4w.

ROBERT WALTON, Secretary.

NOTICE OF EXPIRATION OF CO-PARTNERSHIP.

PUBLIC Notice is hereby given, that the Co-partnership business carried on in this place under the Firm of Ranney, Sturdee & Co. expired at the time of the decease of the late William Parker Ranney, Esquire, on the twenty sixth October, 1843, the same having since been carried on solely on account of and by the surviving Partner and Subscriber, Henry Parker Sturdee, of which all parties will please take notice.

CATHERINE RANNEY, Executrix.

JOHN POLLOK,

HENRY P. STURDEE, } Executors.

St. John, N. B., 10th July, 1847.

In reference to the above, the undersigned begs to inform his friends and the public that he still continues the Wine and Commission business, &c. on his own account, under the Firm of Ranney, Sturdee & Co.

HENRY P. STURDEE.

St. John, N. B., 10th July, 1847.—4w.

PUBLIC NOTICE is hereby given, That I have this day appointed Mr. Joseph Myshraal, Junior, Deputy Sheriff for the County of York.

B. WOLHAUPTER, Sheriff of York.
Sheriff's Office, Fredericton, August 2, 1847.

ADMINISTRATION NOTICE.

ALL Persons having any demands against, or being indebted to the Estate of WILLIAM WARD, late of the Parish of Burton, in the County of Sunbury, deceased, are requested to present their respective Accounts within three months for settlement, to

ELIZABETH WARD, Administratrix.

Burton, 2d August, 1847.—3w.

Married.

At Saint John's, Newfoundland, on the 22d ultimo, at the Wesleyan Chapel, by the Rev. D. D. Evans, Minister of the Congregational Church in that City, Robert Roberts Wakeham Lilly, Esquire, Barrister at Law, acting Chief Clerk of the Supreme Court of that Island, and youngest son of the late Honorable Judge Lilly, to Eliza Dalrymple, only daughter of the Rev. Richard Williams, Chairman, and General Superintendent of the Wesleyan Missions in that place.

Died.

On Monday last, of consumption, Mr. Thomas Bowden, aged 53 years.—Mr. Bowden was for many years a respectable, useful and worthy member of this community, and is deservedly regretted by his family and all who knew him. His funeral obsequies were numerous and respectfully attended by the Citizens, the Officers of the 1st Battalion York County Militia—from whom the Pall bearers were selected,—and by a detachment of the York Rifles—their excellent Band playing the *Dead March in Saul*,—in which Corps he had long and honorably held a Commission.

On Wednesday last, the 28th ult., Mrs. Bridget Brown, wife of Mr. John Brown, in the 50th year of her age, deeply lamented by her relations.

SEVENTEENTH MEETING OF THE BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.

OXFORD, JUNE 23.

The Address of the President, Sir R. H. Inglis.

May it please you, Mr. Vice Chancellor, Sir Roderick Murchison, Gentlemen of the British Association :—When I consider the attainments of the distinguished person whom I succeed in this chair, I might well shrink from a position which places me in any degree in comparison with him ; and when I look back on the array of the most illustrious names in science of this age and nation, some of whom add civil and social rank to the eminence which they have acquired by their personal labours, and who have in succession been your Presidents, I feel far more strongly than I can express the undeserved honour which was most unexpectedly conferred upon me when the Council desired to nominate me to my present position. Though in early years, when I enjoyed more leisure, I took such interest as I could in some branches of natural philosophy and in chemistry,—and though I look back to those opportunities with the most grateful recollection of their value and of the pleasure which I derived from them,—(it is my own fault if I did not derive profit, also, from Kidd in this place and from Playfair and from Hope in Edinburgh)—my occupations have, for the larger portion of my life, been such as to prevent my persevering in the pursuits which most of those before me have continued to follow to their own honour among their fellow men and to the benefit of our common country.

It has been the practice of former Presidents to address the first General Meeting of the Association on the progress of Science during the preceding year, and on its state and prospects in the present. Sir Roderick Murchison, my eminent friend, who did honour to this chair, took a comprehensive grasp of all the objects which this duty placed within his reach. When I read his Address, I felt, even more than before, my unfitness to follow him ; but such as I am, you have selected me to succeed to his position and his duties ; and I shall endeavour to discharge my functions with as little discredit to your choice as may be in my power. Whatever may be good in the observations which follow this exordium, will be owing to my friends, the Rev. Dr. Robinson, Professor Owen, Mr. Robert Brown, and Colonel Sabine. Anxious as I am not to disgrace your judgment in placing me where I am, I am still more anxious not to assume a merit which does not belong to me ; and, therefore, unfeignedly begging you to attribute to the sources which I have pointed out, whatever may in detail interest you in the continuation of my Address, I am content with the distinction of calling such men my personal friends.

I begin with ASTRONOMY.—The progress of astronomy during the past year, has been distinguished by a discovery the most remarkable, perhaps, ever made as the result of pure intellect exercised before observation,—and determining without observation, the existence and force of a planet ; which existence and which force were subsequently verified by observation. It had previously been considered as the great trial and triumph of Dynamical Science to determine the disturbances caused by the mutual action of "the stars in their courses," even when their position and their orbits were fully known ; but it has been reserved for these days to reverse the process, and to investigate from the discordance actually observed the existence and the place of the wondrous stranger which had been silently, since its creation, exerting this mysterious power. It was reserved for these days to track the path and to measure the force which the great Creator had given to this hitherto unknown orb among the myriads of the air.
