THE BELGIAN FORTRESSES. -- One announcement in the speech of the King of France will excite surprise and occasion dissatisfaction in a neighbouring state. My Lords, and Gentlemen,

I have availed Myself of the earliest opportunity of resorting to your Advice and Assis. tance after the Dissolution of the late Parlia.

Having had recourse to that Measure, for Representation, I have now to recommend that The French army in Belgium had suspend- important Question to your earliest and most

lands. As to the recovery of money payable the ordinary remedy, and also the further power of recovery by distress on the tithe-money We know nothing that has occurred in the rebeing in arrear for one year; the latter power to be analogous to that possessed by the landlords by the 14th of Anne, as it was but fair that the incumbent should not be anticipated by the landlord in the recovery of that which was his own. 'The Bill was only applicable to clerical incumbents, and did not include lay impropriators.

The Lord Chancellor expressed great satisfaction at the result of the most Rev. Prelate's labours, but thought that the subject was still surrounded by many difficulties. He did not see his way so clearly as to be prepared to go considerably further than the Bill proposed to go, and he thought it desirable that a noble What will they say when they see the French Baron (Lord Dacre) should withdraw his Bill for the present, until they should ascertain by experience how the measure before the House would work, and how far it was likely to answer the important purpose which they all had and property of the Established Church, and a tion which the King of France has now an-yesterday observes .-change of that nature must be proceeded in in the tithe system, which certainly operated troying the popularity of their future Sove- its friends in the London Conference, and his er the question is settled the better it will be States should not be endangered. as an injurious tax on landowners and agricul- reign. Under the existing tithe laws, he looked upon the Clergyman and the landlord as co-partners in the farm, and the latter might be considered the acting, and the former the sleeping partner.- (Hear, hear.) He meant to call the Clergyman a sleeping partner only as to agricultural labour, for the Clergyman also laboured for the good of the community. It would, therefore, he a great violation of property i one of these co-partners-either the landlord or the Clergyman,-should be empowered to oust the other from his possession without asking his consent. The rights of the tithe-owner to that species of property were as legal and complete as that of the landowner to his estate .---(Hear, hear.) The misfortune was, that the law had fixed on a mode of payment which could only be obviated by an amicable arrangement between the parties.-(Hear.) The Earl of Eldon voted for the second reading, but as he thought there was not a clause in the Bill which did not require alteration, he would not pledge himself to support the Bill unless it were greatly modifyed in the Commit-The Bishop of London maintained that the Clergy held their possessions and incomes by as good a title as landed proprietors held their estates, and asserted that no property in the Kingdom was expended more beneficially to expression "sleeping partner" as it had been explained; but as the term was often used in an invidious sense, and as every thing which fell from the Noble Lord was much and justly attended to by the public, he did not wish it to go forth without comment. As to the inconvenience of that mode of paying the Clergy, which had existed in this country for more than 900 years, he wished to say that, since the year 1640, and not before that time, much inconvenience had certainly arisen from it. He attributed much of the evil to the complicated machinery of the tithe laws, which had rendered the system, he would not say unjustly, unpopular. The Lord Chancellor repeated that he had not used the term "sleeping partner" invidiously ; and the Bishop of London hoped that the explanation would go forth to the country.

At Paris on the 15th August, an impression prevailed that the affairs of Poland might have a better issue than was a short time before anticipated. The Polish envoys in that capital felt more confidence.
