

WINSTON CHURCHILL ON COLONIAL RELATIONS

Solid Defensive League of Britain and Her Colonies

TORONTO, Sept. 6.—Hamr Greenwood, M. P., read to-night at a banquet given him by the directors of the national exhibition, a letter written by Winston Churchill, after referring to the change in the disposition of political power produced by the last general election in Great Britain, said:

"What you must try to do, as far as may lie in your power, is to convince your friends and kinsfolk in Canada that this change in England, great and far-reaching though it has been, does not imply any weakening in the affection of the British people towards their kith and kin across the sea, or in the earnest and vigilant efforts of the colonial office to render the colonies every legitimate service, military, diplomatic or commercial, that may be in our power. There are new men, there are other principals there will be different methods; but in the guiding aspirations, in the central impulse, in the ultimate aim, namely, a solid defensive league of free democratic communities, animated by a love of peace and justice under the leadership of the British crown—in that there is no change, no sign of change, no expectation of change of any kind or sort whatever."

"And what, I should like to know, has the British empire to fear from Liberal principles? It is one of the oldest things in modern history that there should be any question on this point. It is to liberal social principles, tried in some ways far more logical extremes than in this old country, that Canada and Australia and New Zealand ascribe no little share in their progress and prosperity. It is upon liberal principals of tolerance and trust in racial matters of freedom and equality in religious matters, that they built their own internal peace. It is by liberal imperial principals of colonial autonomy, of a lofty humanity, and, above all, of a peaceful foreign policy, that the structural cohesion of British empire has alone been achieved and will alone be maintained."

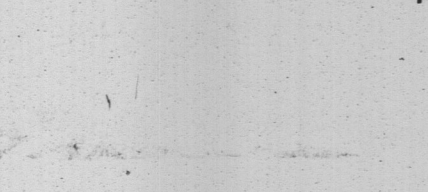

Her—"Miss Buddington has a complexion like a peach." Her—"Why, how can you say so I don't think her face is at all fuzzy."

TUMORS CONQUERED

SERIOUS OPERATIONS AVOIDED

Unqualified Success of Lydia E. Pinkham's Vegetable Compound in the Case of Mrs. Fannie D. Fox.

One of the greatest triumphs of Lydia E. Pinkham's Vegetable Compound is the conquering of woman's dread enemy, Tumor. The growth of a tumor is so early and so frequently its presence is not suspected until it is far advanced. So-called "wandering pains" may come from its early stages, or the presence of danger may be made manifest by profuse monthly periods, accompanied by unusual pain, from the abdomen through the groin and thighs. If you have mysterious pains, if there are indications of inflammation or displacement, secure Lydia E. Pinkham's Vegetable Compound right away and begin its use. Mrs. Pinkham, of Lynn, Mass., will give you her advice if you will write her about yourself. She is the daughter-in-law of Lydia E. Pinkham and for twenty-five years has been advising sick women free of charge. Dear Mrs. Pinkham— "I take the liberty to congratulate you on the success I have had with your wonderful medicine. Eighteen months ago my periods stopped. Shortly after I felt so badly that I submitted to a thorough examination by a physician and was told that I had a tumor and would have to undergo an operation. Soon after I read one of your advertisements and decided to give Lydia E. Pinkham's Vegetable Compound a trial. After trying five bottles as directed the tumor is entirely gone. I have been examined by a physician and he says I have no signs of a tumor now. It has also brought my periods around once more, and I am entirely well."—Fannie D. Fox, 7 Chestnut Street, Bradford, Pa.

POWER OF THE KING

His Majesty's Influence on British Politics

Lecturing on "British Institutions" at Cambridge, Professor Masterman, who took for his subject "The King," said that the position of the British King to-day differed from that of the British King of the past in the substitution of influence for authority. It was a mistake for any one to minimize the importance of influence as compared with authority. It was only by degrees that we were beginning to learn how very strongly the influence of the late Queen Victoria affected the course of British politics, and the succession of our present King might be said to mark the revival of the political importance of the British monarch.

The King had an undoubted influence in determining policy in foreign affairs. The best guarantee for the continuity of foreign policy was to be found in the influence of the Crown. No treaty could be made by the King, but the King could do a great deal in preparing the ground, informally for the work of diplomacy. When the King held out his hand to a foreign nation, to a very large extent that represented the right hand of friendship of the British people.

