer could not understand, and, after getting a little ratil d, he yelled to the green hand to go up and see it he didn't make a mistake and w nt ed a left-hand monkey wrench instead The boy went home that night, but has not yet returned.'-Philadelphia Record.
