Miss Emma McLachlan, who has been with her sister, Mrs H deBlois, since Christmas returned to Lunenburg last week.

MOST PEOPLE OPSIDED.

Difference Between the Legs, Eyes and Ears of Men and Women.

The two sides of a person's face are never alike. The eyes are out of line in two cases out of five, and one eye is stronger than the other in seven persons out of ten. The right ear is also, as a rule, higher than the left.

Only one person in fifteen has perfect eyes, the largest percentage of defects prevailing among fair-haired people. Short sight is more common in town than among country folk, and of all people the Germans have the largest proportion of short-sighted persons.

The crystalline lens of the eye is the one portion of the human body which continues to increase in size throughout life and does not cease with the attainment of maturity.

The smallest interval of sound can be better distinguished with one ear than with both. The nails of two fingers never grow with the same rapidity, that of the middle finger growing the fastest, while that of the thumb grows the slowest.

In fifty four cases out of a hundred the left leg is stronger than the right. The bones of an average human male skeleton weighs twenty pounds; those of a woman are six pounds lighter.

That unruly member, the tongue of a woman, is also smaller than that of a man, given a man and a woman of equal size and weight. It may be appalling to reflect but it is nevertheless true, that the muscles of the human jaw exert a force of over five hundred pounds.

The symmetry which is the sole intelligible ground for our idea of beauty, the proportion between the upper and lower half of the human body, exists in nearly all males, but it is never found in the female. American limbs are more symmetrical than those of any other people.

The rocking chair, according to an English scientist, is responsible for the exercise which increases the beauty of the lower limbs. The push which the toes give to keep the chair in motion, repeated, makes the instep high, the calf round and full, and makes the ankle delicate and slender.

British women are said to average two inches more in height than Americans. Averages for the height of women show that those born in summer and autumn are taller than those born in spring or winter. The tallest girls are born in August.

As far as boys are concerned, those who first see the light during autumn and winter are not so tall as those born in spring and summer. Those born in November are the shortest; in July, the tallest.

An average head of fair hair consists of 148,040 hairs, dark hair of 105,060, while a red head has only 29,200. Fair haired people are becoming less numerous than formerly.

A person who has lived 70 years has had pass through his heart about 675 920 tons of blood 675,920 tons of blood, the whole of the blood, in the body passing through the heart in about thirty two beats. The heart beats on an average of seventy times a minute, or 36,792,000 times in the course of a year, so that the heart of an ordinary man, 80 years of age, has beaten 3,000,000,000 times. The heart beats ten times a minute less when one is lying down than when one is in an upright position.

Vain Precaution.

'With the idea of naming my boys,' said a white-haired man, 'so that there could be no nicknames—which I have always detested—in the family, we called the first Edmund, the second Edward, the third Edgar, the fourth Edwin, the fifth Edson, and the sixth Egbert.'

'That surely served your purpose, didn't it?' asked one of the listeners.

'Not at all,' rejoined the patriarch, rather shamefacedly. 'Beginning with the eldest, they were known as Eddie, Chuck, Bim, Snorkey, Muggins and Pete, and every mother's son of them answered proudly to his nickname.'

'Why are each of you ladies so desirous of becoming president of your debating society?'

'It saves time,' answered Miss Cayene. 'When you are in the chair you are able to snub so many people at once.'

Save! If economy begins at home... better discard the old-fashioned powder dyes and use Maypole Soap... Maypole Soap 10c. for Colors, 15c. for Black.

Woodsmen

Know that in spite of hard work in the clear forest air the blood often becomes impure. The heavy food served in the lumber camps is to a great extent responsible for this condition of the blood, which renders the body an easy prey to many forms of disease.

There is no better blood purifier than Dr. Pierce's Golden Medical Discovery. It cures eruptions, pimples, eczema, scrofula, rheumatism, and other diseases caused by an impure condition of the blood. It cures absolutely and altogether by cleansing the blood from the poisons which breed and feed disease.

Accept no substitute for the "Discovery." There is no other medicine "just as good" for the blood. "I will forever thank you for advising me to take Dr. Pierce's Golden Medical Discovery," writes Mrs. James Murphy, of Fond du Lac, Wisconsin. "It has cured me of chronic scrofula of twelve years' standing. I also had chronic diarrhea for twelve years. I am in good health now—better than I ever was in my life, owing to Dr. Pierce's Golden Medical Discovery. I took several bottles of the 'Discovery' before I stopped."

Dr. Pierce's Common Sense Medical Adviser, containing 1008 pages, and over 700 illustrations, is sent free on receipt of stamps to defray expense of customs and mailing only. Send 31 one-cent stamps for the book in paper cover, or 50 cents for the book in cloth binding. Address Dr. R. V. Pierce, Buffalo, N. Y.

"Silver Plate that Wears."

We are showing a variety of pieces in Meriden Britannia Company's "Silver Plate that wears." This beautifully colored and decorated dish is fittingly enclosed in a handsome, standard, the whole making a very attractive article. Other pieces of less or greater value in the same grade of plate in almost endless variety. The popular designs in

"1847 Rogers Bros." Knives, Forks, Spoons, etc., are always in our stock.

FAT REDUCTION.

Mrs. M Dumar studied the reduction of human fat for over 20 years, with the greatest specialists in Europe and America. Over 10,000 grateful patients attest her successes. Her treatment is not "Banting," nor starvation diet. She protests against the "Free Trial Treatment" fraud, so often advertised. Her's is no "Monthly Payment" scheme. Mrs. Dumar's treatment is endorsed by the Colleges of Physicians and by "The United States Health Report." Her total charge is \$1, which pays for prescription, for medicine sold in all first class drug stores, full instructions as to the treatment, and everything necessary to reduce one pound or more a day. No extra charges. No wrinkles and no injury to health.

FROM NEWSPAPER EDITORIALS. The patients of Mrs. Dumar are legion, and all of them are her friends.—Weekly Tribune and Star. Twenty odd years she has spent in serving her sister-sufferers and all have benefited by her treatment.—Family Physician Magazine, N. Y. For many years this successful specialist has been curing excessive fat, and we (acknowledged to be the highest American authority on all matters pertaining to health, sanitation and hygiene) feel authorized to recommend this treatment.—United States Health Report. If you find treatment not based on common sense, and find it doesn't work, she will send you \$1 back. If you question the value of this treatment, ask any proprietor of a first class newspaper. They all know Mrs. Dumar and what she has done. She has not published a testimonial in years. She does not need to. Her work is too well known. If you are interested in reducing flesh and believe that a sure, guaranteed reduction (as promised above) is worth \$1 to you, mail that sum in bill, stamps or Money Order to MRS. M. DUMAR, 15 West 28th St. New York.