How was the King in our country appointed? Most people would reply that it was by hereditary succession. That was only partly true. There was in the university library a list of 6,083 people who had a larger claim on that ground to sit upon the English throne than our present King, being nearer related to James I. than King Edward VII. The fact was that our kingship was a combination of hereditary and elective methods of appointment. By Act of Parliament the Crown was entailed in the House of Hanover, being Protestant.

With regard to the maintenance of the King, the fact was not generally known to the British nation that we get our King considerably under cost price. About a hundred years ago the Crown lands were taken over by the nation, and they now brought in far more than it cost the country to maintain the monarchy.

There is more catarrh in this section of the country than all other diseases put together, and until the last few years was supposed to be incurable. For a great many years doctors pronounced it a local disease and prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Science has proven catarrh to be a constitutional disease and therefore requires constitutional treatment. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio is the only constitutional cure on the market. It is taken internally in doses from 10 drops to a teaspoonful. It acts directly on the blood and mucous surfaces of the system. They offer one hundred dollars for any case it fails to cure. Send for circular and testimonials. Address: F. J. CHENEY & Co., Toledo, Ohio. Sold by Druggists, 75c. Take Hall's Family Pills for constipation.

SHAKESPEREAN SAYINGS.

There's mighty little in a name. As Shakespeare justly says. Canned tripe may sell as potted game. As Shakespeare justly says. Life is not always cakes and ale. Some statesmen will not go to jail, And thereby hangs a woful tale. As Shakespeare justly says. He jests at scars who knows no wound, As Shakespeare justly says. 'Tis love that makes the world go 'round. As Shakespeare justly says. A bird in hand beats two in bush; Without a pull you'll need much push; A wise man drops a bottled flush. As Shakespeare justly says. The early bird acquires the worm, As Shakespeare justly says. With maids and wives one should be firm. As Shakespeare justly says. A word's sufficient to the wise. And if to wealth and fame you'd rise, You'll find it pays to advertise. As Shakespeare justly says.

They All Failed. Many have tried to devise a corn cure equal to Putnam's, but after fifty years nothing has come upon the market that so painlessly cures corns and warts. Don't experiment, use the best, and that's "Putnam's."

GOLD DISCOVERED

Will Put Mines of the Rand to Shame if Surface Indications are Filled

Edmonton, Alberta, Sept. 6.—The McDonald Dominion Government survey party which arrived in the City yesterday brings a story of gold discovered in the Peace River country, which if it answers to the surface indications, will put the Rand to shame. The samples of rock brought down by the crulest kind of assay made with mortar and mercury give values of \$7 to \$32 to ton but these tests are certainly unreliable and no mining man familiar with gold values would accept them as indicating a like real value of the rock. The discoveries were made thirty miles below Fort St. John and seventeen miles from Alberta on the British Columbia line. The gold bearing rock is a bed of shale 200 to 300 feet of rock projecting out of a bank and overhanging the river. About it is a gravel bed, then three or four hundred feet below is another gravel bed. The shale is an intermediate deposit. It is located in a big horse shoe bend in the hills forming an escarpment along the river. The party located seventeen claims, one for every member and one for each of the several police officers who were in the neighborhood at the time the discoveries were made.

ARE BADLY CARED FOR

Ernest Terry on Emigrant Conditions Aboard Boat

LONDON, Sept. 7.—Ernest Terry, a member of the Leeds distress committee, who recently visited Canada, inquires into the condition and prospects of emigrants sent out by the distress committee through the agency of the Salvation Army, and says in his report that the conditions under which the third-class emigrants were carried on the boat were not satisfactory. The steerage and fore-cabin were greatly overcrowded and the sleeping and dining accommodation wretched. The lavatory accommodation primitive. The inadequate quarters smelt disagreeable and could only be described as bad. The food was of good quality and plentiful, but badly cooked, and always roughly served. Describing the conditions prevailing in Canada, Mr. Terry remarks that the glowing accounts given by various immigration agents Government and private, must be largely discounted. The conditions are much harder than in England. The cost of living is very much higher than in England, and the standard very much lower. The greatest difficulty is the housing problem. Throughout the whole of Canada it is almost impossible to get shelter. Mr. Terry concludes his report by saying that he found that Englishmen are not popular in Canada. Employers undoubtedly prefer Swedes, Russians, Germans, even Italians, as these men are credited with being unused to doing what Canadians consider a fair day's work, and also with being too independent after they have a few dollars in their pockets.

