SUPREME COURT IN EQUITY.

TO be sold at Public Auction on Friday the 23th day of September next, at 12 o'clock, noon, at Cogle's Hotel, at Sussex, King's County, with the approbation of the undersigned, pursuant to a Decretal Order of the Supreme Court in Equity, made the sixth day of March last, in a certain Cause wherein George Ellison and Robert Ellison are Plaintiffs, and William Jackson is Defendant:—

All that certain Lot, piece or parcel of Land and premises, with the privileges and appurtenances mentioned in a certain Deed of Mortgage bearing date the 7th day of May, A. D. 1841, and made between the said Defendant, William Jackson, of the one part, and the said Plaintiffs of the other part, described in the said Deed of Mortgage as follows:—

"All that piece or parcel of Land granted to the said William Jackson, lying and being in the Parish of Upham, in said County, and bounded as follows: On the south by land owned by William Baird; On the west by land owned by Samuel Foster, Esq.; On the north by land owned by James M Mackin, and on the east by wilderness land; being the whole of the Lot granted to said Wm. Jackson, except 200 acres sold to James M Mackin; containing 300 acres, more or less; with all the Buildings and improvements and appurtenances thereunto belonging."

Terms and other particulars made known on application to the Plaintiffs' Solicitor.—Dated the 18th day of June, A. D. 1860.

A. W. SAVARY, Barrister, &c.

A. T. D. McELMAN, Sussex Vale, Sol. for Plaintiffs.

PROVINCIAL BOARD OF AGRICULTURE.*To the Farmers of New Brunswick.*

THERE exists in the United States just now, a grievous murrain or contagious distemper among horned cattle.

It chills the lungs, which it slowly but certainly destroys. It is said to be highly contagious, and exposure to the breath or the touch of a diseased animal, seems to bring certain death with it.

This murrain has been known on the Continent of Europe for some time, but has only recently been introduced into Massachusetts, with cattle imported from Holland. It has been propagated from thence into the adjoining States, and a case is said to have occurred in the Town of Wells, in Maine.

Commissioners have been appointed to watch the progress of the disease, and to destroy infected animals. A special Session of the Legislature of Massachusetts has even been convened, with a view to further precautions.

No cases are as yet reported in any of the British Provinces, but we may expect to hear of them, and it is of the highest concern to us that it should not be introduced into New Brunswick. What the potato rot has been to potatoes, murrain or Pleuro pneumonia is to horned cattle. Fortunately the cause of the latter seems to be less obscure, although its cure is as difficult as that of the former malady. It seems to be purely contagious, and thus, by proper precautions, it may be kept at a distance at all events.

There would seem to be no safety but in the utter and absolute exclusion from the Province, of all cattle from suspected countries. Raw Hides may also be treated as dangerous.

No consideration of private gain or convenience, will justify the least risk in this matter. Farmers, Butchers, and dealers of all kinds, are hereby cautioned most seriously in regard to the import of cattle from without for this year, and urged to kill off all cases as soon as known, and report the same to the proper authorities.

The Farmers of Maine have had their attention strongly called to this subject by the Board of Agriculture there, and Mr. Goodal, the Secretary, has furthermore suggested that no ewes or ewe lambs should be given to the Butcher, until the Pleuro pneumonia has ceased to exist in New England.

J. ROBB, Secretary

N. B. Provincial Board of Agriculture.

Fredericton, June 11, 1860.

LITERARY NOTICE.

ONE of the most interesting and useful publications which comes to our sanctum is the *SCIENTIFIC AMERICAN*, a weekly publication, devoted to popular science, new inventions, and the whole range of mechanic and manufacturing arts. The *Scientific American* has been published for fifteen years, by the well-known Patent Solicitors, Messrs. Munn & Co. 37 Park Row, New-York; and has yearly increased in interest and circulation, until it has attained, we understand, nearly 30,000 subscribers, which is the best of evidence that the publication is appreciated by the reading public.

To those of our readers who may not be familiar with the character of the paper, we will state some of the subjects of which it treats. Its illustrated descriptions of all the most important improvements in steam and agricultural machinery, will commend it to the Engineer and Farmer, while the new household inventions and shop tools which are illustrated by engravings and described in its columns, with the practical receipts contained in every number, renders the work desirable to housekeepers, and almost indispensable to every mechanic or smith who has a shop for manufacturing new work, or repairing old.

The *Scientific American* is universally regarded as the inventor's advocate and monitor; the repository of American inventions, and the great authority on law, and all business connected with Patents. The Official List of Claims, as issued weekly from the Patent Office, in Washington, are published regularly in its columns. All the most important Patents issued by the United States Patent Office are illustrated and described on its pages, thus forming an unrivalled history of American inventions.

It is not only the best, but the largest and cheapest paper devoted to Science, Mechanics, Manufactures, and the Useful Arts, published in the world. Hon. Judge Mason, formerly Commissioner of Patents, is not only engaged with the publishers in their immense Patent Agency department, but as a writer on Patent Laws and Practice, his ability is forcibly portrayed in the columns of this paper.

The *Scientific American* is published once a week, (every Saturday,) each number containing 16 pages of Letterpress, and from 10 to 12 original Engravings of New Inventions, consisting of the most improved Tools, Engines, Mills, Agricultural Machines, and Household Utensils, making 52 numbers in a year, comprising 832 pages, and over 500 Original Engravings, printed on heavy, fine paper, in a form expressly for binding, and all for \$2 per annum.

A New Volume commences on the 1st of July, and we hope a large number of our townsmen will avail themselves of the present opportunity to subscribe. By remitting \$2 by mail to the publishers, Munn & Co. 37 Park Row, New-York, they will send you their paper one year, at the end of which time you will have a volume which you would not part with for treble its cost. The publishers express their willingness to mail a single copy of the paper to such as may wish to see it without charge.
