**PUBLIC CONTRACT.**  
SEALED TENDERS will be received by the Subscribers at Saint John and at Gagetown, until Wednesday, the first of July next, at 12 o'clock noon, for the completion of the following work, including the required materials.

Should any of the Tenders be accepted, the party whose offer may be taken will, on finding the required Security, and signing the Contract, receive one fourth of the whole sum, and the remainder will be paid to him or them as the work may advance.

The whole to be completed, and ready for delivery to the Commissioners, or their Agent, by the 1st of August, 1841; and the said Commissioners shall have power to object to any parts of the work which in their opinion may appear insufficient, while the undertaking is in progress, and have the same corrected at the expense of the Contractor. The Grounds, and the whole of the contemplated Works, will be pointed out to Parties intending to offer, by Mr. Wetmore, on the spot.

**Gagetown CANAL,**  
to connect the waters of the River Saint John with those of Grimross Creek,  
by cutting through the Interval at King's Head Tavern.—To be eight feet in depth at all places, to the extent of forty five feet wide on the bottom, and thence tapering on the sides, as will be seen per the plan.

On the River side, the excavations will require to commence at 66 feet beyond summer low water mark, and which low water mark line is to be considered as being at four rods distance, extended into the river or on the bank, from the notched tree standing on the centre of the Highway, and stated to be the bounds between the lands of Mr. Gilbert and Mr. Vail. The excavations for the Canal, beyond the 45 feet on the bottom, to rise on the sides at the rate of two feet between the dead rise, thus leaving the top waters of the Canal 77 feet. The excavated earth to be placed on the side grounds and ends of the Canal, as shown by the letters A, B, C, D, E, and F, on the plan, and the further sides of such excavations to be sufficiently sodded on their faces, except on the piles at the ends.

It is estimated that there may be 32,000 cubic yards to be moved, and the same is supposed to be of alluvial soil, clay and sand. The total length of the Canal, including the River and Creek excavations, so as to carry the eight feet depth of water, is 1047 feet per the plan.

Also,—Driving on each lip of the Canal, at where it joins the River, Twenty Four PILES, of not less than 12 inches, Pine or Spruce Timber, of such lengths as to be at all parts, where required, 4 feet below the bottom range of the Canal, and thirteen feet above it—to be driven of an angling form where required. The spaces inside of such Pile ranges to be filled, from the extreme to the bank, with alternate layers of brush and stone.—Like PILES, to the extent of twelve on each lip, to be driven on the Grimross side of the Canal, making in the whole 72 Piles, all of which to be secured by adequate Stringers being placed on the same, when driven.

Parties offering for this work must be prepared with unexceptionable Security, and plans of the grounds, &c. &c. will be found with the Subscribers, at Saint John and at Gagetown, and any required explanations afforded.
