

Heart Strength

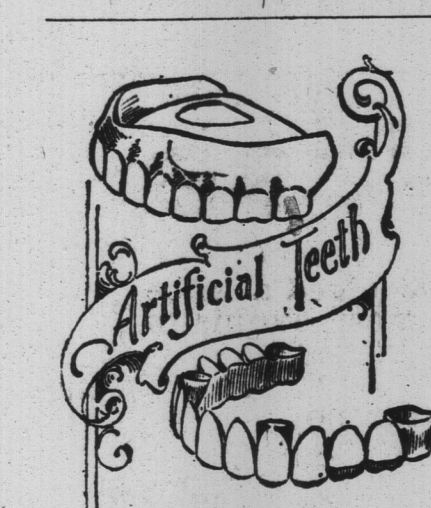

Heart Strength, or Heart Weakness, means Nervous Strength, or Nervous Weakness—nothing more. Positively, not one weak heart in a hundred is, in itself, actually diseased. It is almost always a hidden tiny little nerve that really is all at fault. This usually serves the Office of Heart Nerve—simply needs, and must have, more power, more strength, more controlling, more governing strength. Without that the Heart must continue to fail, and the stomach and kidneys also have to suffer.

Dr. Shoop's Restorative

Driven to Drink many a good man has been by home laundry work, with lumps of starch and waves of blueing, decorating his shirt front, and saw edges on his collars to annoy him. It makes his heart glad when he can see his linen immaculate, find with a snow white color and artistic finish that he can have put on by expending only a few cents. It is worth dollars in comfort and satisfaction to have your linen laundered at the

BUDGET SPEECH.

Premier Pugsley Says Prospects are Bright.

STATEMENT OF ACCOUNTS

Central Railway to be Taken Over by G. T. P.

Hon. Mr. Pugsley began his budget speech on the 19th. He congratulated the House on the late payment of \$275,000 by the Dominion in settlement of the Eastern Extension claims, and predicted an early settlement of the province's claim on the Fisheries award.

We have, he said, confidence in the new Minister of Justice, Mr. Aylesworth, and have every hope that at an early day this wrong will be righted. If we ever get the opportunity of taking our case before a competent tribunal I have not the slightest doubt that our claim will be recognized and that we will receive a sum in the vicinity of \$2,000,000.

I am happy to be able to say that at the convention recently held in St. John the Hon. Mr. Emerson announced to be part of his policy to take over branch roads and make them a part of the Intercolonial.

Sir Wilfrid has introduced a resolution for an address by both houses for such a change in the B. N. A. act as will enable the subsidies of the provinces to be increased. Our meeting at Ottawa with the representatives of the Dominion government was the first time in the history of Canada that representatives of the province were called together for consultation with the cabinet.

New Brunswick will now receive an addition of \$130,000 to the amount of its subsidy. The new agreement, instead of confining the subsidy to Quebec and Ontario to the population as it was in 1861, will give them 80 cents a head until their population reaches 2,500,000. That is certainly not an unfair arrangement.

When the population of these provinces reaches two and a half million 60 cents a head will be paid for the excess. A new arrangement with regard to the provincial subsidy for civil government and legislation is very generous, indeed, to the smaller of the provinces. Ontario receives \$240,000, or about 11 cents a head on its population at the census of 1901. Quebec receives the same sum, equal to 14 cents a head. Nova Scotia, \$190,000, or 41 cents a head, and New Brunswick \$180,000, or 54 cents a head.

In a Class by Itself. It is quite true FERROL is an emulsion of Cod Liver Oil and a particularly good one at that. But it combines Iron and Phosphorus with the Oil, and these are just what are needed to make the emulsion perfect and they are just what all other emulsions lack.

ceipts and expenditures with the estimates. The hon. gentleman here read over the figures of receipts and expenditures as follows.

Estimates receipts, 1907: Dominion subsidies, \$491,360.96. Territorial revenue, \$325,000. Fees provincial secretary's office, \$15,000. Private and local bills, \$1,000. Taxes, incorporated companies, \$36,000.

Succession duties, \$25,000. King's printer, \$1,250. Liquor licenses, \$22,000. Miscellaneous receipts, \$2,000. Dominion government for half cost wharves, \$9,000. Dominion government refund on fishery licenses, \$13,584.84.

