One would think he must have required several weeks and some thousands of hands, so completely to destroy every town, village, and hamlet, within a circle of upwards of ten miles. Not a field or garden has escaped uninjured. In the city of Nissa it was difficult for us to trace the streets, among the ruins of the houses that stood there, and yet Nissa was formerly a populous and by no means unimportant place. Vultures have taken up their abode among the deserted dwellings, and swarms of them rose startled by our approach. On quitting the ruins we met with some armed Mainotes, who shared with us what they had, some cucumbers and water. The Turks abandoned the place as soon as they had completed their work of destruction. Ibrahim has literally not left one stone upon another, and yet there are Europeans who praise the magnanimity of the Pacha."

ROMAN CATHOLIC SECURITIES.

FROM THE ENGLISH CATHOLIC JOURNAL. We perceive by the Irish Papers, and the Correspondence of several London Papers, that Doctors Murray and Doyle are about to leave Ireland on a mission, the object of which has given rise to a number of speculations. From all that we have been able to learn, we do not believe that the journey of these Prelates, if they be really about to undertake one, has been the result of any communication with the Government. The impression, however, seems to be universally prevalent, that the Duke of Wellington is taking active steps for effecting an arrangement of some kind or another; and, if, as it is confidently stated, Doctors Murray and Doyle have been really requested to come to London for the purpose of being consulted on the ecclesiastical part of the subject, we are not at a loss to know what would be the substance of their suggestions.-The basis

PROCLAMATION.

Pedro A. Herran, Intendant of the Department. To the inhabitants of Cundimarea. - Last night brought this city and the whole of the republic to the brink of ruin! Is it to be believed, that even here, in our very bosoms, villains should have existed who would attempt the murder of the Liberator.

Seduced by them, the brigade of Artillery which was in this city, and supported by this force, they introduced themselves and spilt much blood, even in the very house of his excellency; but Providence was pleased that Colonel Ferguson, and Colonel Joseph Bolivar, with a part of the guard, should perish—the first at the entrance of the palace, the An interesting surgical operation has just been second at the house of Gen.
