JOHN S. SAUNDERS,
Surveyor General.

[From the Saint John Courier, December 4.]

INCENDIARISM!!—ATTEMPTS TO DESTROY SAINT JOHN BY FIRE.—It is with extreme regret we have to state that on Tuesday night last, an unusual degree of excitement and alarm pervaded all classes of our citizens, caused by a most diabolical and deep laid incendiary scheme to destroy, by fire, the greater portion of this already suffering and distressed city.

Early in the evening a back building in rear of the residence of F. C. Frith, Esq. in Saint James' street, was discovered to be on fire.

Combustible materials appear to have been placed in several situations in the sides and roof of the building and set on fire to, but the smoke having been seen before the flames had made much progress, the fire was soon subdued.

Soon after, another alarm of fire was sounded, and the Hall of the Mechanics' Institute was found to be the next place which exhibited symptoms of having been visited by the hand of the incendiary.

This fine building stands immediately adjacent to St. John's, or the Stone Church, and in a direct north line, nearly half a mile distant from Mr. Frith's residence,—the former being a few feet west from the upper end of Wellington Row (as the north end of Germain street is called) and the latter about the same distance west from near the lower or south end of Germain street.

Access was gained by the incendiary into an apartment formed at the north end of the building by the unevenness of the ground whereon it stands, and into which a number of the temporary seats used in the Lecture Room last season had been stowed.

The fire had been kindled in several places in this apartment, and although some of the seats and other lumber were much burned, yet the flames were subdued before the fire had done any injury to the floor above, and without the least damage (if we except the breaking of a window) being done to the upper part of the building which had just been finished.

The members of the fire department and other citizens displayed their usual alacrity and perseverance on the occasion, notwithstanding the difficulty of discovering the situation of the fire amidst the volumes of smoke which issued from the building.

A supply of water from Mr. A. M'Avity's premises adjoining the Institute, served to keep the flames under until the hose were attached to the Water Company's Fire Plug at the corner of King and Germain streets.

While many of our citizens were thus engaged in extinguishing the flames in a building, to the erection of which many of them have contributed, and in which they have an interest, an apparently well dressed man was seen by Mr. H. W. Sewell to break a window in the Vestry Room of Trinity Church, and with a match, set fire to the window curtain.

Fortunately, Mr. S. M. Chamberlain and some other Citizens happened to be passing soon after, and extinguished the burning curtain, and the ignited wood-work of the window, and thus saved from partial, or perhaps total destruction, that venerated and noble structure, long dedicated to the worship of the Almighty.

The person who acted the part of the incendiary on this occasion, was thought at the time to be the sexton of the Church gaining admission and lighting a candle for the purpose of proceeding to ring the alarm bell, otherwise he might have been secured and made to answer to the offended laws of God and man, for his demon like design.

Those not acquainted with the situation of Trinity Church will have some idea of the deep-laid scheme of destruction which had been planned by some fiend or fiends in human form, when we state that it stands about mid-way between Mr. Frith's residence and the Hall of the Institute, fronting about fifty feet from the east side of Germain street.