Total, \$941,195.80. Estimated expenditures, \$934,607.02. Estimated surplus, \$6,588.78. Abstract of estimated expenditure, 1907: Administration of justice, \$17,830.

Agriculture \$9,825.00. Auditor General's department \$2,758.33. Agent General London \$2,000. Boys' Industrial Home \$1,500. Contingencies \$17,000. Elections \$1,500. Education \$224,754.48. Executive government \$34,200. Factory inspector \$1,000. Fisheries protection \$1,000. Free grants act \$1,500. Forest protection \$4,000. Guarantee bonds \$925. Game protection \$14,150. Health and public \$3,000. Hospitals \$9,000. Interest \$19,000. Immigration \$1,500. Legislature \$29,257.50. Mining \$7,000. Natural history societies \$700. N. B. Historical society \$125. Public works \$28,511.71. Provincial hospital \$62,500. Refunds crown lands \$100. Revisers \$1,800. Surveyor and Ry inspection \$5,500. Stampage collection \$12,000. Succession duties collection, etc. \$500. Superannuation \$600. Tourist attraction \$2,500. Unforeseen expenses \$2,000. Total \$971,607.02.

He then proceeded to say: The magnificent sum we receive from the territorial revenue shows the great value of our province. The lumbermen are not as some would have it, the enemies of the people, but their best friends for they are interested in preserving the forests and conserving this great source of revenue. You will notice on page ten, of the Auditor General's report, a table showing how the receipts from game protection and fisheries protection have increased during the past ten years.

In 1896 the receipts from game were \$352 and in 1906 they were \$27,970. In eleven years they made a total of \$120,970, while the expenditures on that account were \$96,733, leaving the handsome surplus of \$24,237.

The receipts from the fisheries in eleven years amounted to \$115,868, leaving a surplus over expenditure of \$96,945. We estimated the receipts from the Dominion government on account of the cost of wharves at \$7,500, but we did not receive so large a sum. We have an arrangement with them that they are to pay half the cost of the wharves on the tidal water of the St. John and its tributaries. During the present year we expect to receive the amount due us in full.

lar arrangement with a gentleman in St. John who has also brought out a number of emigrants. We are also getting children from the Middlemore home.

It will be observed that the interest paid last year amounted to \$161,304. This does not include the interest of the guaranteed bond of the N. B. Coal and Railway Co. These are kept in a separate account, and the interest added to the capital, because I confidently expect that before many months that road will be placed with the G. T. P. and this interest will be properly part of the capital account.

The estimates of income for the current year are as follows: The Dominion subsidy is the same as last year, but is just possible that legislation may be had by the imperial parliament in time to increase the amount payable on the first of July by \$65,000. We anticipate a large territorial revenue, for this has been a good season for the lumbermen and sales have been made at a higher rate than were ever known before. I am not without hope that we will be able to devise some plan to reduce the taxes of our incorporated companies by making it to the interest of loan and insurance companies to invest in provincial debentures 3 per cent, this would give insurance companies a better standing in the province. Succession duties are an item which it is difficult to estimate, but we have put them down at \$25,000. During the eight years aid to that is only paid on the amount received was \$84,404. During the period of a little over six years since I began with them the amount was \$153,990, or about double. The percentage on succession duties is only paid on the amount actually collected.

There is one thing that exists for cold storage warehouses for the preservation of fruit and other perishable goods. I am glad to be able to state that a movement is on foot for establishing a large cold storage warehouse at St. John. This enterprise will be assisted both by the Provincial and Dominion governments. Another enterprise which we hope to encourage is the establishment of starch factories, for the utilizing of potatoes that are not of the first quality. We think there is a good opportunity of establishing such factories in Victoria, Co. and Carleton Place, as well as in other parts of the province, and we propose to bonus these factories by the results they achieve and the amount of their output.

I wish to call attention to the provincial balance sheet on page 6 of the Auditor General's report. Among our assets we have put down the N. B. Coal and Railway Co. at the sum of \$1,150,000. In considering the assets of the province no accounts is taken of either the public buildings or the bridges because they are not revenue-producing.

