ITCHING SKIN.

In any Form, Whether Eczema, Salt Rheum or Piles

> Is Relieved at orce and Permanently Cured by

Dr. Chase's Ointment.

One of the strongest endorsements any remedy can have is its adoption by the medical profession as the standard treatment for the ills for which it is recom mended. Such is the position of Dr. Chase's Ointment today.

DOCTORS USE IT.

Before the intioduction of Dr. Chase's Ointment doctors admitted that they could not cure Eczema and Salt Rheum, and usually resorted to the surgical operation for piles. Now they use Dr Chase's Oint ment and know of no such thing as failure.

Of course they don't always tell their patients what they are u ing nor do they give the treatment in the original package; but nevertheless they continually order it from these offices for use in their practice and recognize it is the only absolute cure for piles and itching skin diseases.

DOCTORS ENDORSE IT.

Canadian dectors are no less enthusiastic than their American brothers in the use of Dr. Chase's Ointment, but on account of to have their nam a mentioned in public print. If you are in doubt regarding the wonderful virtues of Dr. Chare's On tm 1 t ask your family physician. He k ows its record in the past and will endorse it in the strongest terms.

There never was, and never will be, a universal panacea, in one remedy, for the ills to which flesh is heir—the very nature of mans curatives being such that were the germs of other and differently sested diseases rooted in the system of the patient—what would refieve one ill in turn would aggravate the other. We have, however, in Quinine Wine, when obtainable in a sound unadulterated state, a remedy for many and grievous ills. By its gradual and judicious use, the frailest systems are led into convalescence and strength, by the influence which Quinine exerts on Nature's own restoratives. It relieves the drooping spirits of those with whom a chronic state of morbid despondency and lack of interest in life is a disease, and, by tranquilizing the nerves, disposes to sound and refreshing sleep—imparts vigor to the action of the blood, which, being stimulated, courses throughout the veins, strengthening the animal function of the system, thereby making activity a necessary result strengthening the frame, and giving life to the directive organs.
