Mrs. Arthur Pepler, Chairman of the Ontario Branch, spoke of the need which exists for funds. Although the Allied Governments provide sufficient money to keep the population alive, the children are suffering badly from under-nourishment. Special efforts are being made to take groups of children, under twelve, to Holland and to Switzerland for six weeks at a time, when they are well fed and cared for and then returned to their homes. This work, of course, entails large expenditure which must be met by private contributions.

War-tea was served; no wheat flour, butter, or white sugar being used in the cakes or sandwiches, which were, however, extremely good.

LOSS OF BRITISH TONNAGE DURING WAR

London, Aug. 8.—The British mercantile tonnage at the outbreak of the war amounted to 18,500,000 tons gross, and the figure at the present time is 15,000,000 tons gross, Sir Leo G. Chiozza Money, parliamentary secretary to the ministry of shipping, announced in the house of commons to-day.

The secretary of the admiralty in announcing the amount of merchant ship tonnage constructed for the three months ended June 30, says the output of the United Kingdom and Allied and neutral countries exceeded the losses from all causes by 296,696 gross tons. The total output was 1,243,274 tons, against 870,317 tons for the first quarter of the year. The United Kingdom built 442,969 tons, as compared with 320,280.

During July the United Kingdom constructed 141,948 tons, as compared with June's 134,159 tons, which, compared with July 1916-1917, shows an increase of 174 per cent., and 71 per cent. respectively. The United Kingdom's total output for the first seven months of the year was 905,194 tons. For the year ended July 31 the output was 1,400,025, compared with the same period of the previous year 865,147 tons.

The secretary says the July figures were not so high as usual, owing to the holidays. The influenza epidemic had a transient but marked effect on ship building, as it caused the absence of from thirty-five to fifty per cent. of the employees of the yards.

"Having regard for all circumstances," the statement concluded, "I consider the July output reasonably satisfactory."

Smith, whose patriotic fervor was shocked by the tattered condition to which the flag had come by long use and the neglect of the "stitch in time."
