The Bay Chaleur Weekly

ANSLAW BROS., PUB. CO.

Subscription: \$1.00 per year Strictly in Advance Advertising Rates on Application

Published every Tuesday afternoon in time to catch all evening and night trains of the Grand Trunk Railway.

THURSDAY, MAY 14th, 1908.

You never can tell about a woman. Thaw now offers to help prove that Thaw is sane.

Judging by the momentum the woman's rights movement is developing "more man" is what he will be.

With the treating evil and the free-lunch counter removed the American saloon would scarcely recognize itself in its own plate-glass mirrors.

Mr. Herbert Tupper has definitely refused to accept the Conservative nomination in Vancouver. The day of the Tupper has evidently vanished.

Britain has reduced her sugar duties. This may revive the jam, pickle, and candy industries injured by the protective duties of a few years ago.

Brag and bluster, sums up the policy of the Manitoba Conservatives, as voiced by Dr. Roche. But brag and bluster do not rule this country just yet.

Quebec is going to have a strenuous summer. A provincial election in June and a territorial election in July ought to satisfy even the residents of the Ancient Capital.

Mr. Heagy is the elephant in the room. Independent party, and it will hold a convention in Chicago in July. The meteoric newspaper publisher will not stay dead.

On the night of June 8 the political advisers will have the usual privilege of saying "I told you so" in reference to the results of the elections in two provinces at once.

Although the reichstag meddles with its management of internal affairs to some extent, Emperor William lets outsiders know that he is the power to whom ambassadors are sent.

The Conservative journals the country over are admitting that there is no hope of any great gains by the Conservative in Quebec. That is where they are wise before the event.

The Bishop of London has disclosed the fact that he composes sermons while shaving. Some day a thin red line may show on the cheek where he usually emphasized one of the stronger passages.

Dr. Roche did not mean it, but when he declared that the Roblin Government had ceased 5,546 names from the voters lists in Manitoba at once "purging" he gave a pretty strong argument in favor of a Federal system of lists for that province.

The Conservative press must be hard up for a sensation when they take advantage of a trip to New York of the Finance Minister, necessitated by domestic reasons to launch ridiculous stories. Mr. Fielding was in New York because his wife is ill, and not for any reasons of public business.

The British budget has an aggravating way of putting the agitation of the tariff reformers out of joint. Premier Asquith was able to remove a surplus of \$23,520,000 for 1907-08, which will mostly be applied to the reduction of the national debt. Already during the past year it has been reduced by \$20,000,000.

Weak Women

To weak and ailing women, there is at least one remedy. It is not a medicine, but a tonic. It is not a stimulant, but a restorative. It is not a temporary relief, but a permanent cure. It is Dr. Shoop's Night Cure.

Dr. Shoop's Night Cure

MILBURN'S LAXA-LIVER PILLS

are mild, sure and safe, and are a perfect regulator of the system. They gently unlock the secretions, clear away all effete and waste matter from the system, and give tone and vitality to the whole intestinal tract, curing Constipation, Sick Headache, Biliousness, Dyspepsia, Costive Tongue, Foul Breath, Jaundice, Heartburn, and Water Brash.

My husband and myself have used Milburn's Laxa-Liver Pills for a number of years. We think we cannot do without them. They are the only pills we ever take.

Price 25 cents or five bottles for \$1.00, at all dealers or direct from the Proprietor, The T. Milburn Co., Limited, Toronto, Ont.

PROTECTING THE FISH.

During the present week the New Brunswick Fish, Forest and Game Protective Association will send a delegation consisting of representatives from several counties to wait on the government asking authority to hold investigations and organize branches in different sections of the province. It is proposed to appoint three commissioners representing fish, game and forest interests who will work in conjunction with the association.

The St. John river and its tributaries totals one thousand miles. It varies in width from a mile or so to a few yards, yet there is not one thousand square miles of land in the whole province which could become anything like as valuable or as productive of wealth as could this magnificent waterway if it were properly protected. The Bay of Fundy is the greatest water area on the Atlantic coast with the possible exception of the Grand Banks and from it countless millions of fish enter the St. John river every year.

No effective protection is given these fish. They are slaughtered by the ton, and in some sections where the people ought to know better, even the most valuable fish are hauled in carts and distributed over the farms as fertilizer. In several counties instances are on record in which hundreds of dollars worth of fish have been used to produce a few dollars worth of vegetables or grain. The popular idea at this time is that the fish are an unfailing supply and that no matter how many are killed they will be just as numerous next year. Experience with the lobster, salmon, shad, gaspereau and trout should teach the people otherwise. It would pay a farmer better, or a hundred farmers better, to assist in protecting fish, to take them at the proper season and in the proper way, and to sell in the open market, rather than to devote all of their time to growing crops. There is no doubt that in a good many sections fish are regularly caught through the ice in winter, and the close season and indeed the railroads know that American markets are supplied with consignments from New Brunswick of fish which must be illegally caught. The Protective Association is evidently very much alive to the situation and its efforts to more effectively guard against what threatens to be a serious loss to the province should be supported by all.

St. John Star.