"An Emigrant from Leeds," writing to the Yorkshire Post from Winnipeg, challenges any man to prove that there is not a prejudice against the English there. "Emigrant" refers to a recent article in the Toronto Globe on the "Incorrigible English."

It Creeps Like A Serpent. Steals through the system like a thief in the night. That's how catarrh acts. Don't trifle with such a scourge. Don't experiment with a doubtful treatment. Time and experience prove that Catarrhazone does cure, that it gives quick relief and so thoroughly destroys the disease, that it dies forever. Get Catarrhazone in the first place, and your cure is assured. In 25c. and 50c. sizes at all dealers and guaranteed in every case.

"KANNOT TEL A LIE." Punch Cartoons President of United States

Punch, in a full-page cartoon, shows "Teddy" Roosevelt in cowboy costume, sleeves rolled up, standing, hatchet in hand, by a great tree which represents the English language. Father Time, examining the tree with a powerful magnifying glass, observes a slight incision in the tree trunk. "Who has been trying to cut down this tree?" he asks. "Father," answers "Teddy," "I cannot tel a lie. I did it with my lid ax." To this Father Time replies: "Ah, well, boys will be boys." (Minard's Liniment for sale everywhere)

TERRIBLE EXPLOSION

Kills Inventor and President of Company and Injures Many Others.

Lynn, Mass., Sept. 7.—Two men were fatally, one seriously and ten or a dozen others slightly injured by an explosion on Lennox hill here late today. The fatally injured are Frank Wardenberger and George Tattall, of New York. The former died in the hospital tonight. Francis Chicoine, an Italian laborer, was seriously injured, but he will likely recover. Wardenberger, a German by birth and a chemist by occupation, was the inventor of the new explosive and Tattall was the president of the company formed to exploit it. The two had been touring New England, demonstrating the new explosive in the presence of contractors and quarry workers. Some forty contractors saw the demonstration given here today. The hole had been drilled and filled with dynamite and three other holes containing the new explosive. Wardenberger was tamping one of the holes containing the new explosive. Suddenly there was a terrible explosion, the detonation causing the compound of the other two holes to explode. Wardenberger and Tattall were blown nearly thirty feet and were pitiable sights when picked up. Nearly every stitch of clothing was torn from their bodies and their faces and bodies were unrecognizable. The flesh hung in shreds and they were bleeding profusely. Both men were filled full of the minute particulars of the splintered rock. Chicoine was badly lacerated by falling fragments of stone.

MILK SAMPLES FROM THE PROVINCES

P. E. I. Had two Adulterated Ones, New Brunswick and Nova Scotia Had None

OTTAWA, Sept. 7.—The chief analyst of the dominion has examined 319 samples of milk taken from all over the dominion. There was 189 genuine, eighty-five doubtful and forty-five adulterated. None of the samples from Nova Scotia or New Brunswick were adulterated. There were two adulterated from P. E. Island, two from Quebec district, six from Montreal, seven from Toronto, six from London, five from Manitoba, three from Calgary, four from Ottawa, and six from British Columbia.

FEEDING BY FORCE

WINNIPEG, Sept. 5.—Because they refused to eat, fourteen Doukhobors in Regina jail had to be fed by the scientific method of pumping nourishment into them. It was a case of being either forced to take food or of their starving to death, and three times daily they are forced to eat.

"Skidoo" For Your Headache. Ascertain its cause and the cure is not hard to find. Look to the stomach and bowels. Are not you constipated, is not your liver sluggish, is not the stomach falling in its mission? What you need is the cleansing tonic influence of Dr. Hamilton's Pills. Their effect is lasting because they aid all the ailing organs, wash out all unwholesome matter, and tone up the stomach. With Dr. Hamilton's Pills your stomach gets a chance to recuperate, and does so quickly. For real buoyant health use Dr. Hamilton's Pills regularly. 25c. per box at all dealers.

WILL MAKE TEST OF SUSPENSION BRIDGE

Hon. C. H. LaBillois is in the city and this afternoon with Gilbert Murdoch, Jr. He will survey the hospital building, dividing it into lots. The lots will be numbered and on set price will be placed on them. An important matter has been brought before the notice of the commissioners by George Robertson, M. P. P., D. J. Purdy, M. P. P., and E. Landauld, M. P. P. In a joint letter they represent that on account of the increasing traffic over the suspension bridge an expert should be obtained to test the stability of the structure. Mr. LaBillois states the department thinks the bridge to be safe but will meet the wish of the members and get an expert from New York or elsewhere to test the bridge.

