Petroleum Oils.

EXPLOSIVE, HAZARDOUS, AND EXTRA HAZARDOUS.—The leading Fire Insurance Companies of the United States have declared Petroleum Oil, Well Oil, Earth Oil, and sundry other Oils as highly Dangerous, Liable to Explode, Hazardous and Extra Hazardous.

Of all Illuminating Oils, Albertine Oil is pre-eminently the best, it burns longer, gives a steadier light, and more light for less money than any other Oil.

Albertine Oil is perfectly safe in use, and in this respect unlike many other Oils with numerous names, which are highly dangerous, explode in the Lamp, and set fire to persons and property—several instances of which have occurred in the vicinity within the past few weeks.

The Albertine Oil Company are now prepared to fill all orders, at Wholesale and Retail, for their genuine Albertine Oil, pure and unadulterated, manufactured from the celebrated Albert Coal.

JOHN McGRATH, Agent, Albertine Oil Depot, 33 Princo Wm. Street. St. John, Oct. 1.

KEROSENE, or Refined Petroleum Oil. The subscriber is reluctant to notice the sweeping charge against Petroleum and all other oils, made by the agent of the Albertine Oil Company in St. John, but feels compelled to do so in defence of the oil sold by him.

This oil is cheaper than the Albertine, the cost of manufacture being less; it is quite as good and safe, and gives as much satisfaction to consumers. And when owners of property can effect insurance with first-class English offices, it is not likely they

will be induced to purchase the Albertine.
