SECRETARY'S OFFICE, 16th Nov. 1858.

THE following Notices are published by direction of His Excellency the Lieutenant Governor, for the information of all concerned.

S. L. TILLEY.

Trinity House, South Australia, 19th July, 1858.

SIR,—I have the honor to enclose you herewith, a copy of a Notice lately published in this Colony, relative to the establishment of a Lighthouse on Cape Borda, the northwestern extremity of Kangaroo Island, and have to request you will be good enough to give the same every publicity in your power for the information of Mariners and others visiting this Province.

I have the honor to remain,

Your obedient servant,

B. DOUGLAS,

Master of the Trinity House, South Australia.

SOUTH AUSTRALIA.

CAPE BORDA LIGHTHOUSE, KANGAROO ISLAND.

NOTICE TO MARINERS.

The Master and Wardens of the Trinity House of South Australia hereby give notice, that the Light on Cape Borda was first exhibited on the evening of the 13th July, 1858, and will continue to be exhibited every night from sunset to sunrise.

Cape Borda lies in lat. 35° 45' 20" south, long. 136° 38' 0" east, and is a bold clifly headland 480 feet above the sea level.

The Lighthouse is a square stone tower, and stands thirty (30) feet from the ground, on the summit of a small mound, about five hundred (500) yards from the edge of the cliffs. The total height of the Lantern is therefore five hundred and ten (510) feet above the level of the sea.

The Light, which is on the catoptric principle, exhibits a Bright and Red Flash alternately every half minute, (½ minute,) and may

be seen on an arc extending from N. 60° E. to S. 35° W. (round by west.) The Bright Flash may be seen at a distance of *Thirty (30) Miles* in clear weather; but the Red Light will not be visible more than *about half that distance*, therefore when the Red Light is not distinguishable, the Bright Light *only* will appear at intervals of one minute.

Vessels approaching Cape Borda from the southwest should keep the Light well open of the high land to the southward of the Cape, to avoid the Reef off Cape Bedout, the western extremity of the Island. Vessels bound up Investigator's Straits, after having rounded Cape Borda, should keep the Light quite clear of the high land to the eastward of it, on a S.W. by W. bearing until Cape Forbin is passed, when it may be shut in with the high land.

Vessels bound down Investigator's Straits should not bring the Light to bear to the westward of S.W. by W.

The above bearings are magnetic, the variation being 5° east.

B. DOUGLAS,

Master of the Trinity House, South Australia.

Trinity House, Port Adelaide,
South Australia, 15th July, 1858.
