Put Iron In the Blood.

It Flakes the Blood Red, the Cheeks Rosy, and Restores Vigor and Vitality to Every Organ of the Body.

In Other Words, Use Dr. Chase's Nerve Food.

The blood is composed of certain elements of nature which are supplied in the food we eat. During the winter season the food is of an artificial nature and not sufficiently varied to properly sustain the quality of the blood. Consequently very many people suffer in the spring from the results of thin blood.

A pale face, and more especially paleness of the lips, gums and the inside of the eyelids, tells of weak, watery blood. There are languid, worn out, despondent feelings, lack of energy and appetite, weakness and irregularities, and frequently stomach disorders, headaches and nervous troubles.

To say that the blood is thin, weak and watery is to mean that it lacks iron and other elements, which are found in Dr. Chase's Nerve Food. Put iron in the blood and you will help nature to overcome the ills of spring. Use Dr. Chase's Nerve Food and you will supply to the blood not only iron, but all the most effective elements of nature which go to make the blood rich and red.

Through the medium of the circulation of the blood, and the nervous system, Dr. Chase's Nerve Food has a direct influence on every organ of the body. It tones up strength and revitalizes the system, reconstructs the wasted tissues, creates new nerve force, and prevents and cures diseases caused by weak blood and exhausted nerves.

Are you pale and weak? Put iron in the blood by using Dr. Chase's Nerve Food. Do you need a spring restorative? There is no preparation to be compared to Dr. Chase's Nerve Food as a blood builder and nerve restorer; 50 cents a box, at all dealers, or Edmansson, Bates & Co., Toronto.
