

The Royal Gazette.

Vol. 29.]

FREDERICTON, N. B., WEDNESDAY, APRIL 12, 1871.

[PAGE 100

Official Notifications appearing in this Paper, duly authenticated, are to be received as such by the persons whom they may concern

BY AUTHORITY.

PROVINCIAL APPOINTMENTS.

SAMUEL H. NAPIER, Esquire, to be a Member of the Provincial Board of Agriculture for the County of Gloucester.

Antoine Girouard, Esquire, to be a Member of the Provincial Board of Agriculture for the County of Kent.

By Command of the Lieutenant Governor.

GEORGE L. HATHEWAY.

Secretary's Office, 12th April, 1871.

HYDROGRAPHIC NOTICE.

[No. 1.]

The last number for 1870 was 43.

ST. LAWRENCE PILOT, VOL. II.

Canso Harbour.

Information has been received from the Government of the Dominion of Canada, that in order to facilitate the navigation into Canso Harbour, by the northern entrance, Beacons will be erected, the positions of which are herewith given, together with the necessary sailing directions.

[All Bearings are Magnetic. Variation 23° Westerly in 1871.]

Beacons.—Two Beacons, 30 feet high, with triangular heads painted white, are being erected on the southern shore of Canso Harbour.

The southern Beacon will be on Lanigan's hill, with the Roman Catholic Church bearing N.W. by W. westerly.

The northern Beacon will be on the eastern side of Grave Islet at highwater mark, and will bear N. $\frac{1}{2}$ E. from the Beacon on Lanigan's hill.

Directions.—To enter Canso Harbour by the northwest entrance, being outside the Net rocks, bring the Roman Catholic Church steeple at Canso to bear S. $\frac{1}{2}$ W., when it will be seen over Cutler Island, midway between the house on the Island and its western end.

Steer S. $\frac{1}{2}$ W. for this mark, and it will lead nearly midway between the Bald and Whiteman rocks, and when the red clay cliff of Glasgow head to the southward of Canso is seen through the channel between Cutler and Piscatiqui Islands bearing S. by E. $\frac{1}{2}$ E., steer for it, keeping in mid-channel until Grave Islet Beacon comes on with Lanigan's Beacon bearing S. $\frac{1}{2}$ W.; then run with these Beacons in line, and when Cranberry Lighthouse appears in one with Fort Point on Grassy Island, trail to the westward into the Harbour.

GUT OF CANSO.

Cerberus Rock.

Information has also been received that the Red Buoy, marking the Cerberus Rock at the southern entrance to the Gut of Canso, is moored in 15 fathoms, about half a cable S.S.W. of the rock.

Hydrographic Office, Admiralty, London,
10th January, 1871.

NOTICE TO MARINERS.

[No. 14.]

NOVA SCOTIA—MAHONE BAY.

Fixed Light on East Ironbound Island.

The Government of the Dominion of Canada has given notice, that a light is now exhibited from the recently rebuilt Lighthouse on East Ironbound Island, Mahone Bay.

The light is a *fixed* white light, elevated 150 feet above high water, and in clear weather should be seen from a distance of 16 miles.

The illuminating apparatus is catoptric, but from the 1st April 1871, will be dioptric or by lenses.

The tower is 46 feet high, and surmounts the keeper's dwelling.

BAY OF FUNDY—ST. MARY BAY.

Fixed Light at Sissibou River.

Also, that a light is now exhibited from a Lighthouse recently erected at the entrance of Sissibou River, Saint Mary Bay.

The light is a *fixed* white light, elevated 36 feet above high water, and in clear weather should be seen from a distance of 8 miles.

The illuminating apparatus is catoptric or by reflectors.

The tower, 33 feet high, is square, built of wood, and painted white. Position, lat. 44° 26' 30" N., long. 66° 1' 15" W.

GULF OF SAINT LAWRENCE—CHALEUR BAY.

Fixed Light on Bonami Point.

Also, that a Lighthouse has recently been erected on Bonami Point, south side of the entrance of Dalhousie Harbour, from which a light will be exhibited during the season of navigation.

The light is a *fixed* white light, elevated 49 feet above high water, and in clear weather should be seen from a distance of 13 miles.

The illuminating apparatus is catoptric or by reflectors.

The tower, 33 feet high, is square, built of wood, and painted white. Position, lat. 48° 3' 45" N., long. 66° 20' 50" W.

By Command of their Lordships.

GEO. HENRY RICHARDS,
Hydrographer.

Hydrographic Office, Admiralty, London,
25th February, 1871.

(No. 663.)