Minard's Liment I mberman's Friend.

GAS BY THE POUND

Glad news—says the Montreal Witness—has come to suffering householders and perplexed municipalities in the discovery of a new process of developing illuminating gas whereby it can be bottled, stored, and sold in quantities to suit purchasers, as coal oil is now sold.

There is probably no medicine that is relied upon by more implicit confidence than Chamberlain's Colic, Cholera and Diarrhoea Remedy.

LEARN THIS TO-DAY.

This, nobody is trying to hold you down. If you are not rising you are probably wasting too much time in looking for enemies.

Chamberlain's Colic, Cholera and Diarrhoea Remedy.

CANNED WHITE MAN

The Apache So Described the Photograph.

Most of the Apaches now use the dress of the whites, with fantastic individual variations, but they have not become house builders to any extent.

WISDOM FOR WOMEN

Unless a mother wants to heap trouble for herself and the child now and later on, it is better never to punish by making the culprit perform a certain amount of work, says Hilda Richmond in the Housekeeper for April. There are mothers who keep certain disagreeable tasks for little girls, just as some cities compel their offenders against public peace to repair roads or break stones. This is a risky business, since it gives the child the impression that it is a misfortune to have to work.

A grown man says he hates the very sight of an onion bed because his mother made him weed the tiny plants every time he was naughty when he was a child. Onion weeding is tedious back breaking work at best but when it is done in a patchwork garden it becomes horrible. A bright penny, a special treat in the way of a big orange or a trip to the pond to fish would have sent the boy whistling to the onion bed determined to conquer or die. But to be chained there, so to speak, with a smarting sense of his woes makes him recall those days yet.

Some mothers put the little girls to patchwork when they are restless and in mischief, but the only thing accomplished is to make the little fingers loathe needle work. I have seen rebellious little girls making button-holes all over a piece of old gingham as punishment for some wrongdoing. The work was wasted because the mother threw it in the waste basket the minute she was satisfied with the effort, and the children only turned out good work in order to be released.

Solitary idleness is better than work as punishment. Often when left to themselves the children would gladly take the blame or punishment for themselves. It always seems better ordered to work to atone for their sins. A long, quiet think will make them penitent, while hard work only makes them feel injured. When the children are left to themselves they usually turn out good work in order to be released.

As the weather gets warmer it is a little difficult at times to tell just how long to boil the cake being, but it is usually best to boil it a trifle longer than in cold weather. If you have trouble with the icing breaking when the cake is cut try putting a teaspoonful of vinegar in the icing when you do it. It usually keeps the icing moist and it will not crumble or drop off when the cake is cut.

Health Coffee is really the closest coffee imitation ever yet produced. This Coffee Substitute was recently produced by Dr. Shoop, of Racine, Wis. Not a grain of real coffee in it either. Dr. Shoop's Health Coffee is made from pure toasted grains, with malt, nuts, etc. Really it would fool an expert—who might drink it for coffee. No 20 or 30 minutes tedious boiling. Made in a minute, says the doctor. Sold by A. McE. McDonald.

Put a little powdered pumice stone between the layers of a folded piece of soft muslin and stitch round the edges to prevent the powder from falling out. Rub lamp glasses or window panes with this dry cloth and they will sparkle and sparkle almost immediately. Enough powder will remain in the cloth for use many times.

POINTED PARAGRAPHS.

A lazy man is an awful joke on his wife.

Many a patent leather shoe covers a big hole in a stocking.

A dumb waiter out of order is an unspeakable nuisance.

Hope for the best, then try your best to realize your hope.

It takes a convicted man to make a continuous hit—with himself.

The man who is after results isn't always particular as to the means.

His Statute majesty has learned the art of getting something for nothing.

The fact that ignorance is bliss may account for the happiness of newly married people.

How most of us would like to see trouble camp on the trail of some people we know.

Most women who do not approve of delectable gowns seldom have occasion to spend money for antifrat remedies.

Truth crushed to earth shall rise again, being like some men in that it doesn't seem to know when it is kicked.

Hot milk is even better than boiling water for removing most stains.

Books keep better when exposed to the air than when shut up in a bookcase.

Pearl knife handles should be cleaned with a rag dipped in fine salt, then polished with leather.

To clean a spice mill grind two tablespoonfuls of rice through the mill and all traces of the spice will be removed.

Sprinkle salt or cloves on the shelves of pantries where ants are troublesome, for both are objectionable to these insects.

Paint stains on floors may be secured off by washing them for a little while in turpentine or benzine and then rubbing them with pumice stone or glass paper.

To remove feathers from one pillow to another, take a tin can with both ends melted out, (better still, make a large pasteboard tube), tie or sew firmly an end in each pillow and shake feathers through.

Steep some tea leaves in water for an hour, then strain them out, and use the liquid for washing woodwork. This deodorizes the woodwork, a cleaner, fresher look than when washed with only soap and water.

For whitening boards or cleaning marble take half a pound each of soda-powder, chalk and powdered pumice stone, stir together in a small quantity of water and then add half a pound of soft soap. Mix together into a paste and use as soap with a scrubbing brush.