Hon. Mr. LaBillois states that the summer work on the bridge is about completed. The chief commissioner is thoroughly satisfied with the result of the new highway act.

Albert E. Smylie, of Albert Co. has been awarded an important bridge contract in Kings Co. and in the near future Mr. LaBillois will begin a tour to examine the work done on the various bridges this summer. A R. Wetmore, provincial engineer, passed through the city yesterday en route to Montreal on business in connection with the iron superstructure of the Hawkshaw bridge over the St. John river.—Evening Times.

Sunlight Soap is better than other soaps, but is best when used in the Sunlight way. Buy Sunlight Soap and follow directions.

MEXICO AND THE UNITED STATES.

American Ambassador Describes the Situation

Washington, Sept. 7.—Declaring to be false the reports of a bitter anti-American feeling in Mexico and an organized revolution against President Diaz, David E. Thompson the American ambassador, has made an exhaustive report to the State Department setting forth in detail information which could not be conveyed in his previous confidential despatches. He has renewed his request that, in compliance with the wishes of Mexico's President, the United States government should take steps to suppress the Mexican revolutionary junta at St. Louis, which publishes in Spanish a paper called "Regeneration." From observations made by Mr. Thompson, under instructions from the State Department, he gives as his opinion that the situation is not at all critical, but that the presidency with which many American papers have insisted that a revolt in Mexico against foreigners is imminent has created a feeling of unrest among the foreigners and excited the common Mexican to thoughts of what might be done along lines discussed in the publication, and he adds: "After all this agitation, for nearly all of which the American papers are responsible, if there are not local disturbances in the middle of September, the fact will speak marvellously well for the Mexican government and people. If there should be any local disturbances, they will be handled rightly by the Mexican government. Such a thing as a general uprising is not to be seriously considered."

IMMIGRATION INCREASING

Ottawa, Sept. 7.—In July last 18,176 immigrants reached Canada, 5,922 more than arrived during the same month the year before. The gain from Europe amounted to 45 per cent and from the United States 50 per cent.

Mr. Urban—"Commuter's wife must be an earthly angel." Mrs. Urban—"Why do you think so?"

"Mr. Urban—"He tells me they have had the same cook for three weeks."

Scribbles—"It's tough on the poets when eggs are cheap." Dribbles—"How's that?" Scribbles—"Their fresh lays are not remunerative."

"What are you doing, Pat?" asked the inquisitive person, as he observed the son of Erin ascending a ladder with a hod filled with bricks. "I'm carryin' knock-out drops," replied Pat, as one of the bricks

"How's Your Stomach"

is the way people in China say "Good Morning." The greeting of almost every nation is an inquiry after health. The Chinese have the root of the matter. A strong stomach is the foundation. Look after this organ and the general health cares for itself. Man is so constituted it cannot be otherwise. It is the mission of

BEECHAM'S PILLS

to keep the stomach well, the liver active and the bowels regular. They dispel sickness and create health. Dyspepsia, indigestion, Bloating, Constipation cannot exist when Beecham's Pills are used according to directions. For over 50 years they have cured disordered stomachs, and are now a world-famous remedy. They merit your confidence. Sold everywhere in Canada and U. S. America. In boxes 25 cents.

RAINBOW FLOUR never varies in quality. When you see the brand you know what you are getting—one bag is always the same as the others. "Rainbow Flour" is made from the best hard Manitoba wheat—the wheat that is rich in gluten—nourishing and tissue building. Makes "bread like mother used to make." TILLSONS MAKE IT

EDISON PHONOGRAPHS!

The EDISON PHONOGRAPH is to-day the most versatile musical instrument in the world. It stands alone as an entertainer. A piano, even in the hands of a master or operated by a mechanical player, will only play piano music. Nothing but violin music can be produced by the violin. The banjo, guitar, flute, or any other instrument will play but one kind of music. A singer can only sing in one voice. The EDISON PHONOGRAPH plays and sings everything. At your pleasure it will give you band, orchestra, piano, violin, flute, banjo, or any other instrumental music. It will sing selections in any quality of voice, and in solo, duet, trio, quartette, quintette, or chorus. It will do all this in a manner that amazes and delights its hearers. The smooth, pure-toned, and natural reproductions of the Edison Phonograph are due to its improved reproducer, which does not wear itself or the record. Its reproducing point does not require changing. It obviates all harsh, scratching sounds. Let us explain this to you, and tell you how little it costs to have an improved Edison Phonograph in your home.
