Kingston Parish.
Trustees report that the Schools in Parish are generally as well conducted as can reasonably be expected under present system, although some of the Teachers not so well qualified as desirable. Trustees think it would be impossible to obtain Teachers of higher attainments for the remuneration received. In the remote Districts none but the young children are sent to School; Reading, Writing and Arithmetic, are all usually required to be taught; are of opinion, without some plan for increasing salaries of Teachers and raising them in the scale of society, the present difficulties and objections will continue. No man of education, unless degraded, will take charge of a School in a remote Settlement, where the inhabitants are generally poor and illiterate, and amongst whom he must board and lodge alternately in part payment of his salary, with no other ultimate distinction than that of a "poor Country Schoolmaster."

Sussex Vale Parish.—Trustees Report.

Sussex Vale Parish.—Trustees' Report.

Two lots of granted and one lot of reserved land for Schools; the granted belongs to the Madras Board; one is situated near Jeffrey's Mill, containing 200 acres or more in the new line of road leading to Saint John's via Loch Lomond. Trustees anxious to give all the information in their power in regard to the state of Schools, and while they report that some are conducted to their satisfaction, they regret to be obliged to state that in other cases, there are Teachers who are very inefficient; two Schools of the six returned by Trustees are taught by Roman Catholics, though the inhabitants of the districts are almost if not quite all Protestants. Trustees recommend that Roman Catholic Teachers should be confined to Districts where the inhabitants are Roman Catholics. In other instances Trustees have cause to complain of neglect of Religious Instruction, and have insisted where Church Catechism or some other summary of Christian faith and practice is not taught, that the Lords Prayer and Ten Commandments should be taught. Trustees cannot help in conclusion expressing their conviction that the Schools throughout the country cannot be satisfactory or advantageously conducted until a more respectable class of Teachers can be procured, and this they humbly conceive cannot be done without some Central Training School in which a better class of Teachers may be prepared and qualified for instructing the rising generation.