The province owns very nearly 7,000,000 acres, mostly timber lands, for which a low figure would be \$3,400,000, or \$21,000,000 in all. We also might count among our assets the value of our fisheries, which is increasing in productivity year by year. I have noticed some references in the press to what was said in the public accounts committee that the I. C. R. was not placed among the assets of the Dominion government. I do not see why it should not be so placed, for the time will come when this road will become a revenue producing asset. We do not count among our assets the 58 steel bridges the province has built because they are free to the people. I am proud to say that the only toll bridge in the province was wiped out the other day. A few years ago the N. B. Coal and Railway Co. was run at a loss. Now there is a surplus of revenue which will increase from year to year.

There is nothing in the estimates for an increase in the salaries of teachers. That will be dealt with in a separate bill which will be brought into force by order of council. The additional amount will be payable when the increased subsidy is obtained. The amount will then be about \$20,000. The speech was resumed on Wednesday, Mr. Pugsley saying:— I stated yesterday that we had made a more liberal provision for the public services this year than we did last and I will call attention to some of the items. One of these is \$14,000 for steam navigation, which is \$2,000 more than was estimated last year. Last year we gave subsidies to Grand Mannan steamer, to the Senlac, running from St. John to Halifax, to the Deer Island and Campbellton Steamship Co., the Miramichi Navigation Co., to Fredericton and Woodstock boats, the May Queen running to Grand Lake, Millidgeville ferry, the Dalhousie and Campbellton Co., the Gondola Point ferry, the steamer Clifton, the Howpwell and Dorchester ferry, the steamer to Redbank, the Chatham ferry. In addition to these we have been pressed to give aid in other places. It is proposed to place a steamer on the route to Shippegan and Miscon, and we feel that if these people have no railway they are entitled to assistance, and we have decided to give them adequate aid. Then there is the Shipody Navigation Co., which is asking for help, and so for these and other services we have decided to increase the vote by \$2,000.

There is an increase of \$5,000 on the amount given for education, and there is also an increase for public works. We put down the sum of \$50,000 for interest not chargeable to special funds. Besides this there is \$2,200 on account of provincial hospital and \$10,000 on public works account, making the whole interest account \$202,200, from this we should deduct the sum of \$26,464, the amount of interest we receive on the balance in the hands of the

Dominion government. The sum of \$170,000 of additional subsidy which we are receiving would leave only a balance of \$70,000 of interest to be paid by us even at the comparatively high rate now prevailing. But if we could refund the amount of our debt at 3 per cent, this \$70,000 would practically wipe out our entire interest account.

We have put down for agriculture the sum of \$39,825. We have abundant reason to congratulate ourselves on what we have done in the interests of dairying. It was my fortune to introduce the first bill for the encouragement of dairying in this province. The opposition had nothing but ridicule for my proposal, but the result has been in the highest degree satisfactory. In 1896 the total value of the butter and cheese made in New Brunswick factories amounted to only \$76,151. Last year the amount was \$723,000, an increase of 900 per cent. The conditions of the dairying industry are changing to a considerable extent since the hand separator has been introduced. Instead of drawing the whole milk to small cheese factories at a large expense it is becoming the custom to separate the cream at the farm and either manufacture the butter at home or send the cream to large central creameries, thus gradually reducing the output of cheese and increasing the amount of factory butter. A large number of illustration orchards have been established and these orchards are causing much more interest to be taken in the cultivation and care of fruit.

A Provincial Fruit Growers' Association has been started and good results are following from the discussions carried on at their meetings. There is one thing that exists for cold storage warehouses for the preservation of fruit and other perishable goods. I am glad to be able to state that a movement is on foot for establishing a large cold storage warehouse at St. John. This enterprise will be assisted both by the Provincial and Dominion governments. Another enterprise which we hope to encourage is the establishment of starch factories, for the utilizing of potatoes that are not of the first quality. Psychine Never Fails. Psychine has no Substitute. AT ALL DEALERS, 50c and \$1.00 A BOTTLE. DR. T. A. SLOCUM, Limited, 179 King St. W., Toronto.

There are 69 miles of railway, 60 of main line and 9 of branches, fairly well equipped, and I think the line is worth at least \$20,000 a mile. The lowest tender for the G. T. P. from Chipman to Moncton, a level line worth only one steel bridge, was \$20,000 a mile, and this did not include rolling stock. The G. T. P. is to pass right through the village of Chipman, and I have every expectation that our road will be either sold or leased to that great line within a few months to be operated as a part of it. We all feel disappointed that this line is not to be built down the fertile valley of the St. John, but Chipman is only 75 miles from (See Page 8)
